

Windows 10 The Beginning Of A New Generation

Windows 10 can be seen as the next generation of a new os (operating system) that enables the user to be more creative. The windows 10 technical preview was generally made for business and enterprise users. Windows 10 is not just more familiar from a user's experience standpoint but is built to be of a friendlier interface with classy design with any users. Windows 10 business users were greatly put at heart when creating the platform for security identification and information protection features. They have also provided business with more choice in how quickly they adopt the latest innovation and they are ready to deliver their continuous improvement base on their customer feedback.

For enterprise users they have helped to reduce modern security threat, a security threat protector much more active than "[Norton Internet Security](#)" or "[Avast 9](#)". This has improve resistance to breach theft or phishing.

Windows 10 will be pricing just as it formal or latter version that is the windows 8, and it will be costing at \$119 for home and for the pro version \$199. For those users who decide to move from the home version to pro version it will be costing \$99.

The major differences between windows 8.1 and windows 10 are quickly listed below

- **Charms bar**

- Notification

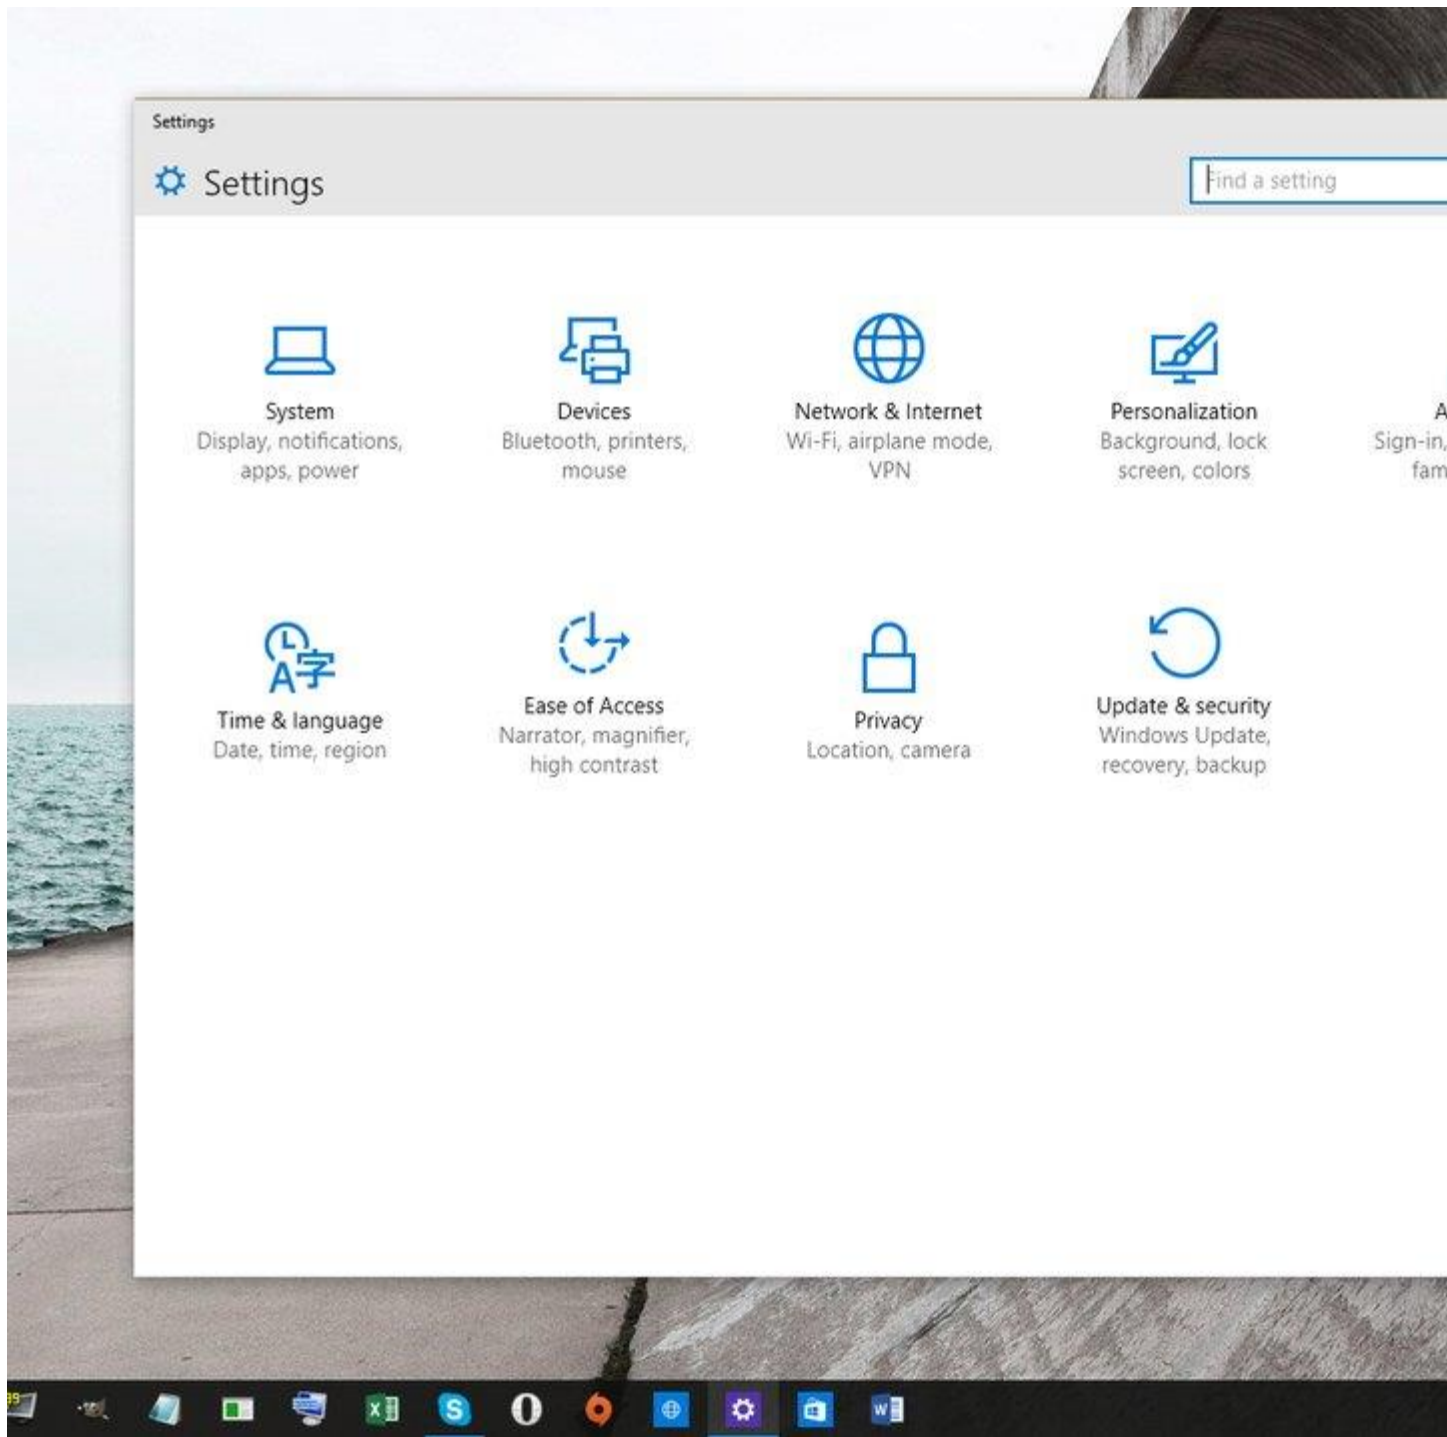

- The windows start screen

- Cortana

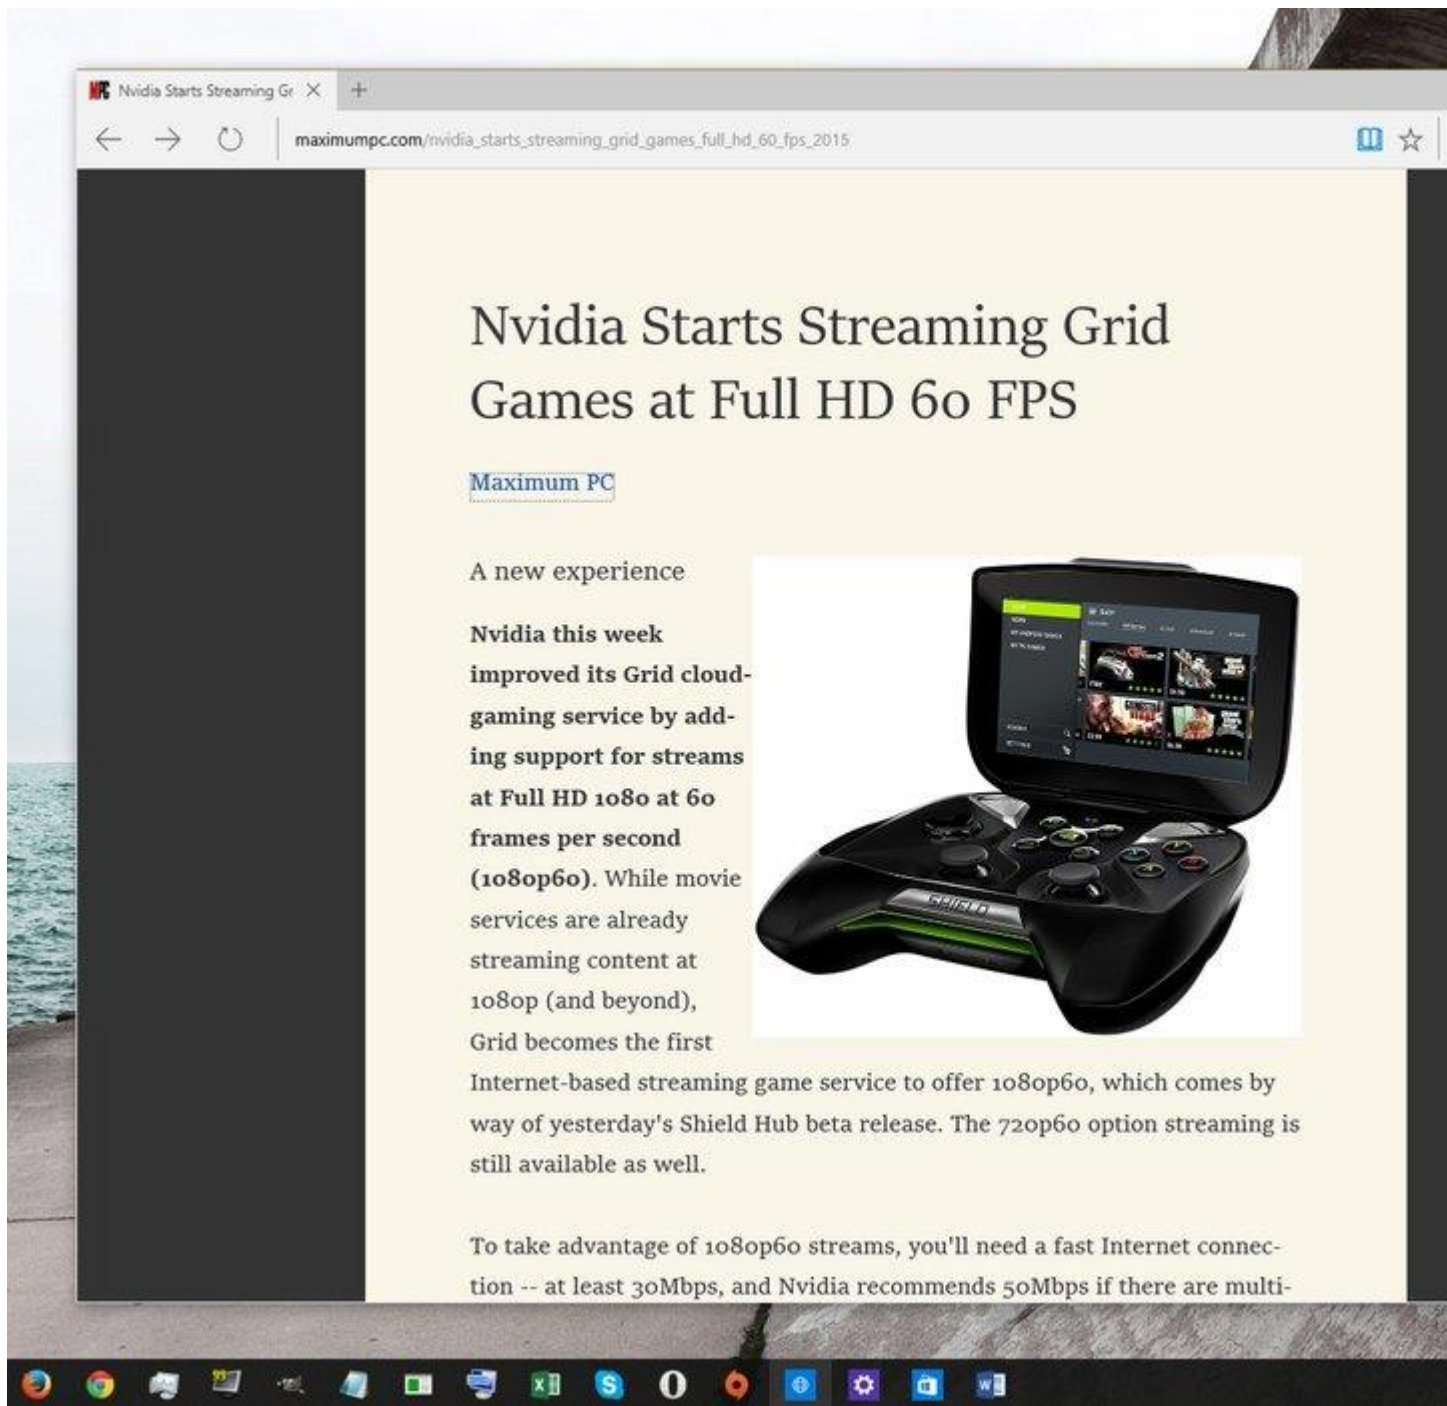

- **Setting:**

- Virtual desktop

- Project Spartan also known as Microsoft edge

Am very sure if you are using the later version of windows that is windows 7 or lower while reading this you should be thinking of a way to [upgrade from windows 7 to windows 10](#) with immediate effect.
