Important questions on the Covid19 pandemic that people should ask

Is it even a real virus and where did it come from.?

Evidence of over 5000 genomic studies shows it is a real virus SARS-coV2 that causes a new respiratory disease called Covid19

Evidence shows SARS-coV2 came from a species of bat close to the Wuhan area over 50 years ago and spread to Pangolins

Evidence shows it was naturally derived, impossible to have been created in a lab and crossed to humans in 2019 around Wuhan

How did China and the World health organisation respond.?

Many accounts show the CCP did try to hide the situation for 4 to 6 months then downplayed it the World health organization

After 4 decades of negligent practise of wet markets and farms the Chinese created the illusion they did a great job stopping the virus

Evidence shows the World health organization gave out questionable and confusing information downplaying the situation further, then created a campagne against racism and stigma whilst further praising China for their transparency throughout the outbreak

How did the worlds governments respond.?

Many authoritarian implementations and new laws have been put into place under the guise of public health and safety

All of the governments and big corporations still allowed to be open vowed to implement all WHO social distancing and lockdown guidelines which were all based on Kurt Lewin's models, who was an ex Nazi scientist who pioneered the field of social, organizational, and applied psychology which have been condemed and disproved as harmful by many doctors, scientists and professionals

The government set up a furlough plans to protect employed people for 3 months so they can stay at home and stop the virus spread

The PM missed many early important meetings, reacted to the problem very slowly and without urgency or transparency

How did health departments, epidemiologists, scientists, hospitals and morgues respond

The Imperial college London which received £80 million from the Gates foundation, Led by Dr Ferguson used the "flawed" SIR epidemiology models which are mathematical models based on 100% of the population getting the disease, when only 0.006% of the worlds population or 0.6% of the UK population did, only 3600 people under the age of 60 have died in the whole world from the virus

All usual operations and treatments were cancelled to stop hospitals overflowing, but remained empty the whole time at huge costs

All breathing releated deaths were assumed and marked down as a Covid19 deaths and no autopsy's happened on any of the victims

How did the banks and corporations respond.?

The central banks, corporations and governments purposely overestimated the amount needed which was £700 billion in 3 months

Many huge corporations, banks and people will exploit voids left by all the small businesses shutting down due to the pandemic

Many people through corporate ad's flocked to buy pharmaceuticals, cleaning products, toiletries and non perishable foods

Could the worlds governments prevented the virus earlier and/or more effectively.?

Absolutely, too much evidence, accounts, information and satellite imaging is proof they all could have easily. You only have to look at Taiwan who closed all borders within 48 hours, announced of the dangers on live TV and in the end only had a total of 7 deaths

No warnings, plans of action to try to prevent, no healthy eating tips, no information on what the virus is and no closing of borders

How did the media and social media websites respond.?

More confusing information, an explosion of conspiracy theories and false news hit the social media and mainstream media sites

Then a huge crackdown on all outlets of information happened, accounts and videos deleted and an official narrative was implemented

The media has proceded to create lots of fear, more wrong or conflicting information on one day then totally the opposite on another

A massive divide of those who believe and those who do not believe anything the media says becomes even more polarizing

How did the people and communities respond.?

After the media divide many polarizing arguements occured amongst family and friends over sources of information and those who believe in the official narrative and those who dont which has caused yet more divide in many communities across the world

Those who believe in the official narrative fell into line of virtue signalling practises such as clapping for the NHS or painting rainbows

Those who do not try to spread transparent information, some conspiracy, but some very true. These people are ostracized

Final thesis conclusion on the Covid19 pandemic

Evidence of over 5000 genomic studies shows it is a real virus that causes a new respiratory disease called Covid19

Evidence shows SARS-coV2 came from a species of bat close to the Wuhan area over 50 years ago and spread to Pangolins

Evidence shows it was naturally derived, impossible to have been created in a lab and crossed to humans in Sept 2019 around Wuhan

Many accounts show the CCP did try to hide the situation for 3 months then downplayed it the World health organization

Evidence shows the World health organization gave out questionable and confusing information downplaying the situation further

The corporations, central banks and governments purposely overestimated the amount needed and purposely delayed action

Many authoritarian implementations and new laws have been put into place under the guise of public health and safety

Many huge corporations, banks and people will exploit voids left by all the small businesses shutting down due to the pandemic

The science

It derived naturally from bats to pangolins in the Wuhan area, has been around for a long but unknown time and was caused through 32 Years of neglectful, imprudent top down authoritarian government and their wildlife protection law of 1987 allowing for poor standards and the mixing, sale of fish, insects, farm and wild animals altogether, eventually put the worlds health standards and trade in a dire situation. I suspect it has been around for a long time having found epidemiological and Serological evidence linking SARS-coV2 to a certain area of China and certain horseshoe bats. There has also been many polymerase chain reaction tests, antibody tests of blood samples, the virus's ability to infect human lung cells in a petri dish and researchers have published more than 5000 full genomic sequence tests of the virus showing that samples around the world appear to "share a common ancestor," There is also evidence of thousands of other different types of coronaviruses. Current diagnostic tests, which rely on the amplification of viral gene sequences by PCR or on the detection of viral proteins as well as genetic (RNA) material, can also be found in exosomes toxin-combating mechanisms that are produced naturally in all of our bodies in response to a lot of different stimuli, including illness, injury and stress induced by fear, so they are testing for the RNA sequence not the virus as the RT-PCR of COVID 19 has never tested against gold standard.

Not long after the SARS-CoV-2 outbreak began, scientists were saying that they discovered that the viral "spike" protein which has a functional polybasic (furin) cleavage site at the S1-S2 boundary through the insertion of 12 nucleotides led to the predicted acquisition of three O-linked glycans around the site binds to a receptor on human cells known as angiotensin-converting enzyme 2 (ACE2). Another human protein, an enzyme called TMPRSS2, helps to activate the coronavirus spike protein, to allow for cell entry via Ribosome which use genetic information from the virus to make viral proteins. The combined binding and activation allows the virus to get into host cells. So it is an environmental contamination as the route of transmission. The coronavirus measures around 125 nanometers and consists of 30 genes (humans have 20,000) and can be seen under an electron microscope. Both COVID-19 and the flu (influenza) can cause pneumonia, and ARDS, acute respiratory distress syndrome.

The outbreak

The illusion created by a false trail of information even fooled me at first that from the reaction of the Chinese it was purposely done by the Chinese communist party. Although the way in which China and the world health organization, all the health advisors for all the governments, the major corporations and those with any form of authority concerned with healthcare really helped construct the illusion that they had made really poor decisions at the most vital times which created an incredible effect of the need to and justification of, to close all public areas fast, create a pandemic and halt the economy practically placing it into a command economy, whilst leaving the borders open which allowed thousands of people to enter daily by which time, a world pandemic had still not been declared and health recommendations from individual countries such as the HCID in the UK didn't consider COVID 19 to be a high consequence infectious disease adding to the sense of non urgency. The death stats throughout were being manipulated and artificially biased upwards to the extent of being declared a pandemic and to the extent that anyone expiring from any lung-related condition is being counted as having died from the effect of COVID 19 so "most" not "all" people around the world are dying "with" not "of" the virus, whilst also correlating and possibly adding usual annual death rates and there are also many people dying as a result of not getting the treatment for the diseases they usually receive from the health care system as all effort is being placed on tackling the pandemic and which will have many knock on effects for years to come with illness, mental health, financial and physically which is negligence and/or obviously planned.

The pandemic

The worlds leaders who were embroiled in their own affairs, portrayed a tone of naivety whilst holding the belief the situation was under the control of the world health organization and China. They poorly reacted slowly to the situation sparking food panic buying and fear amongst the people of the world, whilst some leaders profited during the pandemic. Outlandish Fake news, comedy memes, propaganda and lies were purposely spread and allowed amongst the mainstream social media to help "discredit any future" non mainstream media news and forge a non sense of urgency or need for action amongst the worlds people until Mid March, which moved into purging and deleting anything on the internet not from the mainstream media. It then became a massive add campaign filtered through the pushing of fake science and fake information that is pushed everywhere that claims to be a recurring mutating virus which could lead to an infinite revenue stream. It seems that the UK, US and other governments purposely delayed action for 3 months, over estimated costs and issued authoritarian laws that could remain for some time and even some aspects remain permanent, such as the Coronavirus bill. Everything shut down, destroying some small business, people on low wages and those relying on cash payments, also prompting a detest for non digital money. Then the governments moved towards borrowing, issuing and contracting the very maximum amount of money from the central banks with hint that modern monetary theory will save the economy but like all previous quantitative easing the liquidity never actually makes it into the real economy but rather just sits on the asset sheets of the big financial corporations being bailed out. They improved hospitals and even built new temporary hospitals at huge costs, but all across the country there will be hundreds of empty beds and just a small few patients taking them, with example's such as the Excell London with 4000 beds which only treated 41 patients whilst the government is paying the private sector £3.4 million per day just on empty beds, deliveries of PPE and other protective clothing missed or not delivered causing more problems down the line. The media is constantly flooded with virtue signaling practices, people looking to political point score using community and emotionally tied institutions such as the NHS as their weapon, old political grievances and ways to exploit those they dont like are amongst many tactics used to discredit anyone against their political views. Social distancing, ban on group gatherings or being around people and leaving your home apart from essentials for an unknown amount of time is gradually implemented until Epidemiologists can start testing everyone. The cartel of Pharmaceutical, energy, food and cleaning product corporations were always ready to generate £billions in revenue even if the people were not. A global governance network is rapidly becoming a reality facilitated and set up by the world economic forum where automation is replacing human jobs, digital then crypto currency replacing fiat money, using more artificial intelligence, less freedom of speech, transparency or local political action as everything is being globalised and its all being hidden under the global action plan to fight Covid19.

Conclusion

Its private sector tyranny helped by those in government, where an accident which was mishandled turned into a campaign and/or was pre planned to scare enough people in the world to push for a vaccine for all humans and not just once, annually. The Event 201 was the "Soft test", what we are experiencing right now is the "Beta test" and when medicines or a vaccine is available that will become the "Final phase" of the campaign to generate £billions for a select few corporations. Its also the time when all humans will be added to a biological database, receive immunity passports based on health status, receive personalized drugs instead of generic for all drugs and it will all be hosted via the blockchain accessed by mobile phones. Which has all been setup, planned and controlled by the major corporations who will be generating £Billions in revenue from this event.

Scientific evidence of the existence of SARS coV2 which causes the disease Covid19

Evidence the SARS coV2 novel virus that causes a new respiratory disease called Covid19

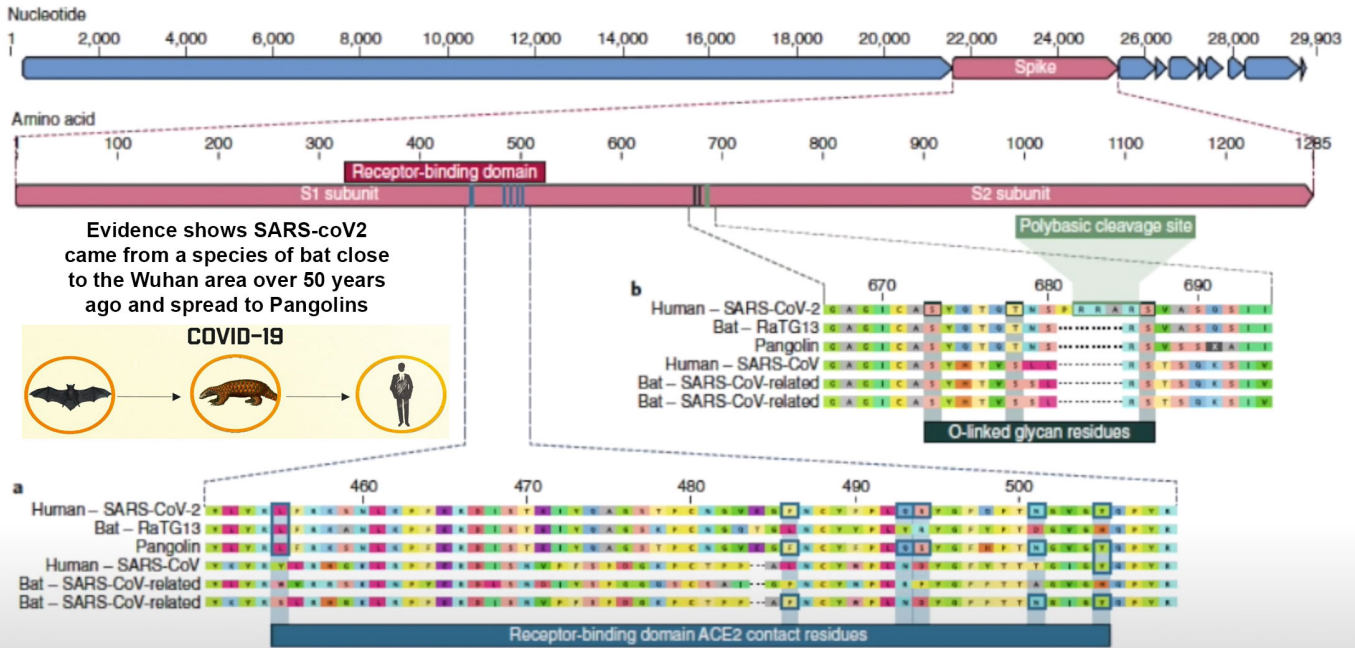

Fig. 1 | Features of the spike protein in human SARS-CoV-2 and related coronaviruses. **a**, Mutations in contact residues of the SARS-CoV-2 spike protein. The spike protein of SARS-CoV-2 (red bar at top) was aligned against the most closely related SARS-CoV-like coronaviruses and SARS-CoV itself. Key residues in the spike protein that make contact to the ACE2 receptor are marked with blue boxes in both SARS-CoV-2 and related viruses, including SARS-CoV (Urbani strain). **b**, Acquisition of polybasic cleavage site and O-linked glycans. Both the polybasic cleavage site and the three adjacent predicted O-linked glycans are unique to SARS-CoV-2 and were not previously seen in lineage B betacoronaviruses. Sequences shown are from NCBI GenBank, accession codes MN908947, MN996532, AY278741, KY417146 and MK211376. The pangolin coronavirus sequences are a consensus generated from SRR10168377 and

This evidence for natural evolution was supported by data on SARS-CoV-2's backbone -- its overall molecular structure. If someone were seeking to engineer a new coronavirus as a pathogen, they would have constructed it from the backbone of a virus known to cause illness. But the scientists found that the SARS-CoV-2 backbone differed substantially from those of already known coronaviruses and mostly resembled related viruses found in bats and pangolins.

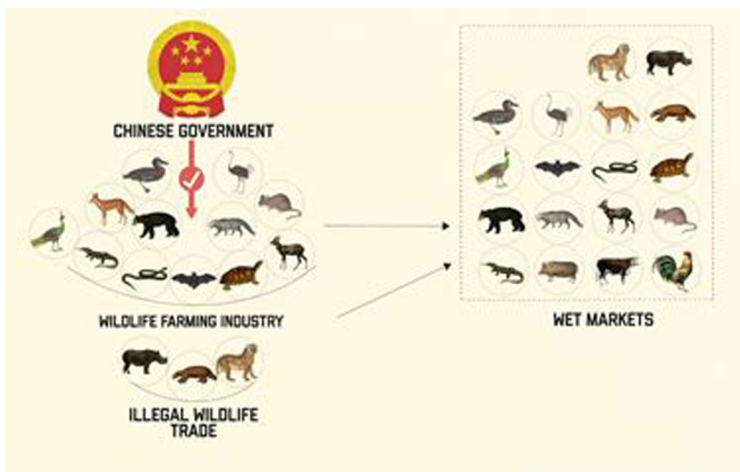

"These two features of the virus, the mutations in the RBD portion of the spike protein and its distinct backbone, rules out laboratory manipulation as a potential origin for SARS-CoV-2" said Andersen.

Evidence shows it was naturally derived, impossible to have been created in a lab and crossed to humans in Sept 2020 around Wuhan

Evidence shows the SARS coV2 that causes Covid19 does not mach anything being studied in the Virology lab 4 in Wuhan or the CDC

The Chinese communist party's 1987 wildlife protection act was highly negligent and a time bomb waiting to happen

Evidence and discoveries as far back as 2007 was warning of the dangers of these viruses spreading

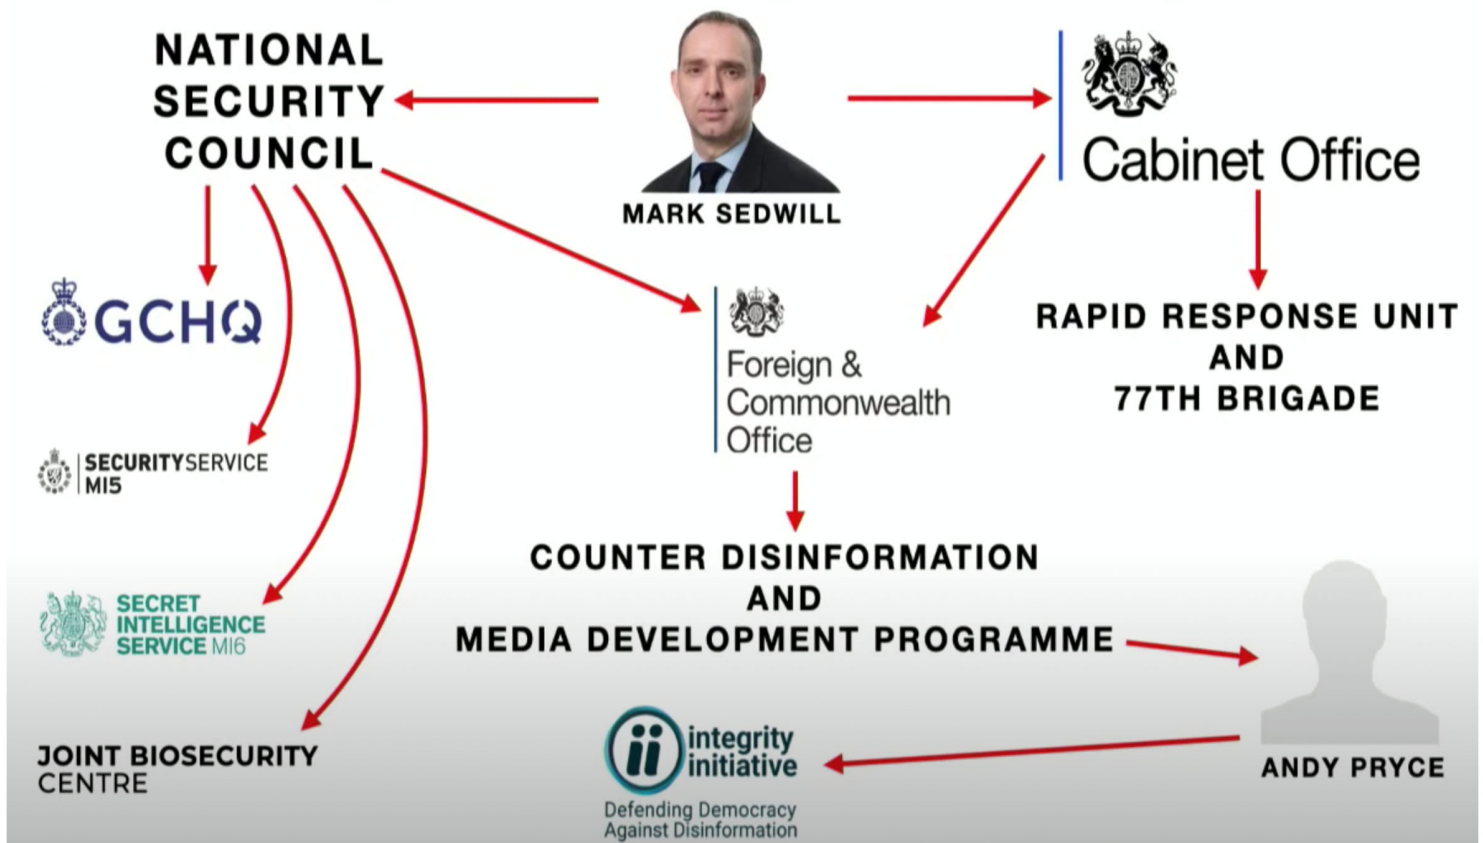

testing antivirals or immunization (Table 10). The Koch's postulates for SARS-CoV as a causative agent of SARS were fulfilled with a primate model using cynomolgus macaques (*Macaca fascicularis*), which demonstrated clinical and pathological features with some similarities to those found in humans (182). On the contrary, African green monkeys (*Cercopithecus aethiops*) did not develop significant lung pathology after inoculation with the SARS-CoV. The lack of consistency in primate animal models of rhesus, cynomolgus, and African green monkeys for experimental SARS was noted in another study (239). Moreover, these large mammals are expensive and difficult to handle. BALB/c mice demonstrated asymptomatic or mild infections in lungs and nasal turbinates by intranasal inoculation, which was not significantly different from the findings with inoculation of immunological Th1-biased C57BL/6 mice (105). BALB/c mice that were 12 to 14 months old developed symptomatic pneumonia, which correlated with the age-related susceptibility to acute SARS in humans (287). As expected, STAT-1 knockout-immunodeficient mice had fatal and disseminated disease (143). Transgenic mice expressing human ACE2 receptors also developed fatal disease, with extrapulmonary dissemination to many organs including the brain (240, 337). It is interesting that mouse-adapted SARS-

SHOULD WE BE READY FOR THE REEMERGENCE OF SARS?

The medical and scientific community demonstrated marvelous efforts in the understanding and control of SARS within a short time, as evident by over 4,000 publications available online. Despite these achievements, gaps still exist in terms of the molecular basis of the physical stability and transmissibility of this virus, the molecular and immunological basis of disease pathogenesis in humans, screening tests for early or cryptic SARS cases, foolproof infection control procedures for patient care, effective antivirals or antiviral combinations, the usefulness of immunomodulatory agents for late presenters, an effective vaccine with no immune enhancement, and the immediate animal host that transmitted the virus to caged civets in the market at the beginning of the epidemic. Coronaviruses are well known to undergo genetic recombination (375), which may lead to new genotypes and outbreaks. The presence of a large reservoir of SARS-CoV-like viruses in horseshoe bats, together with the culture of eating exotic mammals in southern China, is a time bomb. The possibility of the reemergence of SARS and other novel viruses from animals or laboratories and therefore the need for preparedness should not be ignored.

Corruption

Its private sector tyranny and corruption helped by those in government, civil servants and big corporations, where an accident which was mishandled turned into a campaign and/or was pre planned to scare enough people in the world to push for a vaccine for all humans and not just once, annually. A command economy was enforced and its also led to a push for all humans to be added to a biological database, receive immunity passports based on health status, receive personalized drugs instead of generic for all drugs and it will all be hosted via the blockchain, digital money and control of the 5G network. Which has all been setup, planned and controlled by the major corporations who will be generating £Billions in revenue, but more importantly control the monopoly for the future as we go into the 4th industrial age

After spending the best part of 10 years funding, donating and setting up various charities, providing over £13.5 billion just on companies aimed at producing vaccines. He has created a net of institutions ready to fight an inevitable outbreak posed by the many negligent Chinese studies of bats mixed with the negligent practises of the wet markets. Bill poked at it for the last decade knowing full well of its financial outcomes, he financed media to help create the pandemic and now is the hero to save the world

HAPPYTALISM

Happytalism
Happytalism is a new economic paradigm which places happiness, well-being, and freedom at the center of human development models, systems, and all life.

UNIDOHappiness
The United Nations International Day of Happiness (UNIDOHappiness) recognizes happiness as a fundamental human right and goal, and is celebrated every March 20, forever.

UN Global Goals
Advancing a new economic paradigm of happytalism for humanity means mobilizing \$30 trillion toward achieving the 17 UN Global Goals, 169 targets by 2030. Join us.

I wanted to talk about the virus, share information, learn and teach people. I feel after almost 6 months of research I have a concrete case that could withstand the sand of time, but I would always be open to changing my conclusion when ever new data, evidence and information arises.

I have tried to keep it factual, provide evidence, links and information supporting my claims. I have tried my best to keep my emotions out and to not add false information or beliefs because they sound nice or it might please my social circle. Im not here to sell T-shirts, con people out of money, gatekeep information, incite hatred or try to have any negative impact on people's lives, nor am I an enemy of the state, I'm here to share truth and expose corruption.
