

BJSS IN THE PUBLIC SECTOR

Over the past decade, BJSS has successfully undertaken over 200 unique consultancy and software delivery engagements for organisations across the Scottish and UK Governments.

Having worked with Disclosure Scotland, Agriculture and Rural Economy, Education Scotland, FCO, DfT, Home Office, DVSA, UKRI, Cabinet Office (GDS), NHS, Highways England and the Met Office, our knowledge and experience of the public sector has led to over 35 passed assessments from Digital first and GDS.

Value, delivery excellence and knowledge transfer is always at the forefront of our engagements. We have assisted the public sector to achieve their Digital Transformation initiatives, and we have enabled the delivery of critical national infrastructure. We have provided strategic consultancy on operating models and we've also made our technical expertise available as part of blended teams. As a technology agnostic consultancy, with strong expertise in cloud, AI and data, we work closely with government departments to deliver the solution that best fits their need.

We are also routinely acknowledged for our Public Sector deliveries including awards for our deliveries to Disclosure Scotland, NHS and the DVSA, in addition to being named AWS Public Sector Partner of the Year, and finalist in the Microsoft Partner of the year programme.
