

Dianabol Inject Kopen

→ VISIT OUR STORE ←

Dianabol is één van de populairste steroïden en naast Deca en D-Bol het derde meest gebruikte anabool onder sporters.
Got another Testosterone boost yesterday. Got to love having a sore hip for a few days but it's well worth it. Shots never really worked for me like this stuff does.

Injectable Dianabol. The injectable version of Methandrostenolone is a C17-Alpha Alkylate meaning that it undergoes metabolic changes in the liver.. Both the oral and injectable forms of Dianabol cause liver toxicity. The Injectable form of the drug works faster because when injected into the bloodstream, it bypasses the first liver filtering that occurs with the oral version of the drug.
