

Minecraft Game Server Hosting

It's an epic sandbox game about placing blocks and having fun!

1.18 Caves and Cliffs Part II Update now available!

Explore and survive in infinitely-generated landscapes of vast open terrain, with various biomes as well as dungeons, enemies and endless possibilities. You can explore the world without being directed which direction to take, construct amazing dirt mansions, or dig a hole in order to hide away from the mobs. Everything that happens is down to the player.

There are two main game modes. Survival is where you have to travel the world, find food, fight off enemies, and build a house. Creative is where you have unlimited resources and can build anything you can think of.

Mining can destroy almost every block in the world. Then, it's possible to combine them in crafting tables to create new blocks, armour and tools.

The Java Edition of Minecraft has a large modding community. You can also install lots of additional content onto your server. You can access more than 300 modpacks that you can install with just one click on our control panel. If one you want to play isn't on the list please let us know! We'll install it.

Don't play on the Java Edition? No problem! On Minecraft Java , we offer access to the Bedrock version of Minecraft so no matter which device you're using, we've got you!
