

## THE 99 ONI/omni-Deal

Precursor: I wanted to give this to you in person but since my visit at the Trump Tower didn't go accordingly, I'm going to give it to you this way for all to see.

For Starters, I will begin by stating that Israel tricked the United States into re-igniting a war with Syria, a week after you declared that you were looking to pull all U.S. troops from the Middle East.

Without further ado, I consolidated 8 years of being a political advisor into this package deal that I deem the "ONI/Omni-Deal"

### 1)Securing of Precious Metals

China and Russia are waging a precious metal war against the US by buying up precious metals en masse for the potential future where the US Petro-dollar ceases to exist. This is offset by the environmental strain the use of petrol has done on the entire planet. There is a good enough cause to believe the dollar will not be backed by petrol in the way distant future, so it's in the USA's best interest to secure as much precious metal as possible.

\*\*\*This would also increase the value of Gold and Silver the world over

But if there is to be a future with Petrol, this leads me into my second deal

## 2) SPACE X - Developed Ozone Cleaner

Sub contract Elon Musk and his company to research and develop a drone like mechanism capable of filtering the ozone layer by converting green house gasses and the burning of fossil fuels into oxygen.

{The US Government can re-sub contract Space X to be an environmental safe-guard subsidiary to research and develop technologies to protect the environment and atmosphere}

{This indirectly subsidizes the coal mining industry and adds environmental protection to the farming industry}

## 3) Planting of a 1,000,000,000 Trees

This would only add to quell the accumulative carbon foot-print of the US. For every person 3 trees should be planted to offset the carbon footprint of a US Citizen.

The Singularity of such a movement will also resonate with the quantum fabric of mother nature, which will resonate into every crevice of life which should trigger a surge of environmental harmony.

Sanctuary cities should accommodate a green terraformation to offset the accumulative pollution a city produces.

## 4) The Preservation and the Restoration of the Environment Initiative

We need to lead the shift to restore and preserve the environment for future generations to come regardless of senate debate. We cannot risk to leave the future of our environment to a gamble when our climate is showing tell tale signs that something is considerably awry with the planet.

#### 5)Aid to Venezuela

The economic crisis in Venezuela will only have negative reverberations within the South American continent, only perpetuating a wave of criminality which will cause an influx of illegal aliens trying to cross the Mexican border and into the US. It's in the US best interests to aid the Crisis in Venezuela to create positive stimulus within the continent.

Right now Venezuela is a crumbling socialist society in charge by a corrupt government with close ties to many drug trafficking organizations. The Venezuela economy is worthless because of the lack of prospects of its future.

If the citizens of Venezuela were to clean up their country, with a little bit of foreign aid, they will be able to salvage and reaffirm its future prospects.

The citizens need to organize and rebuild their country and achieving self sufficiency is a must. If the US were to provide food and agricultural aid to Venezuela, that should offset any famine or malnourishment that is perpetually sweeping the nation. With a focus in farming and public vitality, the Venezuelan populace will be able to salvage their crisis and in a few business periods they can potentially be in the green.

\$250,000,000 in aid to stimulate Venezuela's farming industry will be enough to save their country.

And with the nutritional crisis quelled, the people of Venezuela can focus in on education and infrastructure upgrades which will all have a positive stimulus that should spark-plug and jumpstart their economy again.

#### 6) Crackdown/Dissolution of ALEC, The American Legislative Exchange Council

A worker for ALEC leaked recently that the Chinese government have compromised the organization and are using it as a trojan horse to lobby politicians to tailor make laws all for the net benefit of China.

Over the summer ALEC supposedly had a meeting called NWO, harkening to a New World Order and a 7 year plan for America. Most of the proposals mentioned at this meeting were in regards to destroying Americas manufacturing industry to bolster China's manufacturing industry.

ALEC got 200 bills passed in the senate this year alone, and are only going to increase in permeance through the backdoor funding of Chinese foreign nationals "aggressively investing" on behalf of the Chinese Government.

#### 7) North Korea Redux

North Korea reunifying with South Korea is a blessing on top of another blessing. The country of North Korea is the missing puzzle piece in regards to my next plan. On top of such, the US can learn a great deal from the North Koreans and vice versa that can only have a net benefit for both countries. Once both Koreas unite again, a dismantling of the Korean DMZ that separates both countries should enact, although that would have complications over all the land-mines in place. Regardless, as a gift of the successful of the dismantling of the Korean DMZ, North Korea should get a nuke as a present from the west.

## 8)The EU- Merkel Flip

The failed leadership of Angela Merkel has had negative impact in the entire continent of the EU.

We have more European countries that oppose Merkel and are tired of the totalitarian grip Merkel has on the EU as she runs the entirety of the Europe into the ground because of her engrossed negligence and incompetence. The following list of countries that oppose Merkels EU admin is only growing by the day and so far we have:

-Britain

-Italy

-Poland

-Hungary

-Greece

-Spain

-Croatia

-Slovenia

-Scotland

-France

The reason I point this out is to help realize into fruition this Merkel- Flip. There are more countries in the EU that oppose Merkel and Germany than there are allied. Its in Merkels best interest to play ball with the interest's of the European populace or face negative consequences for the German populace, the German economy and a future dissolution of the EU in the not so distant future.

The European people want to see the invasion of their countries fully ceased and no more warped and violent refugees coming to invade the EU.

So its either Merkel adopts right wing views and becomes a centrist or face a drop in the value of the euro, a recession in Germany and negative consequences for the entire region for generations to come.

#### 9)The US Trade-Alliance

A joint pact between the US and its closest Allies to ensure future prosperity for generations to come. A spiritual successor to both NAFTA and the UN without all the complications.

Those included in the pact:

- Britain
- Japan
- Italy
- Australia
- Korea
- Canada
- Spain
- Greece
- Russia
- Uncucked France

As time goes on the list should grow as more countries join the alliance.

## 10) Pacific Outer-Rim Trade Deal

This deal is going to neutralize and contain the rogue country of China and cull its expansion and growth. Its a trade deal between the US and every country bordering and neighboring China which will create a trade loop around the country.

With a new and fortified Alliance, we have Japan and Korea as the key cornerstones of this Outer-Rim trade deal and if China were to impose on the trade deal, their would be a negative drawback for China's shipping industries and trade. Thus collapsing the value of the yuan.

If China tries to impose on the United States or the trade pact, all we would have to do is pull out Japan and North Korea to engulf the entire continent of Asia in chaos, with China at the biggest loss for every Asian countries net-gain.

Leaving China with one option, to fairly and legitimately trade with the US without stealing our IPs and tunneling trillions through criminality out of the States while bullying other Asian countries in the Pacific.

## 11) Crackdown on IRS Fraud

Between 2012 and 2016 39,000,000 Social Security numbers were stolen and used by illegal aliens in the USA to secure employment and business opportunity. Illegal aliens are getting savvier with their criminality by the year and its only going to continue and get worse without aggressive initiatives in play to ensure identity fraud doesn't happen in this country.

Identity fraud is a matter of national security as you have foreign nationals here committing billions to trillions of dollars worth of tax fraud each year. Money that gets tunneled outside of this country, which allots to lost allocated resources and funding and higher taxes for everyone to offset the lost funds on both a state and federal level.

11) Abolish the Federal Reserve

12) Block-chain SSN

Block-chain ledger technology should be attached and implemented to a SSN will ensure that generational long Americans have more sovereign power than a foreign national who just became a citizen. Citizens that come from generational long families should have more rights and benefits in the state of the country than a person who just immigrated here. Attaching a persons benefits to a block-chain ledger will accommodate the citizens whose bloodline has already paid and worked into the system. Ensuring that the USA remains a country for Americans for generations to come. A 3rd generation American should be entitled to receive more aid and benefits than a first generation American in the same situation. A 3rd generation citizens vote should have more voting power than a 1st generation citizen who would only vote for their best interests.

13) Rebirth of Government PSA's

Animated shorts funded by the state can ignite and inspire a new generation to be concerned over such issues such as recycling and environmental protection or raise awareness on matters such as STD's or education, and anything in between. A PSA tailor made for kids to engage in sports and outdoor activities would be a huge success.

14) The Juliette Program

A series of changes and initiatives for female citizens over the age of 16+

Sleight changes and accommodations as exemplified below can have a positive shift for every woman.

-Diapers are tax deductible

- Purchase of Tampons can be used for a Tax Refund
- Moisturizer can be a 50% tax deductible for single women (encourages less use of make-up)
- Make-up being tax deductible by 30%

Wearing make-up is a trade off in itself, the chemical contained in such ages the wearers face faster only inhibiting its further use. Women tend to use it deliberately for social settings and whenever they do they end stimulating hundreds of dollars in transactions per use.

#### 15) NEET Grant

A grant for an unemployed citizen over the age of 18 not in school or training. A one time \$500 grant to a single, childless individual who have huge gaps in their work history and are in need of substantial sum to get back on there feet.

#### 16) Wildlife and Nature Preservation -Provisional

There should be extra accommodations made for wild life animal species. The loss of ecosystems will only have a negative impact that can chain into an ecological food chain crisis, and a food crisis for us. A species such as Bees going extinct would end up having negative consequences that are far reaching and deep from the microcosm off a lack of flowers not getting pollinated to a surge of price in honey astronomically high, and a series of other consequences that can be chain into very dire circumstances. The need to preserve wildlife and all of nature should be a maintained priority.

#### 17) Forgive 33.33333% of every student loan

That will jumpstart the economy and create consumer confidence the likes the country has ever seen before

18) Use the tariffs from Canada to subsidize every college and University and make it free

19) Higher Education Provision

A great deal of time is lost for the student while coming at the loss of allocated resources and funding to schools that have changed their curriculum accommodating useless classes that won't stimulate real world growth. There needs to be a complete restructuring of the entire curriculum the Board of Education espouses.

For starters, stop spending 8 years to teach about WW2 when all the details of those occurrences were by and large, over exaggerated in most circumstances, or completely fabricated in other

Cutting out the extensive WW2 curriculum as propagated by the BOE to allocate a student's time for more science and mathematics classes would only have positive recourse for the student, the entire school, and the entire future economy.

+Mix that with the formation of Space Force and a slew of other initiatives and you would have more students aspiring and successfully becoming doctors, scientists and engineers

20) Increase Teacher salary

There's a housing crisis for teachers in sanctuary cities. Most teachers are underpaid in comparison to the expensive cost of living espoused with living in a city. Teachers in general need a pay raise to accommodate the higher costs of living procured by corporate price gouging.

21) End educational funding for undocumented illegals made effective 2019

This is going to stop any future illegal entry and immigration into this country and to circumvent chain-immigration. Illegal aliens wont feel incentive in illegally entering the land anymore to harbor an offspring here at the expense of the system they never worked or paid into.

This can also resolve every schools budgeting as well.

If all Universities are to become free, its not fair for seats to classes to be taken up by unnaturalized entities and foreign nationals whose parents are undocumented and haven't paid or worked into the system.

This can also quell human trafficking into the United States since we remove a major selling point in wanting to enter the country and reside here illegally.

22)Operation: Yellowstone

Something needs to happen to Yellowstone which is overdue to erupt. Perhaps precise drilling into magma chambers to let out fumigating gas

23)S.T.A.R.S

SPECIAL TACTICS AND RESCUE SERVICE

A new organization that operates as a bridge between the CIA, The NSA, The FBI, The Pentagon, and The US Military. Its operation is to develop new tactics to thwart any security threat as well as to act as a buffer to circumvent the Deep-State and any collusion from abating foreign criminals

#### 24) Polaris

Give the coal mining industry and its respective unions a monopoly on solar energy. It will be up to them to hire the engineers to develop the technologies and equipment to implement a shift from fossil fuels and petrol to solar energy. Can offset the displaced unionized coal miners at some point in the future. They can be guaranteed another union working in the solar energy industry.

#### 25) The Reading Rainbow Initiative

Every child student at the age of 5 and at the age of 15 get a \$77 gift to Barnes and Nobles. The students that turn 15 will be encouraged to buy an SAT study course book a year early. A early offset \$144 devoted to each student, can see a difference of them making an additional \$1,000,000 or more in their lifetimes.

26) Increase ICE Budget by threatening to undercut funding to sanctuary cities for harboring and abating foreign criminals. That would increase ICE leverage and efficiency in Sanctuary cities without needing to increase their budget. But if that were to be the case, you can easily allocate funds from Sanctuary Cities to allocate to ICE

27) Co-joint the US Military and Pentagon to build the wall and call it a matter of national security. Nationals the world over use the South Border to sneak into the states.

Double the budget for the wall with promise of creating an incremental positive influence in all of South America. We can send more aid to regions that are in need and create incentives for countries to grow and prosper to develop industries as opposed to resorting to drug trafficking and the like

28) Give the Farming Industry a seasonal stimulus to offset the 2019 winter season which poses to cause systematic inflation and an increase in priced goods

29) Enact a Bill that operates as a kill-switch on automation. If the advancements of automation impede on the job sector too much then it should be levied and taxed considerably to the point there is no more incentive to undercut jobs by automating them.

30) Preservation of National Monument and Historic Relic Act

Forbids any state party from dismantling a piece of US and Federal US History on any pretenses.

In case of an emergency the state can claim eminent domain if the dismantling of US history calls for emergent accommodations. Can be contested in Supreme Court

31) Help Mexico fund a wall along their border to the south of Mexico.

A border on both sides of Mexico will stop the cartels from compromising the entire Mexican and South American economy.

32) Pledge of allocating just as much resources to build the wall to give in aid to South America.

33) BILL - Social media companies cannot tamper livelihoods that depend on their social media accounts. Accounts with a substantial amount of followers cannot be poised to be threatened to deleted. Posts that are too vulgar or inappropriate should be considered deleted or scrubbed.

34) BILL - Every Social Media company has to remain bipartisan on political issues. Social Media companies cannot tamper or undermine the social fabric of the country by censoring topics,

deleting accounts or rigging issues in favor of one political affiliation or another.

35)BILL - Social Media accounts cannot Censor any speech since it completely infringes and overrides the 1st amendment.

36)Cut funding to schools that discriminate whites or white males of funding

37)Israel is lobbying to pass a bill in the senate that makes it a federal crime to impose a boycott on the state of Israel at any case in the future. This is to circumvent any criticisms of the criminality and collusion agents working on behalf of the state of Israel does to conspire against the United States and its citizens. Its in the best interest to kill the bill, or accelerate the dissolution of the state of Israel.

38)Bill - Make it illegal for App Companies to gain access to a persons private information on their cell phones.

39)Bill - A person caught with Fentanyl will face life in prison.

Synthetic Heroin is being sold with the intent to destroy and wither away the fabric of America by foreign nationals. If a bill were to impose specifically targeting the drug, there will be a severe drop of usage of it.

40)Combating the Opioid Crisis

-Any person dealing with heavy drug abuse should be issued a license for medicinal marijuana

-Decriminalize the use of Marijuana medicinally Federally, but don't fully legalize it

-Make Drug Dealers caught with selling narcotics heavier then cocaine like opioids subject to capital punishment

41) Implement a Voter ID System

All to ensure corruption doesn't placate by people casting more ballots then they can by circulating around locations, and preventing Democrats from busing illegal aliens to vote.

<https://www.youtube.com/watch?v=jUDTcxIqqM0>

42) Journalists and media companies who deliberately publish falsified information or distort the truth for their bias are subject to federal prison time of 7 years and a fine of \$250,000

43) Prohibit gender-reassignment surgery for people under the age of 18.

44) Prohibit the use of gender reassignment therapy and the use of hormone blockers for people under the age of 18.

45) Ban foreign lobbying in every capacity

Prevents no governing bodies or entities from compromising our election through eliciting bribes and pay 2 play policies Hillary Clinton was famous for.

46) Bill, if a Citizen can prove a news story is indeed fabricated, the progenitor of the story will be fined by the FCC by \$250,000, and be subject to be disbarred and blacklisted from the world of excavating world of journalism.

47) Make it illegal for media organizations to tamper with statistics or facts for any reason. If a media cooperation is

caught by the public with publishing articles utilizing fabricated, false information and statistics they should face heavy penalties from the FCC.

48) Stricter Northern Borders Adjoining Canada.

All the refugees and migrants Canada takes in imposes a national security risk to the USA since the northern border isn't as secured.

49) End the Anchor Baby Policy

Foreign Nationals and several corrupt entrepreneurs utilize this policy to get a foot in the door at the expense of tax-paying citizens. Chinese Nationals have built businesses of smuggling pregnant Chinese women and keeping them in storage facilities all throughout the US, as they wait to give birth and getting a food in the door.

The anchor baby system is a legal loophole for a mass invasion of foreign country, and the system has been abused heavily by Chinese and nationals from South America who have cultivated a hive-mind to conquer the USA for their host country of origin.

50) Criminal probe into George Soros subsidiaries

Soros funded a nation wide protest that involved militias and pmcs last year to overthrow the government on Nov 4th, 2017. No one bothered to protest but the mere fact that Soros and his linked companies plotted to overthrow the US Government is a detail that shouldn't be glossed over. An event that was overlooked by the Trump Administration due to the fact that Trump was busy getting ready to tour in Asia as president for the first time. It was George Soros money that got several law enforcement agents killed within the 2014- timespan

The republican party doesn't have to live up to the stereotypical impression the entire party has. One that has no consideration for the environment and the like.

The Conservative Party can easily transition as the De Facto Party of the United States, making all other parties irrelevant in comparison and it can be easily done by adopting some more moderate views on subjects such as climate change and environmental protection. The conservative party can be the way of the future, as opposed to a party that's believed to be stuck in the past.

51)Wildlife Preservation Bill #2

Indigenous Species facing extinction cannot be hunted down or killed. The American Bald Eagle is an example of such an animal

52)Use Part of the Military Budget to Build the Wall if congress wants to block funding

53)Start an official Probe to drain the swamp by looking into looking at foreign agents, spies and plants that are within the government and the mainstream media that are colluding with foreign entities to compromise the country. Once enough evidence starts to compile, then issue a state of Emergency, and tap into Emergent Presidential Powers.

The probe into the swamp will compile enough evidence to declare a state of emergency to tap into Executive Powers on foreign

entities that and spies that are chipping away at the fabric of our country.

There is more than enough evidence sitting in peoples hard drives across the country to predicate that there is indeed a web of foreign agents that are colluding to undermine not only the president but the country itself for their host country of origins gain.

54) Declare a State of Emergency and tap into Emergent Presidential Powers. Blame that our foreign fiscal opponents have compromised the government from within the left and their is a secret network of collusion done by foreign entities to undermine the fabric of our country. Find evidence of MSM companies getting sponsored or funded by foreign entities, then pin it on the narrative that our enemies use bribes to maintain control over our country. There's a network of spies, and plants meant to compromise the fabric of our country.

We have substantial evidence that there are foreign entities that have compromised the fabric of our system, and until we pinpoint and find the culprits we should be under a state of emergency and tapping into emergent presidential powers, will give you the right to issue executive orders. With the power of issuing Executive Orders in play, and with almost limitless power that gives you more than enough leeway to drain the swamp, issue the border wall etc. and get everything done.

Heck you can declare emergency powers to declare a war against climate change, fake news, and the like. There's too many problems at hand for you NOT to declare a state of emergency. We have the Chinese at culprit for our Opioid crisis with them smuggling in fentanyl and opiates from China. We have the irregularities in our seasonal weather pattern track imposed by climate change to declare emergency on. We have the fake news media, and the spies, agents and organizations that are picking at the fabric of our government and country. Organizations owned by people such as George Soros have went as far as funding a

violent protest to remove the president and his administration from power.

Declare a state of emergency based off the pretenses of unknown foreign entities that are colluding to chip away our democracy, tap into executive powers, and direct an executive order demanding the wall be built, co-opting part in own by the Pentagon and the Military's budget. The Wall is a matter of national security to prevent and blockade foreign entities into smuggling into this country. Jihadists, cartel members, criminals, smugglers, spies, foreign agents, foreign plants and the like.

55) If a refugee or a person seeking asylum breaks the law they should be detained and deported

56) Make all Pyramid Schemes like Amway illegal

57) Crackdown on Illegal Sweatshops all throughout the country.

Foreign Nationals with enough capital run illegal sweatshops all throughout America, especially in places such as NYC, using undocumented foreigners as labor.

There are rows of illegal aliens, usually smuggled in through human trafficking, who work in harsh working conditions day in and day out.

58) Social Media companies caught censoring free speech because of a political bias should face heavy penalties by the FCC

59) Any politician that receives campaign aid from foreign investors should be automatically revoked from holding office. Hillary Clinton received hundreds of millions of dollars from foreign agents that were utilizing the donations as thinly

veiled bribes for her to enact policies that would favor the host country of origin the donation came from like Qatar

60) Make lobbying illegal

Companies and business shouldn't be able to buy their influence over an election which is essentially what lobbying is, a back end door for corporations to bribe politicians to enact policies in their favor.

61) Ban any media that promotes racial genocide.

Diversity is code word for inter universal cultural, racial, homeo-genetic genocide. Several media companies are complicit with targeting races in order to race-mix and dilute any cultural pool that exists within this country. Especially in regards to whites who are the majority demographic in America. You have minorities colluding with each other to ensure and bring about the complete genocide of the white race in America.

62) Start a probe looking into the implicit bias of the MSM in regards to colluding with foreign entities to undermine the fabric of our democracy and penalize them. There is countless amount of evidence of the MSM attempting to undermine the fabric of our country. Issue heavy penalties and fines, some harsh enough to outright dissolve said companies such as CNN and the NY Times, which are operated by religiously warped by conspirators and co-conspirators.

63) Any priest or religious clergy member caught abusing their positions to abuse kids should be dealt with capital punishment.

64) Anyone caught with the date-rate drug Rohypnol without the ability to verify its prescribed use should be given 10 years in prison.

65)An immigrant on a visa turned citizen caught committing white collared criminality should have their citizen status revoked and face deportation.

66)Government organizations and agents caught obstructing justice on behalf of a foreign entity should be dealt with capital punishment.

67)Block Israeli IPs from accessing United States websites.

Agents from Israel in the month of April, 2018 flooded the entire internet with propaganda to fan and sublimate in order to reach to the President to coerce him to bomb Syria and Iran, a week after the President declared that he was pulling all troops from the Middle East. They heavily targeted sites that could have been an interest to the President all to undermine and influence him. Then it was leaked that Bibi was caught saying that he is in control of Trump.

68)Reconsolidate NASA into the battery of SpaceForce and give it a budget increase and allocation since NASA is a wing under the military.

69) Create a new military sub sect dedicated to fighting climate change through technological development and implementation. If Space X is successful in developing an anti-greenhouse gas drone a continued sub contract with them to form the gnosis of this branch would be efficient.

70)Use the military to hunt down cartels in SA to help them clean up their countries from wide-spread corruption

71)A base on the moon by 2050

## 72) A Greenhouse Base on Mars and an Oasis by the end of the 21st Century

The USA should start looking in to building a base on Mars with the intent of discovering new ways of sustaining crop production in extra terrestrial environments. Extrapolating Mars would only lead to a resource of new breakthroughs and discoveries that would benefit us all in the long-term. Mars would also make a good template planet for Scientists to practice terraforming techniques on. With slight changes done now in regards to the planet, and throughout the course of the next millennium, there is a very good possibility that Mars can become capable of sustaining and harvesting life.

## 73) Detoxify the Oceans

The oceans have gotten to acidic with all the pollution in the environment, and all the extra activity in the earths core offset by urban environment-induced calamities. All this accumulative wear and tear is coming at a taxing toll in our oceans from the Atlantic to the Pacific.

There needs to be more of an aggressive stance done in order to preserve the PH Balance. Any sleight change in scale can trigger the loss of oceanic ecologies which can have chain-like consequences to every part of nature, that comes at a tax to our environmental food-chain and ecosystem, which brings about a slew of economic shifts that lead to systematic inflation.

## 74) Development of a bi-pedal drone capable of launching a nuclear warhead in seconds

## 75) Green and Smart Eco Renewal Plan

Too offset the accumulative footprint we need a complete overhaul restructuring of our entire infrastructure to accommodate and ensure our environments stability for generations to come. A trillion dollars allotted over the course of a decade offsetting several urban renewal smart and eco friendly plans at once. Technological systematic upgrades to our entire infrastructure utilizing augments with an adherence to

being eco-friendly and green-oriented. Solar Powered Magnetic Levitating Trains anyone?

The next 20 years should make the previous 100 years look like a thousand years ago in comparison.

#### 76)Real Estate and Housing Renewal Plan "The Trump Pledge"

The Federal Government should pledge \$1,000,000,000 to every state's urban renewal and housing budget for the next 10 years.

Most Banks give out mortgages if you have 5% cash down, this would help a potential buyer if they have 4% of a loan, an aid them with an additional 1% to secure the loan.

A house valued at a million would require \$50,000 cash as a down payment to secure a loan. With the The Trump Pledge, a buyer would need \$40,000, and save themselves time acquiring capital in a booming housing market.

#### 77)The Unrust Belt

Changing its name would be a good start, the name carries a negative connotation, incendiary to business. "The Green Belt"

#### 78)Eco-friendly Stimulus

Any home or business owner that renovates their home or property with environmental friendly augments can use it as a tax shelter for a year, giving home-owners and entrepreneurs incentive to go green.

79)Implement block chain technology to the housing market and appropriate mortgages in regards to the volatility of the market. If the area dips down, or if the market flips, the

mortgages raise or decreases to adjust to its comparable interest rate.

#### 80)Clean Air Act

An initiative to preserve and maintain quality breathing air. Cities dense with smog and pollution should take more aggressive efforts to quell emissions.

#### 81)Multi-Media Archive MACRO USB Edition

An official archive to storing and preserving the legacy of US multi-media in the digital era. The Smithsonian for modern technology, stemming from the first military Computer back in ww2, to Doom on Windows 95, cataloguing and preserving our every major breakthrough in computational and digital technology. An art gallery of influential and significant memes through-out the years on display.

#### 82)Detroit

Entice factories to come to Detroit by leasing away free land to them for 15 years. Gives them incentive to build factories out of speculation in the first 5 years, to do business for the following 10 years.

83)Women who have kids within a given tax cycle are exempt from paying any tax.

#### 84)Judgement on Silicon Valley

Silicon Valley attempts to abrupt the United States Government through various shell projects and ponzi schemes, foreign and in-house collusion. A lot of the ramifications of the entire ecosystem has had ramifications that's has affected every facet.

Many Silicon Valley companies are selling our country away to our fiscal competitors. Our identities, our likes, wants, desires, thoughts, musings, and turning into mathematical algorithms they retrofit with companies to target us with systematic ads to target, subvert and influence us.

It's in the interest of National Security to De-Monopolize Silicon Valley

85) Delimit the restrictions on Terraforming

Competing countries are advancing their technology of terraforming and building man-made off-land cities at a pace faster than us. The United States has to catch up in regards to these developing advancements and technologies.

86) Pull the U.S. military out of the Middle East

The campaign in the middle east region has been costly to the United States and is nonsensical to perpetuate

87) Killswitch on automation -

If the coming 4th industrial revolution imposes and disrupts the entire work force then there needs to be a law to cull or ban the excessive use of automation. Companies like Uber are developing their future fiscal strategies by culling their entire work force for automated technologies which can replace entire industries and impose to cause a crater of a million jobs left out of work.

Slight adjustments can offset and filter and reverse systematic inflation.

88) Increase Honey Production

Honey is an ingredient excessively used and increasing its production and supply will offset it to become cheaper. Through osmosis, companies that use honey as an ingredient will have an

incentive to lower costs on produce goods, slightly or ever so slightly. Increasing Honey production will lead to a spike in flower pollination that will only lead to more fruitful upcoming harvesting periods.

#### 89) Kill off Net Neutrality

It's a loaded bill being lobbied to impose strict regulations and censorship on the internet under the false pretense of being counter to unobstructed access. There are massive misinformation campaigns done to obstruct public opinion to keep everyone confused over the true implications of Net Neutrality which serves as a vehicle to police the internet while it advertises itself as the opposite.

#### 90) Development of the first city in the sky

#### 91) Terraform the Sonoran Desert

Cultivate it into a thriving Oasis. It will be a good experience for the United States government to learn about terraforming rugged climates for future terrestrial implementation.

92) Research and Development of technologies capable of producing crops in various environments, stimulating different conditions. From inside a space shuttle to a cavern made of ice. - These experiments will only percolate into different innovations and advancements in farming.

#### 93) NOAH'S ARK VER 2.0

Development of a space shuttle capable of relocating humanity to another planet in case Humanity is being threatened by a mass extinction level event.

#### 94) Elevator-Lift to Space

Its initial costs over time can be proven cost efficient as its sustained use will amount to a lot more advancement in becoming an intergalactic/ extra-terrestrial species.

95)Declassify the existence of Extra-terrestrial life

96)Hyper-Sigial Meta Monument - A monument that operates as a conduit to metaphysical energy.

97)Solar Ring- Dyson Sphere

An effort between the United States and Russia.

A ring in space that absorbs solar energy and redirects it back into the planet

\*A smaller effort should be made first as a prototype to a much bigger "Dyson Ring" and "Solar-loop"

98) The First Underwater City [Project Atlantis]

First foray into sustaining human life in oceanic ecological climates. For future terrestrial implementation.

99)Gaia Pact

A pact between all nations to preserve the ozone layer for future generation's. The world needs a more aggressive stance on the issue of climate change and initiatives need to be enacted in place now as the shift in global weather caused by climate change is offset by all the greenhouse gasses corroding our ozone layer and affecting our seasonal weather track.
