

# Is World Of Warcraft Down?

Is World of Warcraft down? Here's a quick overview of the current server status in North America, Europe and whether there is any maintenance for WoW.

Picture the scene: you've finished work/school/university, you're all cozied up in front of your PC about to dive into World of Warcraft - but you can't get in. It happens to everyone, but don't panic.

Server outages are usually a result of two different things: something malfunctioning on Blizzard's end, or planned maintenance to introduce new hotfixes or patches.

Is World of Warcraft still down right now? Here's everything we know about WoW server status and upcoming maintenance.

Is World of Warcraft currently down? Planned maintenance & downtime

Is World of Warcraft offline? Server status & DDoS reporting

All realms across Europe, North America, and Oceania are currently operational as of the time this article was written (June 9, 13, 08 BST). This can be seen on Blizzard's WoW realm checker hub.

Blizzard was hit with a DDoS attack in May. This meant that all services, including World of Warcraft, were shut down. Blizzard confirmed that the servers were a victim of multiple "attacks."

Is there any maintenance for WoW planned?

The WoW scheduled maintenance for the rest of this week is not currently scheduled as of June 9, 2022. Shadowlands Patch 9.2.5 was the last maintenance that took place for WoW on June 7, 2022.
