The weight loss effect of Winstrol on reducing body fat is minimal. It does not appear to be associated with any side effect. If you are on a calorie low or extremely low diet, a Winstrol injection cycle is probably not what you are looking for. On average, male bodybuilders take one for the first six weeks, then up the dose to two Winstrol 50mg pills(100mg per day, divided into two daily doses, for about two weeks prior to a show. Your healthy hair follicles are totally toned down to a level where they become incapable of producing hair growth. This can lead to loss of hair from various parts of the body and even baldness. Some bodybuilders and athletes are incredibly touchy about the subject. But if you check out some online discussion forums for bodybuilders, Winstrol can be a subject of intense discussion. People who are into steroids say that it isn' t about gaining fat, but that it is not so much about calories as it is about being "clean". Winstrol can be used for bulking yet it is more effective for cutting and strength. It can improve the efficiency of other hormones and boost free testosterone.
