

LIGHTAILING

# Instruction

## for LEGO 76105

### The Hulkbuster: Ultron Edition

by Lightailing.co

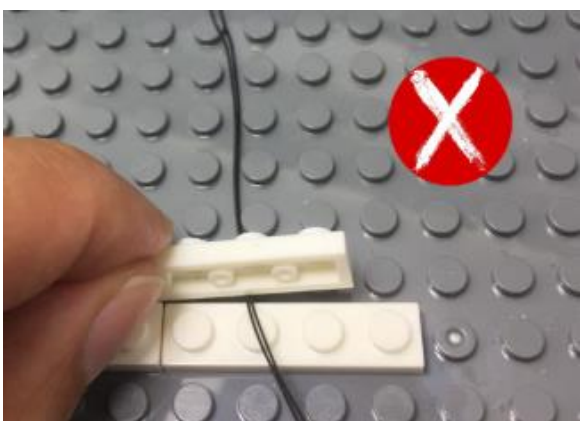

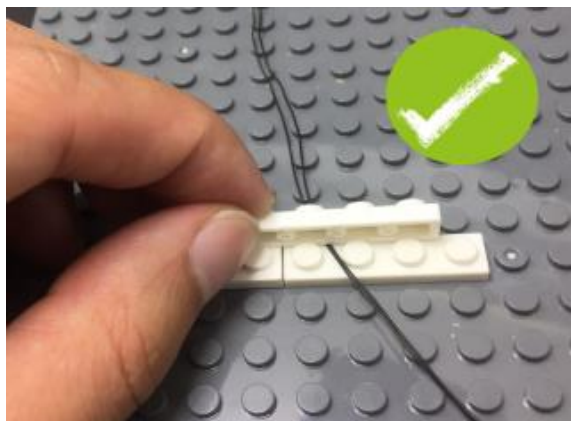

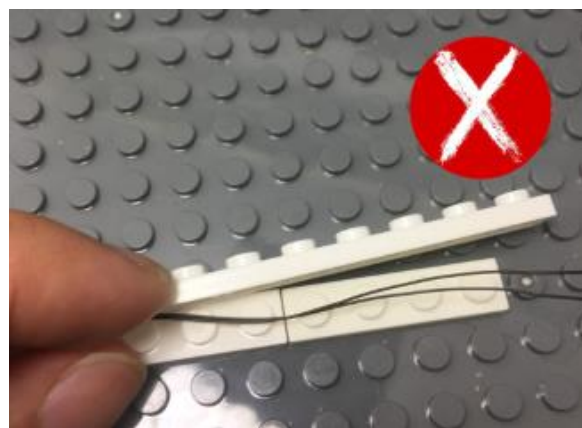

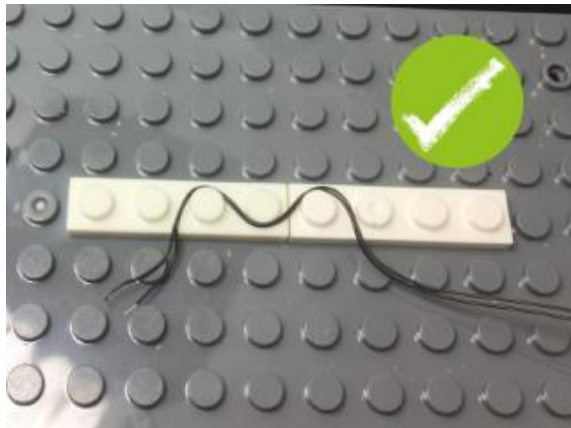

### Important things to note:

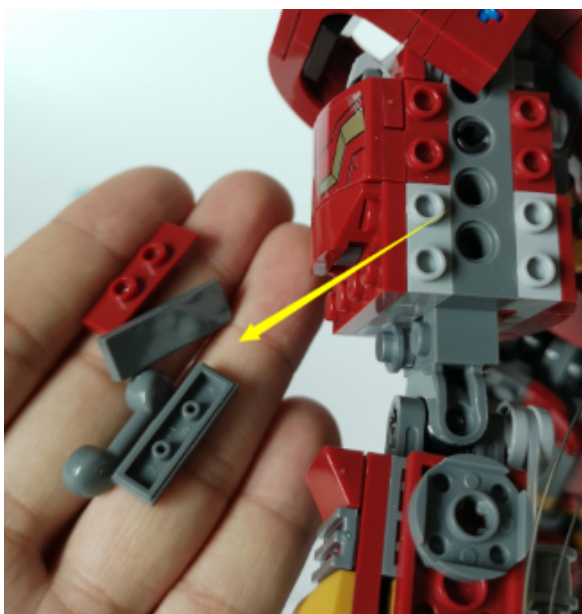

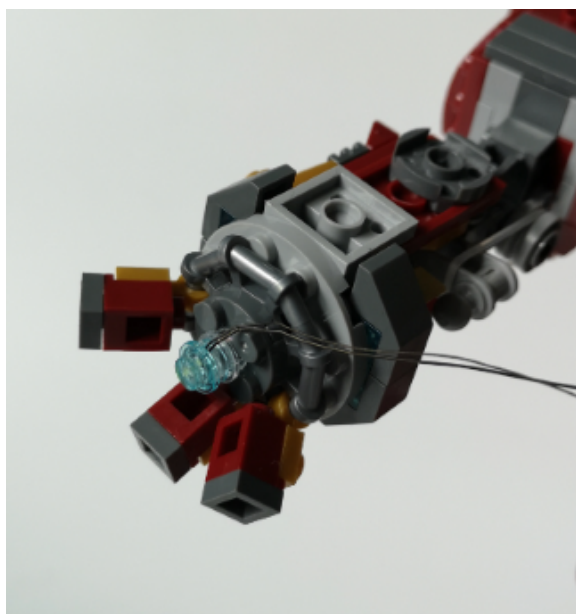

1) the cable is thin enough to hide it between bricks but it's easy to be damaged if forcing bricks to connect over a cable or rudely pull the cable

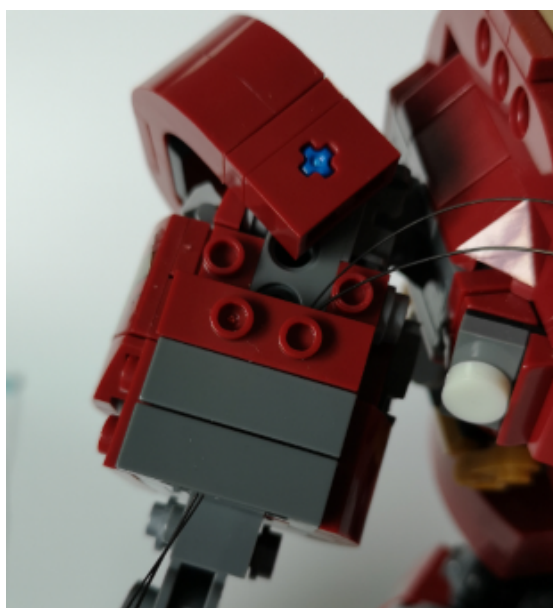

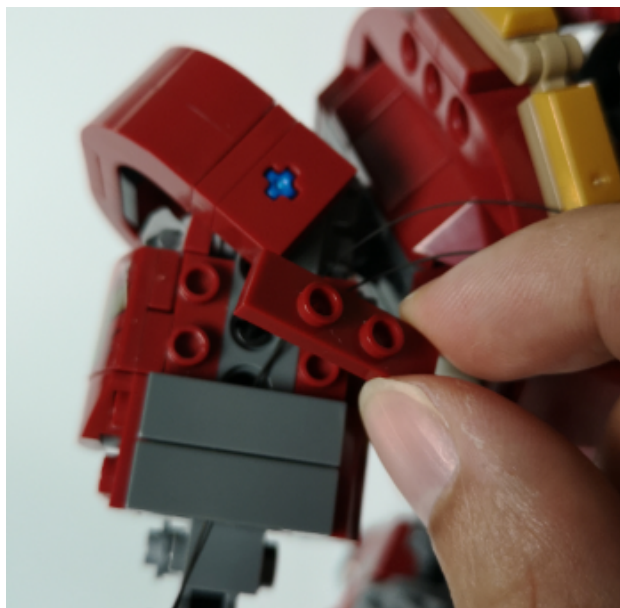

2) Laying cables in between and underneath bricks

Cables can fit in between and underneath bricks, plates, and tiles. Make sure they are laid correctly between the studs. Do NOT forcefully join bricks together around cables; instead ensure they are laying comfortably in between each stud.

Please follow pictures below in order to install lighting kit! Thank you

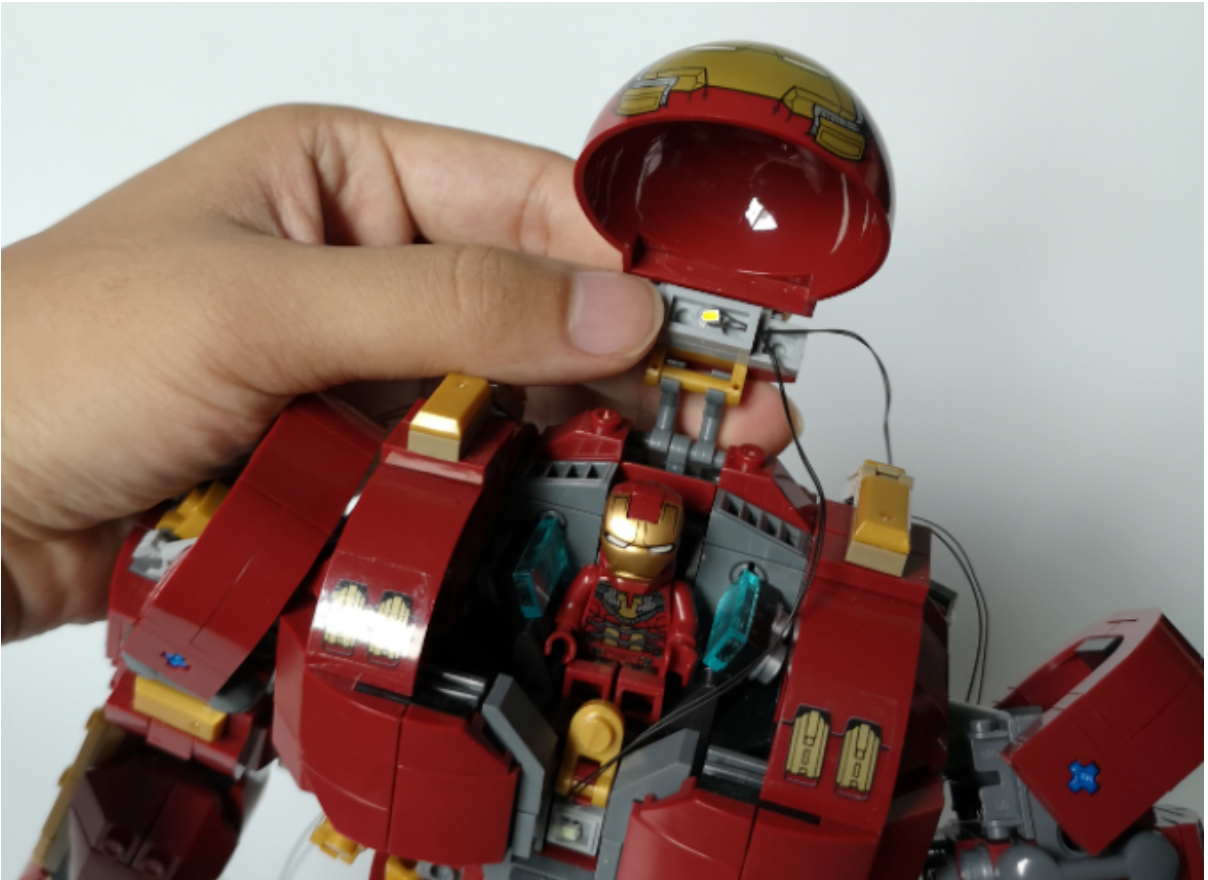

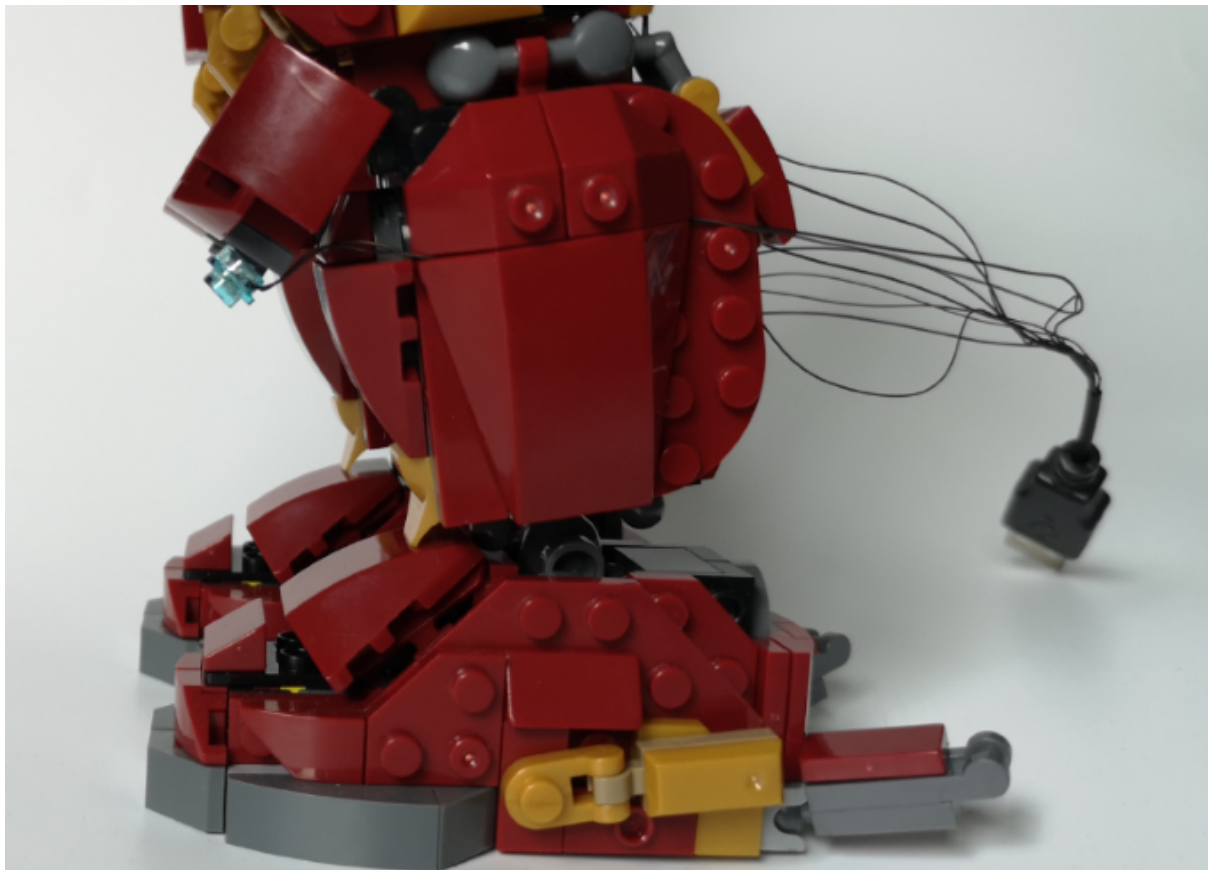

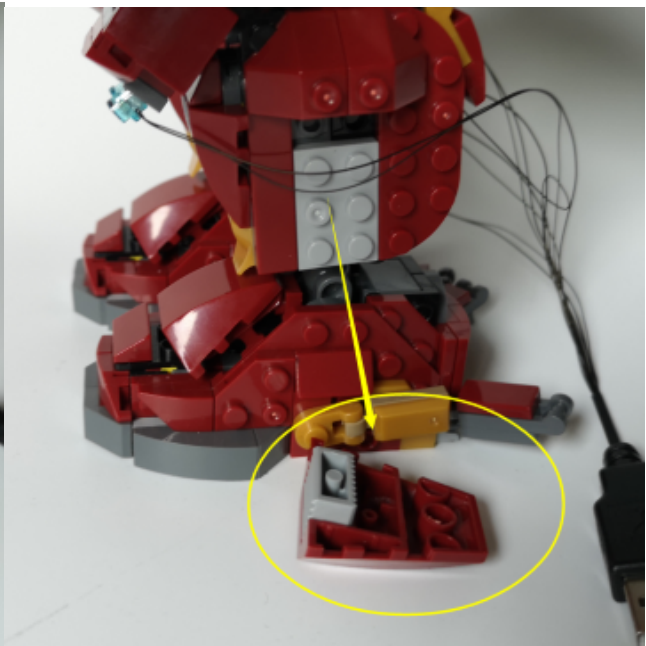

install the other side palm light  
by same method

install the other side knee light  
by same method

Congratulations!!!! Lighting has been successfully installed, I am proud of you!!  
If you will have any questions, feel free to contact me any time.

Best Regards,
