Minecraft Servers 2022

Continue reading to find out why these servers made the list..

What are Minecraft Servers?

Minecraft Servers are a great way to meet new people and forge new friendships. A Minecraft Server is a platform on which people can enjoy the game of Minecraft by playing with many other players from all over the world. Minecraft Servers are hosted by individuals or companies. This is a really great way to experience Minecraft! Read more at Wikipedia.com

A Minecraft Server List is a website that lists a lot of Minecraft servers for players to choose from. On a Minecraft Server List, you can find thousands of servers which are categorized according to their gamemodes. To start, find a Minecraft server list, such as this website, then click a gamemode and browse through the servers. When you find one you like, click on it and the copy the ip to join the Minecraft server!

How to play Minecraft Servers?

As for how to join a Minecraft server, you need to go onto a Minecraft Server List website like ours and find a server that you want to play on. Luckily, we have a lot of servers right here on our website! There is a great selection of gamemodes and servers that have been vetted manually by us. Once you have found a server, click "Copy IP" then open Minecraft: Java Edition. In Minecraft, click on "Multiplayer" then "Add Server". Paste the IP that you have copied into the IP Address field and for the port put "25565". From there, click on the server and it should load up.
