Anapolon-50 by Global Anabolic is an oral drug with a dosage of 50mg per tablet. It is the strongest oral on the market. It has both high androgenic and anabolic effects. Strength and weight gains are very significant. It is highly toxic to the liver. this product also aromatizes fairly easily.

Third, emphasize some incline movements. The upper chest is typically more difficult to develop. I always start my second chest workout with incline for this reason. You can't lift as much on incline as you can on flat bench which is why I'll usually use flat bench as my main exercise on my strength day but I'll use incline as my main exercise on hypertrophy day.

Anapolon is one of the fastest acting and strongest anabolic-androgenic steroids used today, but it can cause dangerous side effects. Zoltan Pharmaceuticals, a company that no longer exists, created Oxymetholone, often known as Anadrol, A50 or Anapolon. The drug was created to help aid in muscle growth in patients dealing with growth problems and malnourishment.
