We always need to clean up house before remodelling it! Same with a number of aspects of life. From a dietary perspective - plants are used to cleanse and detoxify you but won't necessarily feed you. Plants are medicinal and therefore catabolic. While animal foods are more anabolic and needed to rebuild you up and feed you again. We should look at diets and protocols as tools on a tool belt. Use them whenever we intuitively feel we need to. That means we don't need to be vegan forever or vegetarian forever or do intermittent fasting forever! Your body will tell you when it's time to use one of these tools. They should never be used as a religion or cult to define who you are. This concept also relates to ascension! Ascension is just like a detox as you are removing the conditioning and programming which has limited your capabilities. It's essentially the process of finding your true self again. There are many energy sensitives out there who identify themselves as starseeds
