# The power of Shares

Shares are perfect for REVENUE SHARING and STAKING! They've always been used for revenue sharing IRL, which has been hitting hard in the #crypto ([https://twitter.com/hashtag/crypto?src=hashtag\\_click](https://twitter.com/hashtag/crypto?src=hashtag_click)) market (e.g: \$UNIBOT ([https://twitter.com/search?q=%24UNIBOT&src=hashtag\\_click](https://twitter.com/search?q=%24UNIBOT&src=hashtag_click))), and our platform also facilitates it. Our protocol also includes staking for projects that create shares.

## About us

We're used to seeing either tokens, or NFTs – but we have never seen shares in crypto (yet!) Basically, a project, company, community or influencer decides to launch, and sets a number of shares for their launch.

The IPO (like NFT minting) occurs, and then the shares go live!
