

Giesen W30A Coffee Roaster

This relatively recent addition to our coffee roaster assemblage is an intermediate between the W15A and the W45A.

This coffee roaster is designed for roasters that are looking for a step upwards from the W15A. The W30A is equipped with a new burner technology for an accurate roast.

With a roasting capacity of 120 kilos per hour, this coffee roaster is perfect for intermediate businesses roasting coffee in larger quantities.

The W30A is designed according to the proven industrial principles of Giesen. It is an appealing machine because of its' artisanal appearance and it provides most of the features and specifications found in all Giesen Coffee Roasters.

Automatic airflow control

Digital drumspeed control

Cast iron frontplate & drum

Premix burner system

Automatic burner control

Data logging and profiling
