General Information

Short summary

A Bulgarian company experienced in the production of band saw blades and machines for their service and production offers its free capacities for punching large quantities of steel strips. It also offers resharpening of polycrystalline diamond tools (PCD). The company offers machines for every process related to the production of band saw blades (welding, sharpening, tooth setting). The company is looking for partners mainly in the woodcutting and metal cutting industries in all EU countries.

Full description

The company is the leader in the production of band saw blades in Bulgaria and has more than 25 years of experience. It also specializes in the production of machines for service and maintenance of band saw blades (welding, sharpening, tooth setting machines). 3 years ago, it acquired a brand-new innovative machine for the resharpening of polycrystalline diamond tools (PCD) which are widely used in the furniture industry.

Advantages and innovations

1. The company has vast experience in the industry which guarantees high-quality production. 2. It uses equipment from some of the most popular European manufacturers. 3. The machines that the company produces itself are sold at very competitive prices compared to other European producers. 4. The company will communicate and tailor everything to your needs. 5. The company owns one of the few brand-new machines for resharping of polycrystalline diamond tools (PCD) and has experience working with some of the biggest furniture factories in Bulgaria.
