

Hello world,

Our team love and care on everything about writing, literature and language. Our team love also everything about technology, computing systems and the revolution that may come thru them. Our dream and challenge is the connection of Writing with Technology...and then the bridge. Blockchain computing. That's it, an epiphany!

And then.... **WRITER** created.

WRITER tokens created on Bitshares and will benefit from their existing ecosystem...for now, hope that may change later...

Purpose of WRITER is the creation of decentralized platform in which developers will develop and test applications, publications promote their projects, writers accept tasks and publish their work (books, poem collections, screenplays ect.) and individuals who need to have something written, whatever it is, fast, with professionalism, with low fees and airdrops in WRITER by a reward mechanism.

You will find us on bitshares.openledger.info/asset/WRITER and if you create an account on the DEX with this referral link bitshares.openledger.info?r=dolce-vita you'll get a reward. For the first 500 accounts registered by above referral link reward is 12.6 WRITER tokens and for the next 500 reward will be 6.21 WRITER's. Get in the game and enjoy trading.

Right now we are searching for partners and business associates to work together and build this bridge we dreamed of. Everyone and any participation is welcome!

We are interested in:

-  **Developers**
-  **Writers – Editors**
-  **Investors**
-  **Individuals need something from us and all above**

Thanks for your time.

Regards,

WRITER -- team
