

# Minecraft PE Servers

Minecraft PE servers also known as Minecraft Pocket Version or just MCPE servers are Minecraft servers that may be performed on cellular devices. You will discover the very best MCPE servers on our Minecraft PE server record.

What is MCPE?

Minecraft Pocket Version was the official Cellular model of Minecraft that may be performed on mobile gadgets powered by Android, iOS and Home windows phone. Later on with Better Together update, Minecraft PE was modified to only Minecraft and is now thought-about as part of Minecraft Bedrock version but for cell units.

How Minecraft PE started?

Minecraft PE was deliberate quickly after Minecraft for Computer was released, but Minecraft Pocket Version did not see first launch until 2012 when first model was launched. Similar as with traditional Minecraft, MCPE additionally supplied functionality to setup servers.

Minecraft Pocket Version gameplay...

The target in Minecraft PE and on MCPE servers is similar as in its authentic version, where players can build and break digital worlds in a sandbox-based game. Teamextrememc will also find crafting, mobs and all blocks in MCPE.
