- Diabetes or diabetic neuropathy
- Heart attack, Cardio vascular disease or stroke
- Chronic kidney disease (CKD)
- Chronic obstructive pulmonary disease (COPD)
- Family history of any one of the above diseases
- None of the above

Revitive Product Overview

What is Revitive®?

Revitive Circulation Booster® is a drug-free, FDA-cleared medical device to relieve leg pains and swelling and is clinically proven to improve poor blood flow in the legs and feet during use.¹

How does Revitive Work?

Revitive uses a technology called Neuromuscular Electrical Stimulation (NMES) that delivers electrical impulses to your leg muscles through your feet. Revitive Circulation Booster® works by contracting your lower leg muscles by using our OxyWave technology with patented wide-pulse waveform, to deliver a clinically proven increase in leg circulation during use. Providing more oxygen rich blood to your lower limbs. The built in isorocker gently rocks your feet back and forth to allow for natural ankle movement and increased circulation in your lower legs.¹

Why Should You Use Revitive?

Revitive is a drug-free, FDA-cleared medical device for temporarily increasing poor blood circulation in leg muscles and relieving pain.¹

Designed and tested by physical therapists and vascular surgeons²

Revitive is designed and tested by a team of experts in physical therapy and vascular diseases. Physiologists Prof. Katya Mileva of London South Bank University and David Paul Sumners co-invented Revitive's patented waveforms. Prof. Tim Watson, of University of Hertfordshire is an expert in physiotherapy and electrotherapy and serves as the leading consultant in program development. Prof. Alun Davies, a vascular surgery expert at the Imperial College London, tested the benefits of using Revitive in numerous clinical trials.

Dry skin, brittle nails or hair loss on your legs and feet

Muscle cramps

Lower leg pain

Swelling of the lower legs and/or feet

Aching, tired feeling feet

Tingling, or cold feeling on your legs, feet or toes

Revitive Does not Require a Prescription

Revitive Circulation Booster should not be used if you are fitted with an electronic implant, such as a pacemaker or AICD, being treated for or suspect you have, a deep vein thrombosis or are pregnant.
