ID's Statements to the United Nations, as members of the Security Council

I, King Gottwald Peter, representing the Imperium of Diamond's federal government, as a government with its own property of possessing territories without a legal dispute over possession, with ownership of the register of its own population, as well as in the development of jurisdiction and with the register of its own economy, the federal government Imperium of Diamonds A legitimate subject fully open to the right of legitimate recognition by the international power state, world democracy.

The current state of the Imperium of Diamonds is in a position of decentralization because of the European Terrorist Apartheid, which has consistently violated all the principles of international law and the Charter of the United Nations for many years.

Therefore, the ID's government is in a situation where it is necessary to seek legal support by UNSC resolutions for the purpose of resolving the conflict situation in peace and without increasing the risk of wars and / or civilization destruction.

That's why it is in my interest to apply for the UNSC resolution, defining the obligations of the criminal states to ensure the stabilization of ID's civilization and thus also the opening of its own state function of terrorist states according to international rules and, in particular, the UNGA Declaration on Political and Civil Rights.

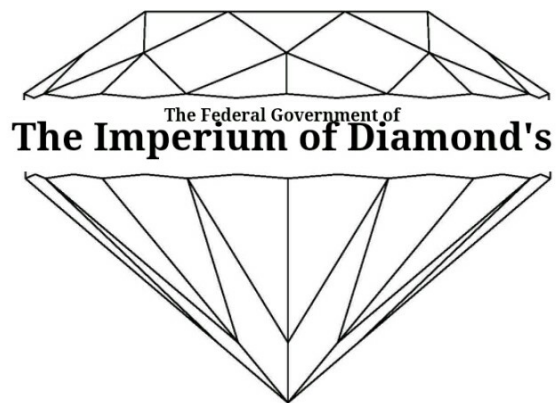

If the ID's own development interests and political activities are not the UN and UNSC strategy, I therefore request the release of a report on the possibility of joint agreement and the stability of the development of common agreements that can specify syncing agreements.

Therefore, it is open to the UNSC to issue a resolution, without any need for objection, unless it is in the interest of the members of the UNSC not only the act of the increase of crime or its own criminal activities and opposition to international law.

At the same time, media censorship only causes worsening of the problem, the rise of crime and the legal factor of full destabilization of legal values and functions of international policy rules.

By personal interest, I offer the possibility for states to support the stabilization of my country by using the IAIC strategy document which is also a guarantee for my ability to secure development and peaceful political activities.

To compare my opposition, European Terrorism has outgrown the criminal statistics of the Second World War, and blocks far more important steps and obligations than the historical act of establishing the United Nations, and is therefore certain that the whole world will be taught in the history of mankind about the major incidents of that time; European terrorist states will always be represented as states with responsibility for the greatest damage in the history of humanity and against all the states of the world.

King Gottwald Peter, ID's

A large, stylized handwritten signature in black ink, appearing to read "Gottwald Peter".
