GP Methan 10 Dosage. GP Methan 10 from Geneza Pharmaceuticals has a half-life of about 3 to 4 hours. This means that a single dose will produce varying blood levels resulting in ups and downs throughout the day. It is recommended that GP Methan 10 pills be divided and taken at intervals to regulate concentrations in the blood. The average ...

A+ I've been using the GP Methan 10 or GP Methan 50 to kick start all of my bulk cycles works great no complications at all, a plus for me taking GP dbol not only improves my gains but also improves my mood. The dosing has always felt correct unlike other brands that come in capsule form.I've been ordering through [NAPSGEAR.ORG](https://napsgear.org).
