MISSION STATEMENT

What we as a team at **Olympus Finance** are trying to do is create passive yields for every holder of our automated deflationary token; our **Medusa Token**. A token that allows a constant distribution among holders and combined with a sufficient burn mechanism to promote constant price appreciation.

From the very beginning we have taken steps to ensure that this project can thrive. This would include the locked liquidity, Pre-Sales funds allocated 100% to Liquidity, Marketing team to help us achieve the growth of our ecosystem & token taxes either sent back to holders as a reward or sent to the depths forever in **Poseidon's Vault**.

But **Olympus Finance** can only do so much. This project will be in the hands of you, the community, as much as in ours.

Best Wishes,

-Olympus Finance Team
