

Are you passionate about bringing management reporting to life? Do you know how to solve challenging problems in elegant ways?

We're expanding our presence in Poland and developing the Financial Reporting and Analytics Team in Krakow. We're looking for junior and senior candidates to:

- produce senior management reports on time and in the required quality
- drive and monitor the daily, weekly and monthly production process
- implement and maintain reporting solutions based on user requirements, this includes data sourcing, calculations and presentation in the final report
- automate reporting processes in order to optimize production time and reduce number of errors
- document solution architecture and respective run-the-bank processes
- support global initiatives across the wider Reporting and Analytics group and cooperate with colleagues to drive the process improvement opportunities
- respond to ad-hoc user inquiries
- cooperate closely with main clients and data providers

We are looking for candidates in the following positions:

- Reporting Specialist in Asset Management
- MIS Analyst
