With a completely redesigned user interface, ROAMpay X5 provides a truly native tablet experience and familiar look and feel that increases merchant adoption, and improves customer satisfaction.

Simplified

- Improved transaction screen flow enabling faster customer checkout
- Full white labeling options enabling complete brand control over the entire application
- Seamless connectivity to ROAMmerchant - the newly designed portal providing merchants with a single access point to manage their business

Secure

- End-to-end encryption providing secure protection over cardholder data
- User management capabilities allowing applications to be remotely disabled
- PIN-based secure user authentication to restrict access and reduce fraud risks
- Secure offline capabilities to protect against lost wireless network connectivity

Flexible

- Support for magnetic stripe, EMV and NFC transactions, with additional capabilities including voids, refunds, sales tax and tips
- Multiple language options and currency types available to support merchants across the globe
- Real-time receipts that can be sent to customers via email and/or SMS
- Complete product catalog control allowing merchants to upload and customize item images, SKUs, and more
