

Download Minecraft 1.18.30, 1.18.20, 1.18.10 APK Free

Let me introduce you to the second part Caves and Cliffs update. Everyone is looking forward to these parts, as the developers have released an interesting version of the game, with new mobs, items, and other exciting game elements. By the way, there are already some new features in Minecraft PE 1.18.10.20, so we can already guess how cool this update will be.

The developers continue to improve the game's environment by adding new elements to the gameplay. For instance new biomes and places appear, warning spawn eggs, which will help generate various mobs, strengthened opponents and much more.

Warden

Dating with this version, perhaps, you need to begin by understanding that in the darkest depths you will encounter the most dangerous boss - the Warden. This is a ferocious and hostile mob; it is more sensitive to sound and vibrations but is devoid of sight. You would be wrong to think you could escape from him. He is quick and powerful with unbeatable strength and health. He will immediately notice the sound you make of sound, or suddenly become uncooperative.

What spout

A single hit from him can deal 30 points of damage. So, knowing this there isn't much to do without armor and weapons. If you see him, you're somewhat shocked because you've never seen such huge mobs before. The Warden is the biggest mob. This threat is more difficult and dangerous than any of the previous ones.

New biomes

Mojang Studios' developers paid particular focus on the landscapes in this update. We are eagerly awaiting the stunning mountains, dark caves and other new biomes.

The latest part of the game will show real mountains (rocky peak) appearing, and they extend into the sky and above clouds. The mountains' peaks will be covered by a layer of ice. At the same time, the Cave will be deeper than in earlier versions. The Cave is also accessible with stalagmites and stalactites. There is also an underground cave that is that is guarded by the Warden.

Alongside dark and gloomy caves, you can also find beautiful and light-filled caves. You will find an amiable axolotl group. The territory is home to numerous new varieties and types of

glowing vines. This cave is among the most beautiful spots in Minecraft.

Bundle of brand new items

This new product will be a huge hit with players. Bundles can be used to store different kinds of objects in one inventory space. It is not a good idea to store the shulker container. You can fold one set of an item set into another, which is extremely practical.

To create a bundle, you need to gather two threads and six rabbit skins, and place them on the workstation.

Alison & Co

Hello, My name is Alison, I am the site manager of IGC and am a close friend of Craig (Finite), I actually live on the same street as him, that's how close we are. This account is being used to post news by myself, and some members of our team. Personally I am a big fan of JRPGs and RPGs generally. I also love retro-style platformers from the past like Mario and, of course I love soul-like games. I also have my own website, one for holidays, and one for music. I'd like to grow my business and maybe find my true love this year.
