

A Message from CAH Staff

Hello,

Another application cycle has concluded, and we, the staff of the College Admissions Hub (CAH) Discord are left with one question: how do we best prepare the next high school class for the process next year? After seeing the overwhelmingly positive response from the r/ApplyingToCollege and CAH communities, we decided to once again make another iteration of the Real Safeties, Matches, and Reaches document.

The purposes of this document remains the same: to provide future applicants with a tool to help them better determine what a true safety, match, and reach is and pass on wisdom from one graduating class to another. We hope this resource will help you be better informed and more in-tune into the process, as well as dispel any admissions myths you may hold.

We know this process is incredibly stressful, and full and tears of both joy and distress. However, despite the emotional rollercoaster which is the application process, we know you will all do amazing. Work hard, persevere, research, edit, edit, edit, and the rest will follow.

While you're here, make sure to check out both the [international companion document](#), as well as the [Admissions Reflections from the Class of 2022](#) document where you can find more advice and thoughts from the class of 2022. Also, feel free to join the College Admissions Hub Discord ([invite link here](#))! We have an ever growing population and we will welcome you with love and open arms.

All the best,

The CAH Discord Staff Team

What's new?

- 29 domestic + 8 international profiles with more detailed descriptions of applicant's ECs, honors, essays, and recommendations.
- An additional info section to explain atypical circumstances or key application elements which otherwise would not have been mentioned
- Two companion documents: one with [international profiles](#), and the other a compilation of [admissions advice from the Class of 2022](#)
- Advice from each applicant included in their profile

How to Use This Resource

This document is made for for all those who are applying to colleges in the upcoming cycle, as well as those who are supporting applicants (counselors, parents, siblings) and wish to be more informed about the process.

Though the mission of this year's RSMR is the same as [last year's](#), the two resources differ structurally. We've decided to divide the contents of RSMR into three separate files: one with domestic profiles (this file), one with [international profiles](#), and the last a [compilation of admissions advice](#). This decision was made in the hopes that applicants could find more relevant profiles easier and because one RSMR document would've been nearly 90 pages long (yikes). This does not mean that international or domestic applicants should only look at their "designated" files. There are important lessons to be learnt from every profile for all applicants, regardless of where they are applying from.

We recommend that users **FIRST** read through the advice document before proceeding to the profiles themselves. It's quite easy to get lost in the results and not take in some of the amazing and insightful advice offered by recent applicants. When viewing the profiles, make sure to not focus too much on one single applicant, especially outliers. Look for trends as they will be a better predictor of your success.

Notes, Disclaimers, and Warnings

- Once again, entries were collected from a very skewed, competitive and unrepresentative pool. This is but a snapshot of one's application, so take the success of each profile with a grain of salt.
- Ratings of ECs, honours, essays, and recommendations are all self-assessed. Please take these ratings and any descriptions of these elements with a grain of salt.
- Like an admissions officer, look at both the individual entries as well as the pool of entries holistically. Don't focus too much on one part of an applicant's entry or the entry of one individual
- Some profiles are very long and cross-over several pages. Make sure to scroll down!

Summary of Results

1. Having amazing ECs is by no means a panacea to all your application process problems. Submitting weaker essays can really be a death sentence, even for individuals with "insane" extracurriculars. This, once again, goes to show how incredibly important that applicants really spend time on their essays if they want to be successful.

- See entries 4 and 8

2. The schools you get into are not always indicative of one's intelligence or extracurricular strength. There are several applicants here whose ECs are certainly at the highest echelons yet were denied from "top" schools. Admissions is not a perfect process. In fact, it's far from it. While it may seem impossible for certain applicants to be rejected, or for results to be random, it's important to remember that this process is not a judgment on their or anyone's value or merit. It can be stressful, and it will surprise you, but it's never the end of the world.

3. Start early and take your time. Being strong on paper does not guarantee perfect results, and taking your time to craft strong essays and hone each aspect of your application is critical no matter who you are.

4. While it's easy to overlook financial aid when in the midst of applying, cost is often one of the single most important determining factors when deciding to attend. Be informed: not only about what need-based aid you might receive, but about what factors influence that aid, what strain certain cost levels would have on your family, and perhaps most importantly, about potential merit aid that might change your preferences altogether. 1k is actually a lot of money to owe. Sometimes, making the more financially sound choice is better than choosing a school because of prestige.

- See entries 8, 15, 33

5. Love your safety. Statistically speaking, not everyone can go to their dream school. In addition to being realistic when choosing your safety in measures such as acceptance rate or middle 50, it's also important to keep in mind fit and cost.

6. There's a fine line between being confident and being unrealistic. Being honest with yourself and about your strengths will only help you to create the best possible applications that you can. this applies to both safeties and reaches!

Applicants By School

Entries 9, 12, 13, 16, 17, 20, 25, 27, 30*, 32*, 34, 35, 36* applied to LACs

- Accepted: 12, 13, 16, 20, 30*, 32
- Rejected: 9, 17, 25, 27, 34, 35, 36*

Entries 1, 4, 5, 13, 18, 20, 22, 24, 28, 31*, 35* applied to Stanford

- Accepted: 4, 18
- Rejected: 1, 5, 13, 20, 22, 24, 28, 31*, 35*

Entries 3, 4, 8, 11, 12, 13, 14, 18, 22, 23, 25, 28, 29, 32* applied to Cornell

- Accepted: 14, 18, 23, 28
- Rejected, 3, 4, 8, 11, 12, 13, 22, 25, 29, 32*

Entries 4, 5, 8, 9, 12, 13, 16, 18, 19, 20, 22, 25, 28, 29, 30*, 32*, 34*, 35* applied to other Ivies

- Accepted: 16, 18, 34*, 35*
- Rejected: 4, 5, 8, 9, 12, 13, 19, 20, 22, 25, 28, 29, 30*, 32*,

Entries 1, 8, 11, 18, 21, 22, 24, 31*, 34, 36*, 37* applied to UC Berkeley

- Accepted: 22, 31*, 37*
- Rejected: , 8, 11, 18, 21, 24, 34, 36*

Entries 1, 8, 11, 18, 21, 22, 24, 26, 27, 31*, 34*, 36*, 37* applied to UCLA

- Accepted: 8, 18, 22, 24, 26, 31*, 34*, 37*
- Rejected: 1, 11, 21, 27, 36*

Entries 3, 4, 8, 15, 16, 19, 22, 24, 28, 29 applied to MIT

- Accepted: 4, 22
- Rejected: 3, 8, 15, 16, 19, 24, 28, 29

Entries 5, 6, 8, 9, 11, 12, 18 applied to WUSTL

- Accepted: 5, 8, 18
- Rejected: 6, 9, 11, 12

*international applicant

7. There is no one 'perfect applicant' in this process. Anyone can succeed, and anyone can fail. The best thing to do right now is commit yourself to putting in the work so that you have the best chances at succeeding possible.

stats

<i>GPA (weighted/scale):</i> 4.17/4.0	<i>GPA (unweighted/scale):</i> 4.0/4.0	<i>class rank:</i> 1/250
<i>SAT/ACT:</i> 1410/29	<i>subject tests (optional):</i> Math II: 730	<i>financial need (optional):</i> High, EFC: 0

academic information

<i>intended major:</i> Computer Science	<i>additional notes/info (optional):</i>
<i>extracurriculars:</i> NHS President, Interact Club Treasurer, Spanish Club Secretary, Cyberpatriot, many school spirit events, Tennis, Diving Heavily involved in all of them, but I don't think I described them very well on the Common App. Don't think I had good ones for CS. rating: 7	<i>honors:</i> Pretty good stuff, but not a lot. Got a scholarship to represent the US in Hiroshima, award of recognition by the state, and UW materials science camp rating: 8
<i>essays:</i> Worked on personal essay for a long time, decided it wasn't good, wrote an entirely new one on the final day and was happy with it. Supplements were okay and were done in 1-2 hours. rating: 9	<i>recommendations:</i> Trig/Precalc, AP Eng, AP Lit Never read them, but I have very close relationships with them rating: 8

results

before applying: expectations (likely, unsure, or unlikely)		
<i>safeties:</i> University of San Francisco, University of Colorado at Denver - Likely	<i>matches:</i> Santa Clara University, Boston University, Cal Poly SLO - Unsure NYU - Unlikely	<i>reaches:</i> Northeastern, Pitzer, Claremont McKenna, University of Washington - Unlikely Purdue - Unsure
after applying: results (accept, waitlist, reject, etc)		
<i>safeties:</i> University of San Francisco, University of Colorado at Denver - Accepted	<i>matches:</i> Santa Clara University, Boston University, NYU - Accept Cal Poly SLO - Waitlist	<i>reaches:</i> Northeastern - Accepted Pitzer, Claremont McKenna - Rejected UW, Purdue - Waitlisted

8. BINCHOSITY

attending Rice University (JHU was too expensive lol)

advice

- ❖ “Essays are what separate you from other applicants. Great writing skills are extremely important.”
- ❖ “Don’t get caught up over your dream school — it’s okay to have multiple!”
- ❖ “C’s in classes can hurt a lot, based on trends I’ve seen for T20 applicants at my school. Keep GPAs up.”
- ❖ “I don’t recommend ED if you can’t afford your school (play around with NPCs). **Also, a lot of top tier schools try to lure applicants in the RD round with THICC merit-based scholarships.**”

demographics

<i>ethnicity/gender (optional):</i> Asian / Female	<i>high school type:</i> public	<i>state/country:</i> Midwest / USA
---	------------------------------------	--

stats

<i>GPA (weighted/scale):</i> 4.801 W (no cap)	<i>GPA (unweighted/scale):</i> 3.961 / 4.0	<i>class rank:</i> 3/375
<i>SAT/ACT:</i> 35 ACT	<i>subject tests (optional):</i> 790 - Math 2, 730 - Bio E	<i>financial need (optional):</i> High income bracket :(

academic information

<i>intended major:</i> BME - premed track* *Dream schools: I didn’t really have a dream school, mostly because I didn’t find one single school that fit me perfectly -- there’s pros and cons for each school I applied to. Depending on the school/strength of their engineering or pre-med or programs/ tracks, I applied to different majors at different schools.	<i>additional notes/info (optional):</i> Standardized test scores: Nuances DO exist between test scores. For the ACT, for example, anything 34+ is competitive for T20 schools, and 35+ is even better for T10 -- of course, this is assuming your essays/ECs fall in line too. Shotgunning - I shotgunned, and I don’t regret doing it at all because both choice and financial aid are extremely important to me and my family.
<i>extracurriculars:</i> Research/ISEF Club (President); School newspaper (Page Editor); Photography Club (Exec. Board); National Honor Society; Key Club; DECA Leadership Council; CSWEA Internship <i>rating: 7</i>	<i>honors:</i> National Merit Commended Scholar; Siemens Semifinalist; awards from multiple international science fairs; research published by local water association; Scholastic Art & Writing awards <i>rating: 8</i>
<i>essays:</i> Common App essay could’ve been better; supps probably were what probably made me stand out. <i>rating: 5</i>	<i>recommendations:</i> Strong recs -- I also got a thicc letter from my research mentor. Counselor rec was meh. <i>rating: 8</i>

results

before applying: expectations (likely, unsure, or unlikely)		
<i>safeties:</i> UW-Madison, Purdue, UIUC, UWash - Likely	<i>matches:</i> UNC, UCSD, Case - Likely GTech, UMich - Unsure	<i>reaches:</i> WashU, UCLA - Unsure MIT, Rice, Vanderbilt, UC Berkeley, Northwestern, Columbia, Harvard, Cornell, Brown, UPenn, JHU, Duke, Princeton - Unlikely
after applying: results (accept, waitlist, reject, etc)		
<i>safeties:</i> UW-Madison, Purdue, UIUC, UWash - Accepted	<i>matches:</i> UNC, UCSD, Case, UMich - Accepted GTech - Waitlisted	<i>reaches:</i> Harvard, Duke, UC Berkeley, MIT - Rejected Brown, Northwestern, Columbia, Cornell, UPenn, Princeton - Waitlisted JHU, UCLA, WashU, Vanderbilt, Rice - Accepted

9. BROZEL

attending UNC Chapel Hill

advice

- ❖ “I wish I had taken time to learn more about different colleges before application season. I found that I didn't know where I wanted to apply, and when I did choose places, I didn't have good reasons for it.”
- ❖ “If you're homeschooled, do your research and ask lots of questions about the process! You may not have a college counselor, but you do have an entire discord community full of helpful people, so make use of it.”
- ❖ “Remember, this is the culmination of the work you’ve done over all of high school, so give it your all!”

demographics

<i>ethnicity/gender (optional):</i> Asian/White	<i>high school type:</i> Small international school in India 2 years, Homeschool 2 years	<i>state/country:</i> North Carolina, USA
---	--	---

stats

<i>GPA (weighted/scale):</i> N/A	<i>GPA (unweighted/scale):</i> 3.99 out of 4.00	<i>class rank:</i> N/A
<i>SAT/ACT:</i> 2400 superscore	<i>subject tests (optional):</i> 800 Math II, 800 Bio, 760 Chem	<i>financial need (optional):</i> Moderate. EFC~\$20,000

academic information

<i>intended major:</i> Biology/Biochemistry	<i>additional notes/info (optional):</i> Earned associates degree in science from a community college
<i>extracurriculars:</i> Did unique project with Tibetan refugees, but none of my ECs lasted very long b/c of move to US. <i>rating:</i> 7	<i>honors:</i> Only generic things for my grades/AP's <i>rating:</i> 4
<i>essays:</i> Interesting topics, average execution. Was a little disappointed with how they turned out. <i>rating:</i> 6.5	<i>recommendations:</i> I can't really say. <i>rating:</i> N/A

results

before applying: expectations (likely, unsure, or unlikely)		
<i>safeties:</i> NC State, East Carolina U- Likely	<i>matches:</i> UNC Chapel Hill, WUSTL, Case Western- Likely	<i>reaches:</i> UChicago, Columbia, Brown, Yale, Swarthmore- Unsure

after applying: results (accept, waitlist, reject, etc)

10. CONNOR

attending UT Austin

advice

- ❖ “I actually had a lot of fun with the college application process, because the process of searching for schools and thinking about what I wanted really refined my goals and made me more confident in myself.”
- ❖ “In my case, I applied to a top 20 school, but liked other schools just as much, because the things I liked about that top 20 school were not limited to top 20 schools. So when I got rejected from Northwestern, I was perfectly fine with it because I already had other options I liked just as much.”

demographics

<i>ethnicity/gender (optional):</i> White / Male	<i>high school type:</i> Private	<i>state/country:</i> Texas / United States
---	-------------------------------------	--

stats

<i>GPA (weighted/scale):</i> 3.86 / 4.0	<i>GPA (unweighted/scale):</i> 4.03 / 4.5	<i>class rank:</i> No rank at my school
<i>SAT/ACT:</i> 1510 (760 R&W, 750 M)	<i>subject tests (optional):</i> N/A	<i>financial need (optional):</i> Minimal to none

academic information

<i>intended major:</i> Journalism	<i>additional notes/info (optional):</i> Attended a summer camp at Boston University
<i>extracurriculars:</i> Main ones were a youth radio program, a journalism summer camp, and volunteering for a charity that produces audiobooks for dyslexic and visually impaired students. Other stuff tended to be similarly writing and audio/music related. Not a huge number of big time commitment EC's but I think I had solid depth in my areas of interest, and it tied in nicely with my major. rating: 8	<i>honors:</i> National Honor Society in 11th and 12th grade, AP Scholar with Distinction. That's it. rating: 4
<i>essays:</i> Put a lot of time and effort into essays and supplements, and I believe that paid off. I'm sure looking back at them, I would have done certain things differently, but I believe that the essays showed the AO's the non-numbers side of my personality, which is what they're mean to do. rating: 8	<i>recommendations:</i> I asked for recs from my English teacher, my math teacher, and my youth radio counselor. All three of them knew me very well, and I had worked closely with them and built strong relationships with them through classes and in the counselor's case, radio. So I imagine their recommendations were strong. rating: 8

11. H E C T O R

attending UCSB

advice

- ❖ “Don't spend weeks trying to increase your score by 10-20 points. Either increase it by 100, or don't bother. GPA is #1 here. The transcript speaks millions of words of how you spent four years in high school.”
- ❖ “I shotgunned. I believe it's worth it (if you can afford it).”
- ❖ “Not all safeties are safeties. Depends what you are applying for. I got waitlisted at UIUC with a whopping 66% acceptance rate overall for engineering.”

15. J U J U

attending michigan state university (thicc full ride)

advice

- ❖ “Don't get caught up with prestige, but definitely try for something if that makes sense”
- ❖ “For undergraduate engineering programs, as long as it's ABET accredited, and it's not on the TIME list of ‘worst engineering schools’ then I think you'll be fine.”
- ❖ “If you're not getting rejected, you're either vv overpowered, or you're not trying hard enough.”
- ❖ Don't overlook the advantage of being the top student at a less prestigious college
- ❖ Don't obsess over the college application so much that your grades drop, I let my grades drop first semester and I submitted that to MIT rip
- ❖ You don't have to have internships and research to be competitive for admissions
- ❖ I wish I spent more time on essays, but I wish I didn't over-edit some of my essays

demographics

<i>ethnicity/gender (optional):</i> Chinese Female	<i>high school type:</i> Large Public HS	<i>state/country:</i> Michigan
---	---	-----------------------------------

stats

<i>GPA (weighted/scale):</i> 4.3 I think? Might be 4.2 (out of 5.0)	<i>GPA (unweighted/scale):</i> 3.83/4.0	<i>class rank:</i> 1/503 but my hs just gives out 1 if your gpa is >4.0
<i>SAT/ACT:</i> 1600	<i>subject tests (optional):</i> Math II + Physics 800	<i>financial need (optional):</i> 35k efc

academic information

<i>intended major:</i> Mechanical Engineering	<i>additional notes/info (optional):</i> flexibility in major is rilly nice
<i>extracurriculars:</i> leader of 3, but I only put a lot of effort into 2 I wish I dropped NHS earlier rating: 7	<i>honors:</i> I have a lot of dumb honors that I didn't rilly care for rating: 3
<i>essays:</i> I thought CA was ok, but supplements were L's rating: 6	<i>recommendations:</i> normal positive recs. Physics teacher rec was probably good rating: 7

results

academic information

<i>intended major:</i> Chemistry	<i>additional notes/info (optional):</i> Gap year student.
<i>extracurriculars:</i> I worked in the Air Force Research Lab for 7 months during my gap year. I worked full time (40 hr/wk) doing synthetic chemistry research. During my time, I got my name on 2 papers (which should be published soon). I got a lot of experience that many people don't until grad school or post-grad. I also became very capable in the lab. In high school, I was co-president of the robotics team my junior year. I was in NHS, rocketry, scioly (2nd in disease detectives and 4th in anatomy & physiology placed), won a mathletes competition. Pretty normal. rating: 8.5	<i>honors:</i> National Merit Finalist Valedictorian Honors at my Community College Summa Cum Laude on both of my AA's rating: 5
<i>essays:</i> I wrote a lot about my experience working in the chem lab. rating: 5.5?	<i>recommendations:</i> I had my college professor in English write me one. I read hers from last year and it was amazing. Chemistry teacher wrote one. I know her pretty well and was her lab assistant. I think she would write a good one. I had my boss in my research co-op write me one. He knew he incredibly well. He saw me grow and I'm sure wrote an amazing letter.

	rating: English (6.5), Chemistry (5), boss (8.5)

23. SCRATCH

attending Cornell University

advice

<ul style="list-style-type: none"> ❖ “Choose your earlies strategically, don't early your dream school if it doesn't have ED.” ❖ “Make sure to have at least 3 very good match schools.” ❖ “Be smarter than our class was. Realize what is strong and unique about your portfolio and pound that through every single essay and opportunity you can.” ❖ “More than anything, before you even consider where to apply, think about how you plan to ascend. This process isn't about magically finding the place of your dreams, it's about growing up and realizing what steps you need to take in order to satisfy your future goals.”

24. SPIRIT

attending UCLA

advice

- ❖ “Start early, and work hard every day. Don't consider just filling in your personal information as good work for that day.”
- ❖ “When it's time to write essays, don't put it off for 5 days ‘thinking,’ but write whatever shit comes to your mind at the moment and then improve. Rewrite, rewrite, rewrite! Get as many people to look at it as possible until you are happy.”

25. § W U L F E

attending Pennsylvania State University

advice

- ❖ "It's much, much harder than you expect. Never stop working, it's better to continue to improve and be safe rather than to settle at a spot you're satisfied with."
- ❖ "I do wish so much that I had been able to talk to more undergraduates or applicants and compared myself to the best who were accepted rather than the medium or bare minimum of people who were accepted. It's okay to be hopeful, but not to be confident in something that is so luck oriented. I wish I hadn't been so naive."

demographics

<i>ethnicity/gender (optional):</i> Asian American/Male	<i>high school type:</i> Large suburban public	<i>state/country:</i> Pennsylvania, USA
--	---	--

stats

<i>SAT/ACT:</i> 1580 SAT	<i>subject tests (optional):</i> 780 Bio M, 770 Math II	<i>financial need (optional):</i> EFC 28k~

academic information

<i>intended major:</i> Economics/Political Science	<i>additional notes/info (optional):</i> Only hook is first gen student.
<i>extracurriculars:</i> FBLA (Treasurer), Model United Nations, Academy Council, Work, Volunteering at book drive Nothing really standing out but solid ECs, I suppose. Largest EC would be working, around 15 hours a week since freshman year. <i>rating: 6-7</i>	<i>honors:</i> National Merit Finalist, 3rd Place FBLA (Accounting II) States/competed at nationals, 1st Place FBLA (Personal Finance) regionals, 4x Consensus Builder Award in MUN as USA in WHO, I'd say pretty strong in respect to my County. <i>rating: 8</i>
<i>essays:</i> Wrote about how my family's status as Asian American entrepreneurs has led me to to pursue econ/polisci to really understand the grasp that business has on politics in our country and how the two fields need to be separated. I think this may have shafted me a lot because when I was writing, my essay had a lot of contradictions. On one hand I was pledging to look at econ and politics in an open minded way, while drawing conclusions from only my experiences probably looked contradicting and naive. <i>rating: 5</i>	<i>recommendations:</i> One from my business teacher, who I'd had for three classes, is the advisor for FBLA, and went to nationals with me last year. I really trust that he wrote a strong letter for me albeit maybe a bit generic because he isn't used to writing LORs. My other was from my Hon English III teacher, I earned 99 avg in her class and participated a lot so I trust that she really wrote a strong LOR too. <i>rating: 8</i>

results

before applying: TBH didn't know what to expect, thought I could maybe get into at least one or two.

27. T U N G

Attending the University of Richmond

advice

- ❖ “There are some schools I applied to just because they had a free application, and many of them I never visited—don’t do this and do not shotgun schools. Think about whether you would actually go to the school and judge by fit more than anything else, you should be able to see yourself going there. Also, don’t trust naviance graphs, even if you’re confident you’re getting in, the check marks around you could have hooks or your demographic could put you under them. If you want to be less stressed during senior year definitely apply ED to a school you have a chance at.”
- ❖ What do you wish you did differently? “I would apply to less schools and only apply to schools I like, visit more, and go against my parents to apply ED to an LAC like I wanted to.”

demographics

<i>ethnicity/gender (optional):</i> Asian(Chinese) Male	<i>high school type:</i> Suburban Public, well ranked but not necessarily a top school	<i>state/country:</i> Connecticut/USA

29. Z E X U

attending University of Southern California

advice

- ❖ “Don't choose universities based on just prestige; research each school in-depth to make sure that if accepted it is a school you would want to go to without any qualms.”
- ❖ “I wish that I hadn't made my essays so formulaic & had asked for LESS peer reviews.”
- ❖ “Shotgunning is almost necessary for most people to get into a ‘top university’ in our time. If you can afford it, I think that you should. Better to apply and not get in than to think back and wonder if you could've made it in for a lifetime.”

demographics

<i>ethnicity/gender (optional):</i> Chinese/Male	<i>high school type:</i> Public	<i>state/country:</i> Oklahoma
