We will not continue to keep the intrigue. Here is our review of the best strap-ons.

*Choosing the best strap-ons on the market is not an easy task even for experienced players*

*In addition to the style, design, and method of mounting the sealing ring there are still many nuances*

*There are hundreds of different models of harness and ready-made kits on the sex toy market, including belts and dildos*

## Advanced Unisex Strap-On Harness Kit

- ☐ Harness in combination with a sticking dildo can give you a real enjoyment.

This is the beginning of your personal collection of sex equipment. The kit is comfortable for advanced couples.

### **Why do we need strap-ons?**

The harness is ideal for couples who want to add variety to their bedroom. Lovehoney cares about your comfort, so prepared for you the perfect set.

You do not need to look separately for straps, O-rings and additional accessories. Wear a ready-made set, fasten your seat belts and enjoy the penetration!

In addition, you can always expand your collection of inserted toys. Replaceable sealing rings of three different diameters are provided in the Strap-On Harness Kit. If you're still at the beginning, try smaller sex toys.

We are sure that in the future you will want to use something more intensive, therefore the manufacturer has provided a stepwise increase in the allowable diameters.

### Let's see what is included

- Black comfortable and stylish harness. The size is absolutely universal and fits most users of both sexes.
- Three sealing rings of different diameters for a game with various pegging dildos.
- Silicone purple curved dildo with a hole inside to insert a vibrating bullet.

### Note

Electronic massager must be purchased separately.

### Why we recommend the kit

- Sex toy has a limiter and can be used separately, including for anal penetration.
- Straps can be washed in a washing machine.

- To clean the silicone components, you can use soap or an antibacterial spray for sex toys.
- Waterproof design allows users to play in the bathroom.

**Feedback**

We already played with strap-ons before, so we knew what to expect. But still, we were pleasantly surprised by the comfortable fit of the harness. Often parts slide or pinch the skin. Lovehoney model perfectly suited me and my boyfriend.

## Eve's Strap-On Play Set

Why do we consider this harness one of the best? Because besides comfortable straps, it contains a whole collection of various dildos!

This kit is perfect for both guys and ladies.

**Let's appreciate the benefits of Eve's Strap-On Play Set**

- Removable dildos are easy to wash and dry. For perfect cleanliness, use an antibacterial spray designed specifically for sex toys.
- The well-structured surface of the accessories allows for more intense sensations.

- The sealing ring firmly fixes the chosen dildo in the harness. You can have fun without hands!
- The harness has a soft felt lining inside. Therefore, even during active actions, strap-on will not rub your skin.

Each dildo in the kit has a different shape to satisfy all users. The smallest toy has the shape of an anal plug.

A larger specimen does not look like a real cock, but it has an expanded and bent tip, for targeted excitation of internal sensitive areas.

The biggest dildo has a realistic shape and is aimed at the deepest penetration possible!

## Tip

- To avoid damaging the delicate surface, use only water-based moisturizing lotions.

Try each of these flexible dildos. Tighten the strap-on straps under your parameters, insert the selected sex toy into the O-ring and enjoy the penetration!

### **Additional interesting points**

- The shape of the included dildo is chosen so that both ladies and boys enjoy them.
- The toys in the kit are good for anal experiments, G or P-spot stimulation, for beginners and professionals.

- Each accessory in the kit has a suction cup for playing separately.
- The central part of the strap-on is designed from vegan leather. It has a very stylish design and a soft surface. At the same time straps are made of lasting nylon.

- The length of the straps is conveniently adjusted using sliding fasteners.
- In the set, there are two sealing rings for dildos of different sizes.
- You can easily use your favorite dildo of the right diameter with these belts!

## Reviews

We used this strapon and blue dildo for the first anal experience.

It was delightful! I think after some practice, we will move to the next level and try the purple toy.

On that note, we wanted to complete our rating and tell a little about the general criteria for selecting the best harness. But. Suddenly, we remembered another successful model.

This option is somewhat different from all previously proposed. At the same time, in our opinion, this is a cozy and versatile model that can be worn as ordinary underwear. So, look at the next lot.

## Adam & Eve Scarlet Strap-On Starter Set

This is a lovely women's panties universal size of a very elastic fabric.

They sit perfectly, keep their shape and have a special pocket for wearing pegging dildos.

By the way, in the set, you will receive as many as two additional accessories for delicate and deeper penetration.

**At first glance, this is the usual lingerie**

- In fact, there is a hidden sealing ring in front of it for playing strap-ons. Moreover, you can wear any of the included toys or choose to your liking. Watch for matching diameters.

- Super soft and stretch fabric makes this lingerie perfect for all ladies. Two sizes: standard and royal suit any parameters.

- Red accessory is better to use after preliminary preparation. And, of course, do not forget about your favorite moisturizing lotion.

## Surprise

Inside the panty hidden pocket for a bullet vibrator! This will not only give a more exciting feeling to your partner but also create a more fervent mood for you. Do not forget that you need to choose a vibrator separately. It is not included in the kit price.

## Instead of P.S.

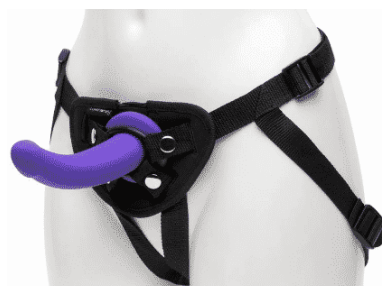

Strap-ons for a long time undeservedly considered a game only for lesbian couples. We confidently declare that it is not.

- ☐ The harness is suitable for straight couples (for example, for double penetration, or changing roles) and gay couples.

We have revealed to readers more features of the erotic game using straps. Now you only need to buy the perfect kit and start acting!
