Minecraft Tower Defense

While there are plenty of tower defense games on the market today but none are quite like Minecraft Tower Defense. This amazing browser games combines elements of the classic Minecraft game, together with simple and engaging tower defense strategies. With typical graphics that are pixelated Minecraft graphics the game is appealing and anyone who enjoys the original will find this tower defense version enjoyable!

To be prepared for the invading hordes to defend yourself, you need to first design a winding route to your defensive tower. After you've completed this, you can build a variety defensive towers and traps. They include egg throwing towers or water pools as well as archer towers. Your defensive network will protect your tower from creatures, and you will gain additional resources for each monster you dispatch. Online Servers Between each wave, upgrade your towers and traps to create additional defenses. How long will you be able to survive? How effective will your defense be?

Choose from a range of defensive towers and weapons - Create a complicated path to deceive your enemies - Try to survive as many waves as possible!

The game can be played on your web browser with Ruffle. Take a look at our Flash games to learn more.
