# Lip Blushing Treatment in Mumbai

Lip Blush (also known as Lip Tattoo or Permanent Lipstick) is a professional cosmetic and aesthetic procedure. ACE PMU breaks down how lip tattooing works, if it hurts, and how, yes, it can actually make your lips look bigger. Our [Permanent Microblading Lip Blushing Treatment](#) is about making your lips even, creating the illusion of volume and ensuring that the colour stays put in any situation so that all you need to do is add a dab of lip gloss and you're good to go.

If your artist refrains from using sterile tools, you could contract herpes, fungal infection, skin infection, swelling, redness, pus deposition, and more. However, [Ace PMU](#) always makes sure to use the most hygienic tools as well as maintain the utmost cleanliness for our client's well-being.
