

Garena Free Fire PC Game Fandom

Garena Free Fire is a battle royale game with third person shooter perspective created and published by video game giant Garena International. It is also identified as Free Fire Battlegrounds and Free Fire. Garena Free Fire was officially made available to the public on September 30, 2017 on mobile platforms. As of free fire for pc download , Garena Free Fire is one of the biggest mobile games in the world despite being released years ago. free fire has now been downloaded over 500 million times and is one of the few mobile games in the world that has profited over a billion dollars. Because of Garena Free Fire's numerous unique features, it was able to set itself apart from its big competitors.

Garena Free Fire's gameplay is pretty similar to other battle royales which were all inspired by the Japanese cult movie Battle Royale which was released in 2000. Essentially, around how to hack free fire are dropped off in a solitary island to survive. Though it might not sound as too much of a challenge, but the true test comes from players who were also dropped off in an island and want to eliminate other players to be the one to come out on top. Add in the fact that the map slowly gets smaller and smaller. To be the lone survivor of the game, players will have to scavenge for weapons, armor, ammunition, and other survivability items. As the area in the island reduces, the competitive environment increases until finally only one winner remains.

Garena Free Fire is released as solely a mobile game. Despite that fact, Garena Free Fire can still be played on PC through Games.LOL, a video game platform that lets players play all kinds of mobile games for free on their computers. Best of all, the mobile games are optimized for PC play, especially when it comes to controls and graphics.
