

Minecraft Gilded Blackstone How To Find Blackstone In Minecraft

Minecraft Blackstone is to Cobblestone the Batman is to Superman. That's to say, it's much cooler, edgier, and way more fashionable. It writes poetry in the margins of philosophy books, is annoyed by its parents because they don't get it and is always talking about the abyss or the death of our universe. This is basically what happens when you take Cobblestone and make it cool and, to tell the truth we're all here to support it.

Like all blocks in Minecraft the Blackstone block could be a great addition to any Minecraft homes you construct, or make for a particularly imposing Minecraft castle. Minecraft Blackstone was added in snapshot 20w15a from Java Edition 1.16, so it's a new type of block that's not available to all Minecraft players at this time.

We're sure you'd like to look trendy too So we thought we'd share some of the secrets about Blackstone with you. It's a prestigious club and we'll tell you how you can join. You can finally achieve your dream of owning an all black home on a hill that is all black with an all white desk. Here's everything you need to know regarding Minecraft Blackstone.

What is Minecraft Blackstone?

Blackstone is a particular kind of stone that is only found in the Nether. It is more difficult to locate than other stones, since you need to create a Nether portal to access it. But the benefit is that it is timeless, slimming and always back.

Where is Blackstone?

To locate this rare stone, you'll need to go to the Minecraft Nether. It can be found in Nether Wastes or from the Basalt Deltas biomes. Blackstone can be found as remnants of a bastion. However minecraft servers is more efficient to find them in the basalt deltas, their natural territory.

Basalt deltas are dangerous even though they sound great. Basalt deltas are considered to be among the most dangerous biomes in the Nether due to their uneven terrain, hard-to-find traps for lava and a large number of Ghasts.

You'll need to be very cautious when you make an adventure to find Blackstone. Otherwise, you might end with cooking yourself in your own armour and possibly losing a lot of items. It can be stressful so make sure you know everything you can about Blackstone.

Where can you find Gilded Blackstone in Minecraft?

Gilded Blackstone is also in the Nether however, it is found in Bastion Remnant structures and frequently near to Bastion chests. When mined, it will either drop a copy of its own or gold nuggets. If you have a pickaxe equipped with Silk Touch, Gilded Blackstone can be dropped on its own if you have a particular design in mind for your next project.

What are the possibilities with Minecraft Blackstone?

The good news is that Blackstone has many uses. The downside is that most of them are exactly the same as Cobblestone. Blackstone can be used to construct stone tools, but they will still look like regular stone tools. It is also possible to use it to repair tools, though it won't make any difference in the visuals of the item. It's a shame because it robs a lot of the potential to display, at least when it comes to practical items.

On the plus side, you can turn Blackstone into Slabs, Stairs, and even Walls. This means you can craft unique Blackstone creations, even the whole Blackstone Minecraft village if you can manage to build one. It's a simple aesthetic improvement however, let's face it this is kind of the same with a lot of the items in Minecraft, and lord help us, we keep on coming back.

And that's everything you must know about Minecraft Blackstone. You might be interested in knowing more about the Minecraft 1.18 update. [Click the link to learn more.](#)
