FUZE

The First Fully Community Driven Hyper Deflationary ERC20 Token

Contents

FUZE

Introduction

Hyper Deflationary token with a burn rate of 5%
It is a Social Experiment Where the Community Decides the way it goes.
Community Owned And Operated with the Increase of Demand Comes the
Decrease of Supply.

What is Deflation?

Deflation is the general decline in prices for goods and services occurring when the
inflation rate falls below 0%. Deflation happens naturally when the money supply of an
economy is fixed. In times of deflation, the purchasing power of currency and wages are
higher than they otherwise would have been. This is distinct from but similar to price
deflation, which is a general decrease in the price level.

What is FUZE?

FUZE Token is a fully community-driven social experiment and the world's first self-
deflationary currency with a supply of 1000 tokens and a 5% burn rate.

Why FUZE?

A difference between FUZE and most other deflationary projects is that there is no dev
holding/allocation — every token was distributed fairly by airdrops. This distinguishes
FUZE as a token created entirely for its community.`

What are the Use Cases of FUZE project?

Our main goal is to build a community that decides in which direction the FUZE Token
should go. Future functions or use-cases can be built by any member of the community.
Of course, the main function right now is the deflationary token model — this means the
total supply decreases with each transaction.

Why a deflationary Token?

We like the concept of this kind of token model because it exemplifies the hodler mentality. Let's say you buy FUZE Tokens for 1 ETH — you are incentivized to hold your FUZE because each time you send it to another address, 5% will be burned. This naturally encourages hodling, rather than sending. This token burn will naturally drive token appreciation through driving an increase in scarcity vs demand.

TOKEN DESCRIPTION

Initial supply: 1,000 FUZE Tokens
**Token contract: https://etherscan.io/address/fuzetoken.eth**
Decimals: 18
Burn rate: 5%

The top 100 holders collectively own 92.60% (832.68 Tokens) of FUZE Token | Token Total Supply: 899.23 Token | Total Token Holders: 349
