>I'm not talking about normal /pol/ stuff like Jewish control of the media and financial institutions

Of course you aren't, rabbi JIDF.

>Le daily wacky conspiracy threads by JIDF

Kikes like to push irrational conspiracies like faked moon landings, le Illuminati/Masons, flat earth, absurd 9/11 theories (there were no planes), lizard people etc. etc. to do one thing... to make people that discuss information outside of what the (((MSM))) gives us look retarded and to cover up for jews.

This is called well-poisoning and gas-lighting. Jews do this to keep normie goyim from looking into or thinking about legitimate non-MSM information too much, e.g. the jew subversion of our media and government or the exaggerations and outright lies surrounding the holohoax made for political gain.

9/11 is a good example... Israel had a big role in 9/11. How to well-poison this subject manner? Make sure any threads about 9/11 include discussion of "there were no planes", "it was CGI", "a nuke brought it down", "an energy weapon brought it down" etc. and other absurdities. This will get any normies to reject ALL non-MSM information about 9/11, including what they want to cover-up (Israel's role).

Jews control our media. Jews control our banking. Jews control our academia. Jews control our government. Very real and verifiable. Something people need to know and understand. "But let's not worry about that, goyim. Let's discuss pyramid symbols, bigfoot and aliens".

Fuck these threads and fuck JIDF.

The Government took over building the roads so that they can direct you around their hidden off-road bunkers. This is also the true purpose of the forest service and national parks.

Unironically, I believe in chem trails. Not that its a Illuminati plot to limit birthrates or some shit, that it was a plot to seed clouds with ionized chunks for more rain over farming areas so we get better crop yield. my proof is whenever I see a metric fuckton of chem trails we get rain, when I see nothing we dont.

I know its retarded but I cant get the thought out of my head and now that I make the connection with a ton of con trails and rain I cant seem to shake it.

Joys of saskatchewan where its so flat you can see the back of your own head if you squint real hard.

Hours before this year's State of the Union speech, the sky was filled with more trails than I've ever seen in my life. Then it rained for 2-3 days straight without stopping. The National Weather Service put out a mass warning around the same time telling people to stay inside because of "air pollution."

Anyways, I mention the SOTU part because there are theories that the trails are some military defense thing. When you've got all of Congress and the President under one roof, they're going to take extra security measures.

[>>207450916](#)

Also, you are correct to draw the connection, but your mechanism is wrong. The fuckton of trails is because there is already a lot of moisture in the atmosphere, so rain was going to come anyway. So the trails aren't causing the rain, just a good indicator that rain is likely.

We have proof of intelligent design. The CMB or the temperature of the entire universe and therefore the density and structural makeup is aligned strongly (99%) with the plane of the solar system and is aligned with the Earth during the equinoxes.

http://www-personal.umich.edu/~huterer/PRESS/CMB_Huterer.pdf

Another satellite confirmed this in 2013. One of the directors of that mission was told not to talk about God when discussing this alignment. It's known as the axis of evil and has been buried by the media and the scientific world because it threatens the standard model which says we are not special or in any special place

>t. someone who doesn't understand history

Before Galileo, everyone thought the earth was flat, for very good reasons. The first man to ever suggest a globe earth was Pythagoras. Thy Pythagorean tradition continued with Plato, and then Plotinus (of neoplatonism).

Modern physics IS neoplatonism. Catholic theology IS neoplatonism. Quantum Mechanics IS neoplatonism. They say we are all connected in a giant pool of subatomic particles (infinite monads). Albert Einstein was full of shit, (((relativity))) gave room for the scientific community and physicists to make up a bunch of shit that they could never proof. The deepest earliest foundations of modern science are all unverifiable nonsense that has paved the way for decades and decades more of more unverifiable nonsense. Have you been to space? Has your family been to space? DO YOU KNOW ANYONE WHO HAS BEEN TO SPACE? DO YOU KNOW ANYONE WHO KNOWS ANYONE WHO HAS BEEN TO SPACE? You will laugh at me, but the truth is that I could dance circles around you in the philosophy of science, physics, history, philosophy, theology, and most likely anything else (unless you are an engineer, I'll bet you aren't).

The earth is fucking flat, and only a handful of people in the world are smart enough to put the pieces together. Not my fault that you don't have 130 iq like me, or 150 iq like the Southern Israelite.

Natural design isn't to be automatically associated with intelligent design. Surely you understand the difference. It's the path of least resistance. Evolution designs complexity as it seeks to unify matter back in to energy. All becomes one again.

The supermassive black hole at the center of our galaxy is as close as you're ever going to get to "God", and even then, it functions purely as the catalyst in which nature is ordered.

I suspect you're simply too obtuse / retarded to fully understand this. Can't say you weren't ever told though.

Threadly reminder that Stanley Kubrick invented space
<https://www.youtube.com/watch?v=0ZoSYsNADtY> [Embed]
<https://www.youtube.com/watch?v=Bjtg9I5ltlw> [Embed]

Notice a difference? Oh there is a difference alright, about 70 years of innovations on film technology. You guys are just on damage control. KUBRICK LITERALLY INVENTED SPACE HAAAAAAAAAAAAAAAAA.

>I could dance circles around you in the philosophy of science, physics, history, philosophy, theology, and most likely anything else (unless you are an engineer, I'll bet you aren't)

I'm a civil engineer, and while I don't draw plans for long, massive bridges, but I can tell you that even on small scale construction projects, the earth is round. Radar operators know it's round. Hydrologists know it's round. The military knows it's round. They didn't discover this through philosophical debate. They didn't discover it through complex equations. They discovered it by trial and error. When the French were wondering why their artillery was no longer landing where they wanted it to when they build larger guns, they factored in the curve and spin of the earth and boom, it was back on target.

Lets say for example that you CAN prove that the earth isn't round. None of your proof says it's flat. The best you could do is disprove the given shape.

Now there's a conspiracy. Do black holes even exist? Think about it, Anon. We don't have an actual picture of one (every "picture" you see of one on Google or textbooks is an illustration). Most of what we know about them comes from fake Stephen Hawking and a handful of Jewish scientists. The only real compelling argument to be made in their favor is that (allegedly) we can detect them by the way they interact with other stars and matter in the galaxy. But the main point here is that their existence hinges on faith that scientists aren't lying to us.

It's electrons and smaller particles revolving around the matter. It's more prominent in metals because they have linear structures, with the atoms lined up so the electrons revolve in the same direction with amplified force. The revolution is like a straw, with inward direction on the outside, revolving in the opposite direction on the outside.

What I just said literally explains electricity (right hand rule, DC electronics, AC biphasic electronics) and it explains why magnetic force becomes less powerful the further you get away from the source (inverse square law).

I've never read this in a science book, but feel free to think about it objectively.

I wouldn't call it faith. Faith is unwavering belief. Astronomers would drop the black hole idea if additional information came out that had more evidence along with it that disproved black holes. Faith would just say "NA, DEVIL TRICKS". That's the big difference between science and religion. Religions are constantly trying to prove themselves. Science is actively trying to disprove itself.

Hey shit for brains civil engineer, explain this. All air craft are equipped with a gyro and altitude indicator. These instruments are used before take off, they measure the FLAT, LEVEL runway and only after this does the air craft leave the ground, reach cruising altitude, and yes, you guessed it level off for the duration of the flight until it reaches its destination. So at what point does the earth start to curve???

I did you a solid by explaining it mechanically here

[>>207451424](#)

Nice digits btw

[>>207451323](#)

I don't think gravity is a natural force. I think the phenomena is a cumulation of a few forces, with friction, rotation, and pressure playing a big role.

Gravity doesn't make any sense in the way it's explained, because it breaks causality and conservation: Gravity, the way it's explained, would be like if you took a fully automatic weapon and fired it at a target, and with each bullet hitting the target, the target moves closer to the gun; gravity waves are the bullets in a fully automatic gun that never runs out of ammunition.

Suffice it to say, there are many pounds of atmosphere above each of us pushing us down to the Earth. I think light, as photons, has mass, therefore when it hits the upper atmosphere (and it's constantly doing this) it produces a downward force toward the Earth. That force is multiplied the closer you get to the center, via pressure because the Earth is a sphere, and a conical cross section of the Earth, including the atmosphere, would have greater pressure at the center, which is completely in line with what we find on the Earth, higher pressure in deeper oceans, extreme pressure (presumably) at the core. The rotation of the Earth distributes this force evenly across the planet.

I do not believe in any "pulling" forces, as they break causality and conservation (action equal opposite reaction). Every pulling force can actually be described by a pushing mechanic, the drain in your bathtub is atmosphere pushing on the water, that's why you can hold a fluid in a straw by putting a finger on the end of it.

These are my own thoughts, never seen in a science book, and anybody who says they love science immediately disagrees with me without providing a counter point.

I could go in more depth as to why I believe light has mass if someone wants.

you know Wi-Fi, wireless internet? we now have Li-Fi, wireless internet through the LED lamps. Li-Fi is already being deployed, and as you could imagine it supports volumetric room mapping, biometric recording, unlimited simultaneous connections and quintillions more bandwidth than fiber optic. it outstrips the backbone networks. the refresh rate of the diode can be used with a controller to emit light that carries completely untraceable (to the naked eye) heterodyned data signals right through the air, literally lighting up the room you are in. here is a youtube video about it:

<https://youtu.be/AKvvEqm9Nv4> [Embed]

ready for the conspiracy? the DoD has been doing this with incandescent bulbs for decades, before 9-11 even. if the lights are on, you are being recorded in whatever fidelity the carrier wave frequency afforded. the rapid switch to LED lighting was orchestrated in order to consolidate and standardize the technology for defense purposes, later allowing No Such Agency to assert full control over the new LED systems (cant even buy the old bulbs!). they pulled the rug right out from under the CIA & DoD. the reason the NSA put cameras in everything was to 1 detect the prepotent technologies deployed in america's homes, 2 collect research data on these technologies, 3 identify the institutions responsible, 4 fabricate their own countermeasure to protect american homes from luminal espionage, 5 to deploy and adjust the countermeasures to neutralize prepotent systems controlled by foreign agents. (nsa spec LED bulbs modulate light to jam signals from fluorescent tubes and other obsolete systems).

these projects are massive undertakings that go way beyond computer science and the realm of copying everyone's E-mails.

It's canon in several churches and the oldest christian church. Nazarites used it as Canon as well Jesus brother was a Nazarite. and even mentions the book of Enoch in the New Testament. Yet, you and your "Christians" know better than a Nazarite priest who happened to be brothers with the messiah.

Even so, you don't have to be religious to see that the Book of Enoch has the same age as the old testament and talked at length about a round earth.

Read this book

These two books were written by the former Executive Director of the South African Reserve Bank - Stephen Mitford Goodson.

He quit the S.A. Federal Reserve to name the Jew. Here is a short synopsis of who he was.

<https://uncensoredopinion.co.za/we-remember-stephen-goodson-died-last-week/>

and a longer one with tons of videos etc.

https://wikivisually.com/wiki/Stephen_Goodson

Here is his Eulogy at his funeral.

http://www.christianlibertybooks.co.za/news/message_at_the_funeral_of_stephen_mitford_goodson

He was poisoned and died on August 4th 2018 shortly after the book was released

If you like the books please go and buy them at <http://www.christianlibertybooks.co.za>

His wife and family have not been able to get at any of his money. They are having a VERY rough time of it.

All the money from his book sales goes to them.

A History of Central Banking and the Enslavement of Mankind by Stephen Goodson (One of the best books I have EVER read)

[>>207455567](#)

Here are two more books for you that show you how it all started back in Babylon

How the Jews Betrayed Mankind: Volume 1 - The Sumerian Swindle

http://www.balderexlibris.com/index.php?post/G_d-How-the-jews-betrayed-mankind-Volume-1-The-sumerian-swindle

<https://archive.org/details/TheSumerianSwindle> (mirror)

Introduction. "In the beginning were the Jews." At least, this is how the Jews would write the history of Mankind if they could get away with it. But in fact, in the beginning, there were no Jews. The lies that they wrote about themselves in the Old Testament are just that – lies. Here is the real story of How the Jews Betrayed Mankind.

"But are the Jews really unique or do they only tell you that they are? After all, it costs nothing to brag about yourself. And if self-congratulation brings you prestige, wealth and influence – all for the price of hot air and flapping lips – well, then, who has more hot air and flapping lips than a self-glorifying rabbi? Regardless of what the Jews say, when you inspect the actual merchandise, you will find that the sparkling Jews are only made of glass. This is why the Jews are so allergic to criticism because their lies are so easily broken."

How the Jews Betrayed Mankind, Volume 2 - The Monsters of Babylon

http://www.balderexlibris.com/index.php?post/G_d-How-the-jews-betrayed-mankind-Volume-2-Monsters-of-Babylon

<https://archive.org/details/MonstersOfBabylon1> (mirror)

Introduction. Much can be learned about any people, if you know who their heroes are. It is their heroes, to whom the people look for inspiration and as examples to teach their children. The heroes of a people typify all of the qualities to which the people, themselves, aspire. So, one may ask, who are the heroes of the Jews?

[>>207455792](#)

Alright, you want me to explain it down to the most fundamental level:

The smallest particles are spherical in nature. When two spheres collide their tendency is to rotate. I propose that atoms are not empty, in fact there is almost no space that the smallest particles (most likely light) occupy. So the electrons are in a sea of smaller particles within the atom, and their tendency with all of this action in the atom is to revolve about the nucleus. When atoms are aligned rigidly and linearly, all of these revolutions are amplified against each other, much like waves in a pool of water if you toss a rock in. The revolution effect is already demonstrated on the macro scale with rotation of planets about stars, and rotation of star systems about the center of galaxies, and the theory that atoms rotate and electrons revolve about the nucleus of the atom is also highly established.

Does that suffice your question or do we need to inception further?

Nothing indicates that anyone ever wrote anything. got a picture of the author writing it ?

What you think it was verbal history for 2500 years ? Then tell me, why is it in the dead sea scrolls. You just make zero sense.

The Father judgeth no man, but hath committed all judgment unto the son (John 5:22)
The principal part of the judgment was assigned to him, the Son of man. (Enoch 69:27 {68:39})

shall inherit everlasting life (Mat. 19:29)
those who will inherit eternal life (Enoch 40:9 {40:9})

"Wo unto you that are rich! for ye have received your consolation. (Luke 6:24)
Woe to you who are rich, for in your riches have you trusted; but from your riches you shall be removed. (Enoch 94:8 {93:7}).

Ye also shall sit upon twelve thrones, judging the twelve tribes of Israel. (Mat. 19:28)
I will place each of them on a throne of glory (Enoch 108:12 {105:26})

Woe unto that man through whom the Son of man is betrayed! It had been good for that man if he had not been born. (Mat. 26:24)
Where will the habitation of sinners be . . . who have rejected the Lord of spirits. It would have been better for them, had they never been born. (Enoch 38:2 {38:2})

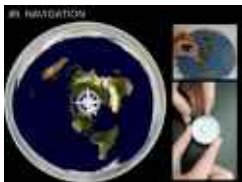

between us and you there is a great gulf fixed. (Luke 16:26)
by a chasm . . . [are] their souls are separated (Enoch 22: 9,11{22:10,12})

In my Father's house are many mansions (John 14:2)
In that day shall the Elect One sit upon a throne of glory, and shall choose their conditions and countless habitations. (Enoch 45:3 {45:3})

that ye may be called the children of light (John 12:36)
the good from the generation of light (Enoch 108:11 {105: 25})

the water that I shall give him shall be in him a well of water springing up into everlasting life. (John 4:14)
all the thirsty drank, and were filled with wisdom, having their habitation with the righteous, the elect, and the holy. (Enoch 48:1 {48:1})

Here's a "conspiracy theory" that I hold:

In a short amount of time "chaos" will be unbound. The reality bending thing that can not be described with words will change everything.

I have the conspiracy theory that reality itself will be soon changed in a way human mind can't comprehend.

The problem is - I haven't read about it anywhere. There are no texts to make me believe that. I just do.

The rigid alignment of the atoms breaks down as temperature (pressure) rises, destroying the collective amplification of the electron rotation.
We look at poles on magnets incorrectly too. Opposites do not attract. When you set a n/s pole magnet to a n/s pole magnet, they connect when they align, when the flow is in the same direction, and they repel when the flows oppose one another. I think of it like a straw, the flow goes towards N on the outside, and towards S on the inside, lining the poles in the same direction keeps these circular flows going in the same direction. It took me a long time to realize it was a straw because I tried to visualize it in 2 dimensions, but it's a 3-dimensional phenomena around a straw or a doughnut.
If you understand this, you probably know more than most scientists because you know how it operates simplistically and mechanically. If I can't explain something simply then I don't believe I understand it, but complex systems have to be broken down to simple parts.
