

## 4 Tips to help you Operate a Private Game Server

The process of setting up a private game server is easy, however managing it isn't as simple. These tips will assist you to get help setting up your server. You are passionate about the business and want it to be successful. Follow the steps below for keeping your server operating at all times. Continue reading to find out more.

### Slots for players

You can find a lot of servers, however not all of them are setup properly. Actually, the owners don't realize that their server isn't designed for a large number of users. Their computer can't handle many users simultaneously.

For instance, Minecraft makes use of the RAM of your computer to serve every user connected to your server. If you want to serve 200 players, your server must have enough RAM to allow players to play the games correctly. You don't need to invest a fortune in servers. A server with enough RAM can be bought for a few hundred more dollars.

### Internet connection

Some games require a blazing fast connection. Therefore, if you wish for those games to be played smoothly, we recommend that you have a faster internet connection. A slow internet connection can cause server lags and make it difficult to handle the many players. We recommend that you go for an internet connection of 10Mbps. This should be the upload speed. In contrast to this game, Minecraft can be run perfectly with just 0.5Mbps upload speed.

### Uptime

The uptime of your server is based on the fact that it's an open server. If you are going to set up the server for your family members or friends for instance, you do not need to keep it running constantly.

If you have a public server, make sure your server is always accessible. It is impossible to know when someone will connect to your server in order to play their preferred games. If your server is offline for longer than 24 hours, you'll lose users. Once a user fails to connect to your server, they will go to another server and never to come back again.

## Staff

How many moderators do you require to run your server 24 hours a day? In reality, the answer will depend on the number of users that connect to your server simultaneously. We suggest hiring additional staff when your server is used by a large amount of users. On the other hand when the server is not a public one, you don't need to employ a large staff.

If you're trying to set up an online gaming server on your own it is recommended to follow these steps. Remember that your server must be properly managed and accessible at all times especially when you're creating an online server.
