

# Blaze Black Volt White

## POKÉMON CHANGES

A rather common feature of any of my hacks/mods/etc is the changing to a lot of Pokémon. Note that with the exception of the TM compatibility changes for Hurricane, Bug Buzz and Sucker Punch, all changes in this document are NOT present in the Vanilla version of the game.

Most of the stat changes focus around making some of the weaker Pokémon better. Farfetch'd, Chatot, Mothim, and Magcargo are just some examples. Some Pokémon also gain extra typing, sometimes giving you some new type combinations to try. The Unova starters in particular get some rather extreme changes in their final forms. Emboar, not so much, but Samurott and Serperior both bring new (albeit not new if you've played Blaze Black and Volt White) typings to the table. The full list of Pokémon who have type changes is the following: [Farfetch'd](#), [Masquerain](#), [Volbeat](#), [Illumise](#), [Glalie](#), [Electivire](#), [Serperior](#), [Pignite](#), [Emboar](#), [Dewott](#), [Samurott](#), [Cofagrirus](#), [Gothita](#), [Gothorita](#), [Gothitelle](#) and [Beartic](#).

Note that the document lists two abilities for each Pokémon; this just shows them both even if they aren't necessarily edited, although of course you can only have one at a time. The third ability - the Dream World one - is not shown UNLESS it has received a change, but on the whole this has not happened. Remember to use Ctrl+F if you wish to find a certain Pokémon! Also, anything not listed (e.g. stat, type) that is not an ability has not had any edit made to it.
