

# Minecraft Fan Makes Amazing Star Wars Build, Wins Contest

Minecraft builds are a large part of the group expertise in everyone's favourite game about punching down trees. There are numerous incredible issues to see, from the functional, like this YouTuber who turned Pac-Man right into a horror present, to the more conventional, like these stunning Civilisation VI cutscene replications. Whereas a lot of those are simply unbound creativity, sometimes Mojang runs competitions to help inspire players.

The most recent build problem was all about Star Wars, with Mojang tasking gamers to recreate unbelievable things from the universe of Jar Jar Binks with blocks. The winner of this competition is someone known as Ashwood, who recreated the Vuutun Palaa, a Lucrehulk-Class battleship that was accountable for the droids throughout the Naboo invasion in Episode 1: secretly the perfect Star Wars movie.

Ashwood, who goes by Gumliiii on Reddit, explains that the build doesn't currently have an interior, however they are considering it. Gumliiii has made just a few Star Wars-themed builds that you can see on their Planet Minecraft web page. They also commented saying that they'll be uploading this one there with the intention to obtain it and mess round with it. Simply remember that it has a diameter of round 1,300 blocks and uses the total peak restrict of 383 blocks too. It's massive.

The other entries in the competition embrace some stunning cityscapes and a recreation of famous fashions and battles too. If you're taking a look at them and questioning how on earth folks manage to place this stuff together, a variety of the bigger ones have a tendency to make use of plugins like WorldEdit to streamline things. Cracked minecraft servers spent two weeks constructing it, though, so it's nonetheless a titanic effort even with the plugins.

I won the Star Wars Build Contest with this Lucrehulk Battleship! from Minecraft

If you're into absurdly sophisticated builds, it's undoubtedly value trying out this superb IRL creation of a Minecraft piston made out of Lego. It even moves, although they didn't make working Redstone, which might be for one of the best.
