How to Unfollow on Instagram?

We were able to remove Instagram from the list of followers by blocking users from our followers' list and by not allowing us to follow us before Instagram has been removed. However, you can remove the users in the list of followers with the next update from the list without blocking the contact.

1. To **unfollow a user on Instagram**, just go to his/her profile and click to Unfollow. And you did!
2. When you unfollow someone, any notification is not sent to that person. He can only see you doing it when he looks at his list.

There are many applications on the internet. And all of them claim to be serving people who ask the question "**How to find out who unfollowed me on Instagram.**"

Let us be certain that such a thing is not possible. Instagram already has no such feature. You can not do it with 3rd party applications or websites. The sole purpose of these websites is to attract more visitors, and some malicious applications are able to control users' personal information. If you encounter an application and website claiming this, please do not share your Instagram password. Because ultimately you need to know that you can't get anything.

Is That Real?

Of course not! None of these applications give you what you want. They ask you for your Instagram password, so your account is under their control. There is only one way to know who unfollows you. You can find out by checking your followers' list. There is no other legal method. This is true not only for Instagram but also for other social media accounts.

Do not rely on applications and websites that claim such things and protect your account security. You don't have to **ask who unfollowed me on Instagram**. This is not a very important detail.
