introduction

Before we go further into the guidebook, we assume you know what V Reborn is. It is required to read our normal guidebook & become an approved member first in order to join the LiLS V Reborn server and get your IP on our whitelist (more on that later.)

Please understand that any violation of the rules can lead to punishment & having you removed from the community & server whitelist.

Though this is a totally optional part of the community but highly recommended. Due to mods & scripting, the RP possibilities of our Reborn server are endless!

HOW TO JOIN & COMMUNICATE

To join our server, you have to be an approved member of the community. Details on that are in the LiLS Guidebook.

We arrange sessions via our Discord server and communicate in-game via the text bar. Voice communication on the server and/or Discord is allowed as well. Just pay attention to the people using text.

Please refer to our normal guidebook for our communication rules.

IP Whitelist

The IP whitelist is basically there to stop unwanted visitors from disrupting RP sessions. It also helps to maintain some type of order.

To get on the whitelist, you need to be an approved member of the community and send your IP to a staff member via a Discord DM.

Your IP will then be added to the server whitelist and you'll be able to connect & join.

characters

You are allowed as many characters as you want in the V Reborn server, or you could just use your normal GTA Online character (money & stats will not be affected in normal GTA).

However, you must log all your inventory & properties via Discord every so often for each character.

Constant character switching while in session is not allowed and will result in punishment.

mods

Please do not add any mods besides the ones recommended here as this has been known to cause issues in the server & cause you to not see other players. Use other mods at your own risk.

Using mods unfairly (God mode, teleportation in unfair ways etc.) will result in punishment.

These mods and their descriptions are easily found on Google.

SKIN CONTROL (optional)

AMBIANCE (optional)

ENHANCED REBORN (required in order to save multiple character skins and vehicles)

OPEN INTERIORS (required in order to enter interiors which often occurs during RP)

PROPERTIES & VEHICLES

Each one of your characters is allowed up to 5 personal vehicles, though after the first two, they need to RP'ly obtain the others.

You can RP'ly sell vehicles off using in the in-game ads section of Discord. Using the mod menus, players can RP'ly buy cars off each other and save them.

Claim properties by applying to a staff member via Discord. Must actively use property otherwise it will be allocated to somebody else.

in game RULES

Our in-game rules are exactly the same as the normal roleplay sessions as described in the normal LiLS Guidebook.

Violation of these rules can lead to punishment.

FACTIONS

Our factions are exactly the same as the normal roleplay sessions as described in the normal LiLS Guidebook. It is recommended to have a character for each faction.
