

OBD connector model chassis platform code built

Stand alone on this page the [models](#) which have [OBD connector](#) can expect (from about 1990).

Vehicle Connector Location / Access. Consistency of Location - The vehicle connector Shall Be located in the passenger compartment in the area bounded by the driver's end of the instrument panel to 300mm beyond the vehicle centerline, attached to the instrument panel and accessible from the driver's seat. The preferred location is between the steering column and the vehicle centerline. The vehicle connector Shall Be mounted to Facilitate mating and unmating.
