The King Gottwald Peter

<http://www.TheImperiumofDiamondsGovernment.populiser.com>

Hello Dear Directors,

Hello also to partner players

My name is Gottwald Peter, as well as a legal entity of a political nature as the King of a new government representing the founding countries over territories in the zone North of East Africa, 2,060 kilometers square area and open-plan for the development of civilization.

Today, I represent political rights-based principles of the UN Charter and UNGA conventions also a natural moralism of International law, so are the rights of ownership of my people and the government of my country, law decisive for the future existence of your country above all Austria and other European.

Today, I want to communicate with You as a person with extraterritorial activity on Austrian territory of the country, and an open field of International law, legal claim, enabling communication with the Austrian people, the media, businesses, associations and organizations, legal persons, but also among politicians.

My current stay in Austria is based upon apartheid and crimes in the form of political persecution, illegal blocking and stealing the rights of freedom and possibility to use the peaceful development of the state.

My interest is therefore to contact your movements, and ask You to support communication and coordination on your part for me, so I can once again encourage many of your interests and vital strategies that it is advantageous for You in our cooperation.

Benefits that You give a new position and a strategic resource for your interest and for your genuine interest in people.

It is true that many political people here in Austria, the people responsible of crimes such people together coordinated the promotion of lies and illegal facts that support social company to collaborate on international crime, and it is indeed certain that these people will try to block your rights cooperation and communication with me or allow contact our interests and create step by legal intent and purpose that strengthens the natural consequence of the ability to eliminate terrorist crimes European structures in politics, and the punishment of these criminals.

I am a person illegally blocked in the format of the entity under terrorist oppression and apartheid. The first time earlier this crime dates back to my period of six years, 1998 and for the sake of my Mother is a period much earlier relationship.

It is true that the criminal responsibility of those European policy actually reaches the level of a format that is really serious, and under international law as a crime really the actual format of the highest character. Your politicians Austrian government organized collaborate on a systematic and silent genocide against more than 350 000 000 people worldwide in scope (1998-2017), and also again the apartheid against state, violations of internal affairs, peaceful damage development interests, exercise crimes that really drastically harm the interests stability of the International law and politics, too hard to damage the rights of the people of your country and which is therefore imprisoned in a quiet dictatorship without democratic rights and no claim for the free development and free

political interests.

Your country's government is working on the crimes that statistically outperform crimes in the global dimension of the Second World War. These are crimes that are really fundamental provision of the current system of world politics among all countries in the world that they are herewith are active together to prevent these crimes and firm punishment of criminal people who have a responsibility for the crimes of repeating or imitating statistics and act crimes Second World War.

I therefore ask your movement and your partner institutions and groups, I urge You to appreciate and important support to the steps to mobilize public companies for the purpose of full stop terrorist developing and facilitating decentralization terrorist network, so that this terrorist entity could be overthrown and nationally and internationally punished by the courts and tribunals.

As the main strategic objective measure of our cooperation, I therefore ask You and your partner network, the ability to use your powers for contact lawyer's firms, and also the Lawyer Bar Association of Austria, and at best, and the Bar Association abroad. The act of communication between lawyers is targeted for handover document that is designed for strategic and above-national-political form of legal centralization cooperation legal cooperation and logistics in the forms of a global movement and advocacy network that can negotiate and ensure growth strategy to support global mobilization States for the purpose of exercising the right to democracy all the world's peoples defining their cooperation to ensure that justice and punishment of criminal groups and also achieve its prevention.

If your forces will be able to foster communication among lawyers, that we can achieve success together which eliminates the risk of crime and the risk of bankruptcy civilization of your country, because the crimes of your government are indeed great, and really realistic rate surpassing even catastrophic consequences of the Second World War.

Your support will also supply power to me, and I was therefore able to compete much better European criminal networks that are constantly blocking my interests and rights, and also the future of the European countries.

The political value of today's governments of Europe is built on acts of government wrongdoing, disidium a really high treason against the European nations. The policy created crimes that severely violate the rights of developing of nations around the world, and the development law of my country. Each court from around the world and in the international legal horizon own demands for the judgment which decides and confirms the value of European sovereign debt that this really truly achieve ratification of a much larger extent than the power of today's annual economy of planet Earth. Such debts have created today's governments and your countries are therefore actually responsible for all financial obligation to pay the debts in the global dimension.

If your government refuses to pay the debts of financial responsibility, then the government of your country by demonstrating their own interest to develop a criminal monopoly on the international level and thereby harm the rights of states, as well as achieving the act of the threat of the First Global War as the opposition is truly the world.

My first interest in performance stability, I want to use my legal rights area ID's Diamond Oasis North Africa in which I can build civilization capable of ensuring quality of life for 10 000 000 people in the first year, and 150 000 000

people in ten years. I was able to immediately activate the high-capacity economy at the level of the most developed countries, and I am therefore also able to use my strength stabilization to reach full capability to support the stability of civilization and economy of your states and nations, avoid bankruptcy and extinction of civilization and law, and therefore it is forms part of a major strategy responsibilities of my interest.

I will support the stability of your State, as well as the human rights of the citizens of your country and at the same interest I will be active for success in promoting human rights for all others in the world.

Therefore, I immediately I encourage all refugees, migrants and illegally persecuted by hiding from criminal networks political movement here in Europe and abroad.

Today, the European refugee camps are imprisoned several thousands of people, hunger, disease and bacteria, poor hygiene, sometimes critical quality of life, no social support, no freedom, no options for the future outlook of life. Other refugees who are arriving by boat from the inland sea between the shores of Africa, Asia and Europe, most of them are killed or abducted for other criminal purposes, often blocked because European policy is not interested in supporting the infiltration of foreign persons and thus are current statement of the European policy only a deceptive and handling statement on the status of humanitarian step to support the refugees.

European policy is cheating on many factors media monopolies and illegal influence public social company, legal institutions and rights of many other states.

Nobel Peace Prize 2012 has been only a means of concealing the silent act of genocide strategic hundreds of millions of people abroad, particularly in Africa. Blocking the media and avoid cooperation on trade patterns, so too harsh violation of international trade rules. Blocking of the interest of protest against crime and to promote cooperation for justice, respect of acts which are the same underlying structure as the performance of the historically famous actors communist dictatorship, today created especially for monopoly growth dominance and power network of the terrorist movement with the composition of the persons who are criminally responsible and destined for real acts of punishment, a group that is so coordinately maintains and prevents other political parties to legally extend the principles of democracy, therefore, to a terrorist group could be fixed and stable without the threat of any penalty after the overthrow of criminal dominance of modern dictatorship. Crimes every day and against all civil rights.

It is therefore necessary to effectively co-ordinate and progress which means growth of power states, therefore, to be exercised justice and security. My duty is to ensure the stabilization of the mine and thus the ability to better coordinate, particularly suppress the dominance of the persecution of my people and illegal blocking and discrimination for my development at the level of communication and growth in society.

My target ID's Diamond Oasis is promoting a stable life and quality for starving children in the world today is that already 15 000 000 children each year who must die from lack of civilizing force. It is a project which is based since 1998, already in times when even I was a little kid.

My plans for the development of ID's Diamond Oasis is for the construction of 10 000 000 people, and the city will be built only in a record twenty days. Therefore, I can confirm that I am actually able to achieve this success and ensure

a healthy life for tens of millions of starving children.

Therefore, I ask your association, I ask for your support when You use your foreign relations between organizations, associations and movements. Expanding our cooperation on the international level and to the right in the form of direct communication between the European policies, and with support from the political representatives of foreign countries and international political organizations.

Our interests and cooperation therefore means stopping refugees in Europe, as is the ability to immediately provide a good place to live and ensure all the necessary foundations for their social qualities, education, medical assistance and employment, in any case full assurance of their liberty without additional blocking.

Likewise, I will support and your movement, and You can always use our cooperation to facilitate the protection of all politically persecuted persons, who this will be allowed to exercise the option to immediately establish their activities under the protection of my country or also use advocacy teams and business center of my country. People therefore have a right much greater certainty of freedom and the ability to grow without the restrictions of apartheid and discrimination.

It is important for me and for You simple steps to promote such transfer some of my documents before the Bar and the public office, possibly for banking institutions and branches.

Thus, I ask You also about the possibility of contacting encourage other lawyers abroad and thus encourage the creation of stabilization during my official cooperation to ensure normal growth ability.

EU policy will pass objections designed to stop our communication and cooperation, but it is not necessary to respect those objections. European policy and any component states do not own any right to such blocking freedoms and entitlements development in order to suppress the rights created in order to stop criminal movement and the radicalization of the state.

If any politician will protest, or sends its police officers it is good immediately contacted the United Nations to achieve this and obligations application of international law that gives the police the obligation to ensure cooperation for the elimination of crimes and terrorism that harms the rights of European states and creates the threat of bankruptcy of civilization.

In the case of apartheid repression and discrimination and blocking terrorist, because then it will be claimed, leading to mobilization departments of police, state intelligence service and army. Terrorist network policy can therefore be quickly suppressed, stopped and dismantled.

Is best strategy to inform all foreign organization's and justice tribunals of foreign countries of all another continents. Today, all courts have all rights for investigation of all european crimes and violences.

At the same time, for the purpose of growth and your strength and your ability to use global organizational and media cooperation, I pass on to You an invitation to collaborate on the creation of ID's International Information City which is the basis as the center of world media agencies and NGO organizations. The biggest information center and global organizational strength which in its own centralized information center uses a range of networks around the world

and also for the joint organization of cooperation in NGO groups.

Each member body gets its own offices and law civilization uses a strategy of information cooperation and the rights plan together information use at the international level that this for us gives opportunities for growth and influence global companies and massive expand our interests between the structure of trade, political and social company. It's a big step, and a boost for your interests that You easily can your work and give You the full capabilities of real growth and application of your interest and great dominance against criminal networks policy.

The town will be built 600 of the first skyscrapers, private airports, railway lines, water lines, power stations, satellite telecommunications, supercomputing information and logistics center, a perfect network of its own infrastructure and systems insulation against espionage.

Each media agency and a group of NGOs and associations and owns the rights to develop its own position in this information in and so strengthen their own activities to a level that means a global organizational and logistic superpower.

Cooperation for informational organization opens opportunities for You to expand your scope at the global structures, and the ability to always get a much stronger position than your political opposition is the basis of criminal nature.

Therefore, it is convenient for You to contact all other NGOs and associations in Austria, and then together as well as other NGO centers abroad. Your movement thus acquires the right to convene and support the organization of global summits and meetings between media agencies and associations. All You need to issue an invitation to the first input price on the global summit meetings, and the media who are interested will support the payment that will be used for hiring organizers who will ensure that rent public halls, stages and development of basic intelligence and collaboration with artists.

If your movement will encourage communication with lawyers, and ensure the creation of the office, it is immediately possible to apply the law of logistics for further contacting trade associations that can support my stabilize and we can ensure this growth ID's International Information City. Traders gain the right business in the territory of my country and the current plans for the infrastructure industry will ensure good financial returns for all business groups and institutions.

I believe that many traders around the world are custom option used advantageously collaboration with me today because I also represent a strategy of cooperation of the merchants of the world as the format department Corporatocracy which is based upon the creation of an autonomous corporate civilization that is so important center of trade in much greater prosperity before bidding and profit outlook of today's global market.

This means that our subsequent possibility of cooperation in the interest of ID's international information center because it can be under the protection of networks worldwide traders and markets over which the dependence of all politicians around the world, and it is also possible to use the full stability and dominance against any crime and the opposition.

My goal is also to establish a new department of autonomous forms of government the basis on international confederation of all countries active as World Diamond International Alliance evolving over new territories in space, thus expanding as a global center of civilization that belong to the sovereignty of governments, meaning act of open possibilities for the establishment of the

world's super powers which surpasses the importance of the United Nations, but also advanced and dynamic format of the European Union and the Council of Europe.

World Diamond International Alliance is a subject open further as the International Senate designated representative for all states, and the Parliament Mean house of parliament as a destination for all political coalition parties. The lower chamber of Parliament, such as the International Parliament is open to all political parties of the world, for the purpose of establishing joint coalition, similar as a European Parliament, but into a global and much dynamical dimension. International Parliament goal is to ensure the development of network strategy and continued cooperation with NGO groups, associations and foundations and forms of government movement, but also together with representatives of business and markets.

It's a strategy that best for You given the opportunity to globally unify all groups, associations and NGO's, foundations and government movement, and thus with traders and parliamentary political parties which are therefore in the ratio of common logistics International Parliament may significantly affect international political strategy and identify the growth of world politics directly for more significant rhythm of world peace.

If the end result could be that the European civilization are due to liability crimes and forced into bankruptcy, it is therefore confirmed that the strategy of the World Diamond International Alliance that there is a much greater certainty of maintaining stability and security for your country, nation and civilization. Is it for You much more confidence that European civilization may be mature and stable, even if full bankruptcy of the government. Your territory, as in the period after the Second World War, it would be entrusted under international administration as a unified state, because the substrate directly as a World Diamond International Alliance.

World Diamond International Alliance for your country means the ability to exploit for its own growth, the choice of many options on the level of centralization of global markets and trade the best business networking world, also certainty of security based on worldwide cooperation of all armies and because of your country that there is a real form of super power on a global level without competition. Your country thus becomes the center of the world, and even with more advanced nature than New York, Paris, London or Shanghai.

Your country may be the most advanced center of the world, so it is always a great advantage to me to support. It is true that I do for your country always bring a lot more than your present governments which only just cheating your country and holds it in disaster risk and full civilization bankruptcy.

**Thank You for your support and I wish You good luck and success.
Certainly I will be very happy for the opportunity of our joint meetings
and friendly communication, it is for us and for your country is always
a step forward.**

The King Gottwald Peter

<http://www.TheImperiumofDiamondsGovernment.populiser.com>

The Federal Government of The Imperium of Diamond's

Good day for European State Advocates Bar Association and the Advocacy Association.

My name is Gottwald Peter King, Represent new government of the country with territories in Northern East Africa, also territorial claim originating in the North Atlantic, as well as legal rights are the foundation of positions on other planets in the universe.

King Gottwald Peter I represent the government of the country with the foundations of international political communication, and also the foundations and the legal right of its economy which today reaches the dimension of the importance of greater value than the economy of planet Earth.

Today, the days I'm active as an extraterritorial entity in the territories of Europe and set up their own activities for the purpose of prevention of apartheid and terrorist blocking part of the European policy which regularly violates International law of the UN Charter, UNGA Conventions, International Humanitarian Law and the principles of its own national jurisdiction and rights, constitution.

Crimes of your politicians make acts of crime statistics that dramatically outstrips the crimes of the Second World War, and in the present state of quiet and systematically committed genocide in the amount of 350 000 000 people, and economic debts that surpass the annual GDP statistics planet Earth.

European terrorist network policy by creating monopolies and corruption strategy development silent discrimination rights of democracy, for the purpose of stabilizing its own criminal networks and secure disposal of legal opposition.

Therefore, I reveal and your parties, and offer the possibility of a revolutionary new cooperation led to organizing the logistics for the liberation of the European countries and ensuring security firm.

I encourage You to take the document and ensure that our cooperation over the foundation of the obligations arising from the European Convention on Human Rights, including the UN Charter and the UNGA other forms of convention rights, meaning your obligation to ensure full cooperation and success.

I offer big financial gains, growth careers, and global cooperation and political activities. The document is officially designated for each lawyer in your country.
