

# We're Discussing About Minecraft

One of the most successful games in the past few years is also one of the most bizarre titles. We're talking about Minecraft Sandbox, the game that blends different genres and has created a fury among the millions of gamers around the world, eager to build their own worlds.

## Crafting as a way of life

This game is also available on other platforms apart from Windows which includes Android, iOS, Mac, Linux, and Mac. It comes with graphics that are notable for their huge pixels. The LEGO-inspired blocks can help us build our own reality.

## Unlimitless imagination

One of the greatest features of this game, is the ability to create the world you want. You can use the various construction blocks and materials available to construct castles, cities or fortresses, unimaginable structures and whatever else you want to build in your own world.

## Main features

This game has a number of options that you can utilize to alter the result.

Create your own virtual world with building blocks and only restricted by the laws of Physics.

- Survive the night creatures using your own sword and armor. When mundo is blogging

Independent game that blends different genres like action and adventure, platform and building. Complete 'Sandbox' editor to create your own scenarios with cubes similar to LEGO blocks.

- Create buildings, mountains, forests, etc. It also has a multiplayer mode. Five game modes with different levels of difficulty: Creative, Survival Adventure, Spectator, and Hardcore

## Choose the way you'd like to play

You'll be able to choose among different difficulty levels that make the game evolve differently based on each case, in which we must carry out specific actions or other. You can pick between a more action-oriented setting or one that is more relaxed and where the only goal is to construct and explore.

Survival: You must acquire resources that will ensure that you are alive. Get hold of food and take care of your health. Explore and be creative: build and create. You don't need to worry about survival. Hardcore Survival mode: In survival mode, you are able to die and come back as many times as necessary. This is not the situation. You only have one chance to live, so take care of it. Spectator: This option allows you to explore other worlds, but it is not possible to interact with them. You can also see them from the perspective of other creatures as well as gamers. Adventure is the game mode for those who don't care about the online version. You must face off against dangers, explore and various other actions, but there are certain conditions such as breaking blocks, but only with the appropriate tools.

Modify the game to your liking

Another great advantage of this game and one that its players appreciate is the option to customize it. Mods and skins allow you to personalize your character and game, making it more personal.

It was only one the most popular indie games of all time... and we believe that's because Microsoft purchased it from Mojang the company that developed it for around 2 million dollars, so it's now managed by the team at Redmond. It was not possible to download Minecraft free in the past the update, now it's even easier. You can download the Minecraft demo.
