Several studies have documented the ability of a potent Tribulus terrestris extract(protodioscin to enhance the production of LH, which is the direct hormonal trigger for testosterone production. Unlike most low potency Tribulus products on the market, Bulasterone™ contains the highest standardized version of Bulgarian Tribulus terrestris extract available, which consists of 60 protodioscin, 70 furastanol saponins, and 90 total sap

DILE **NO** AL DOLOR.

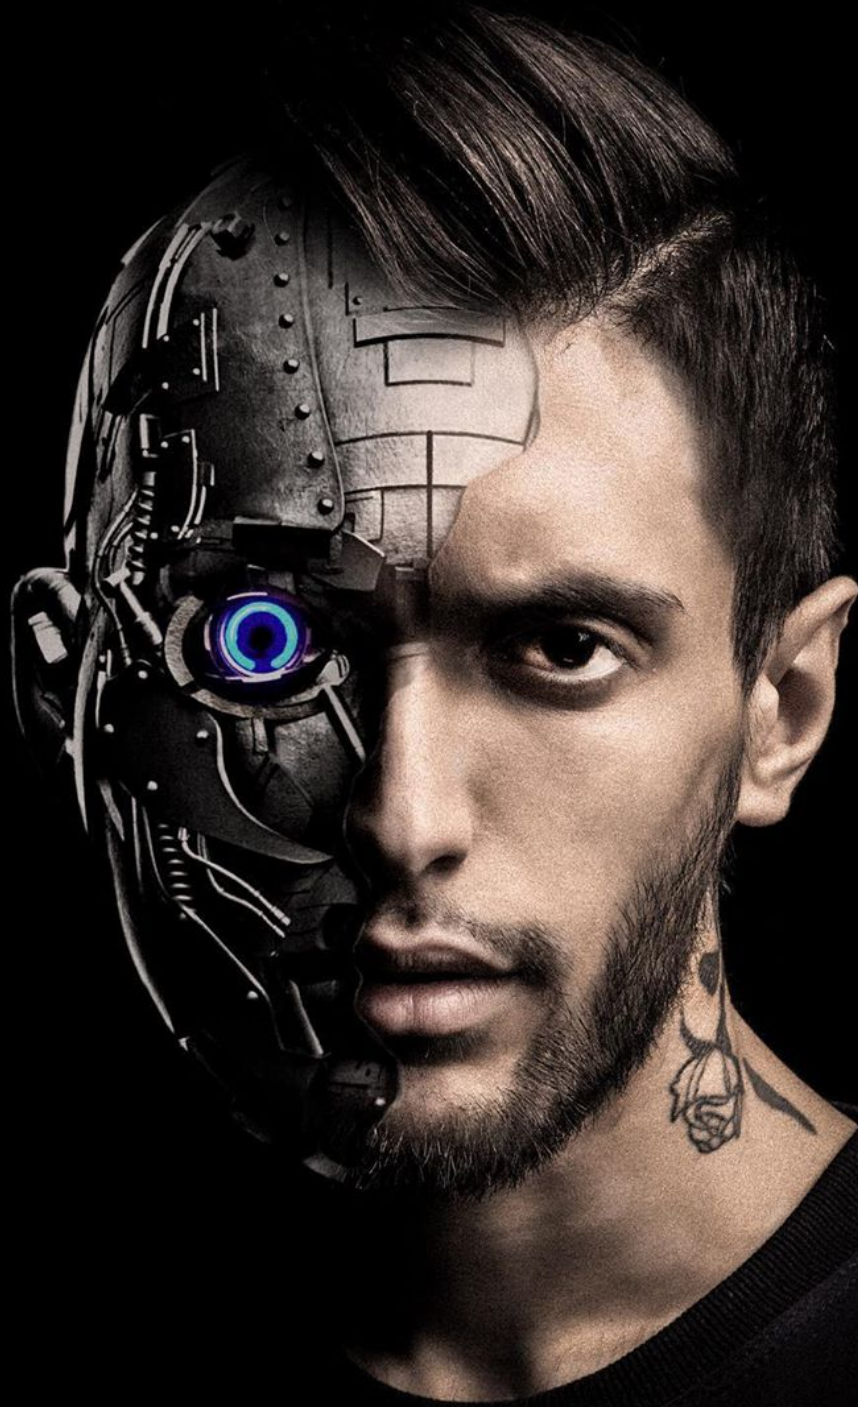

Producto 100% natural.

The active compound in this prohormone is methasterone also known as methasterone and methyl drostanolone. Its systematic IUPAC name is 17 β - Hydroxy- 2 α , 17 α -dimethyl- 5 α - androstane- 3- one. The half- life of this prohormone is 6- 8 hours. Superdrol became a legend in the bodybuilding world due to its speedy results in terms of significant hard and dry gains within a few weeks of usage. Superdrol gained huge success in a very short period of time. Many of its users were happy with the results and reported to gain 20- 30 pounds of muscle mass within 4 weeks of usage.

Para los hombres eficaz Superdrol dosis para mejorar la forma física está dentro de la variedad de 10-20 mg coherente con día, no mayor de 6-ocho semanas. Este nivel ofrece un considerable crecimiento de la masa muscular y es seguido a través de la quema de grasas y la mejora de la representación.

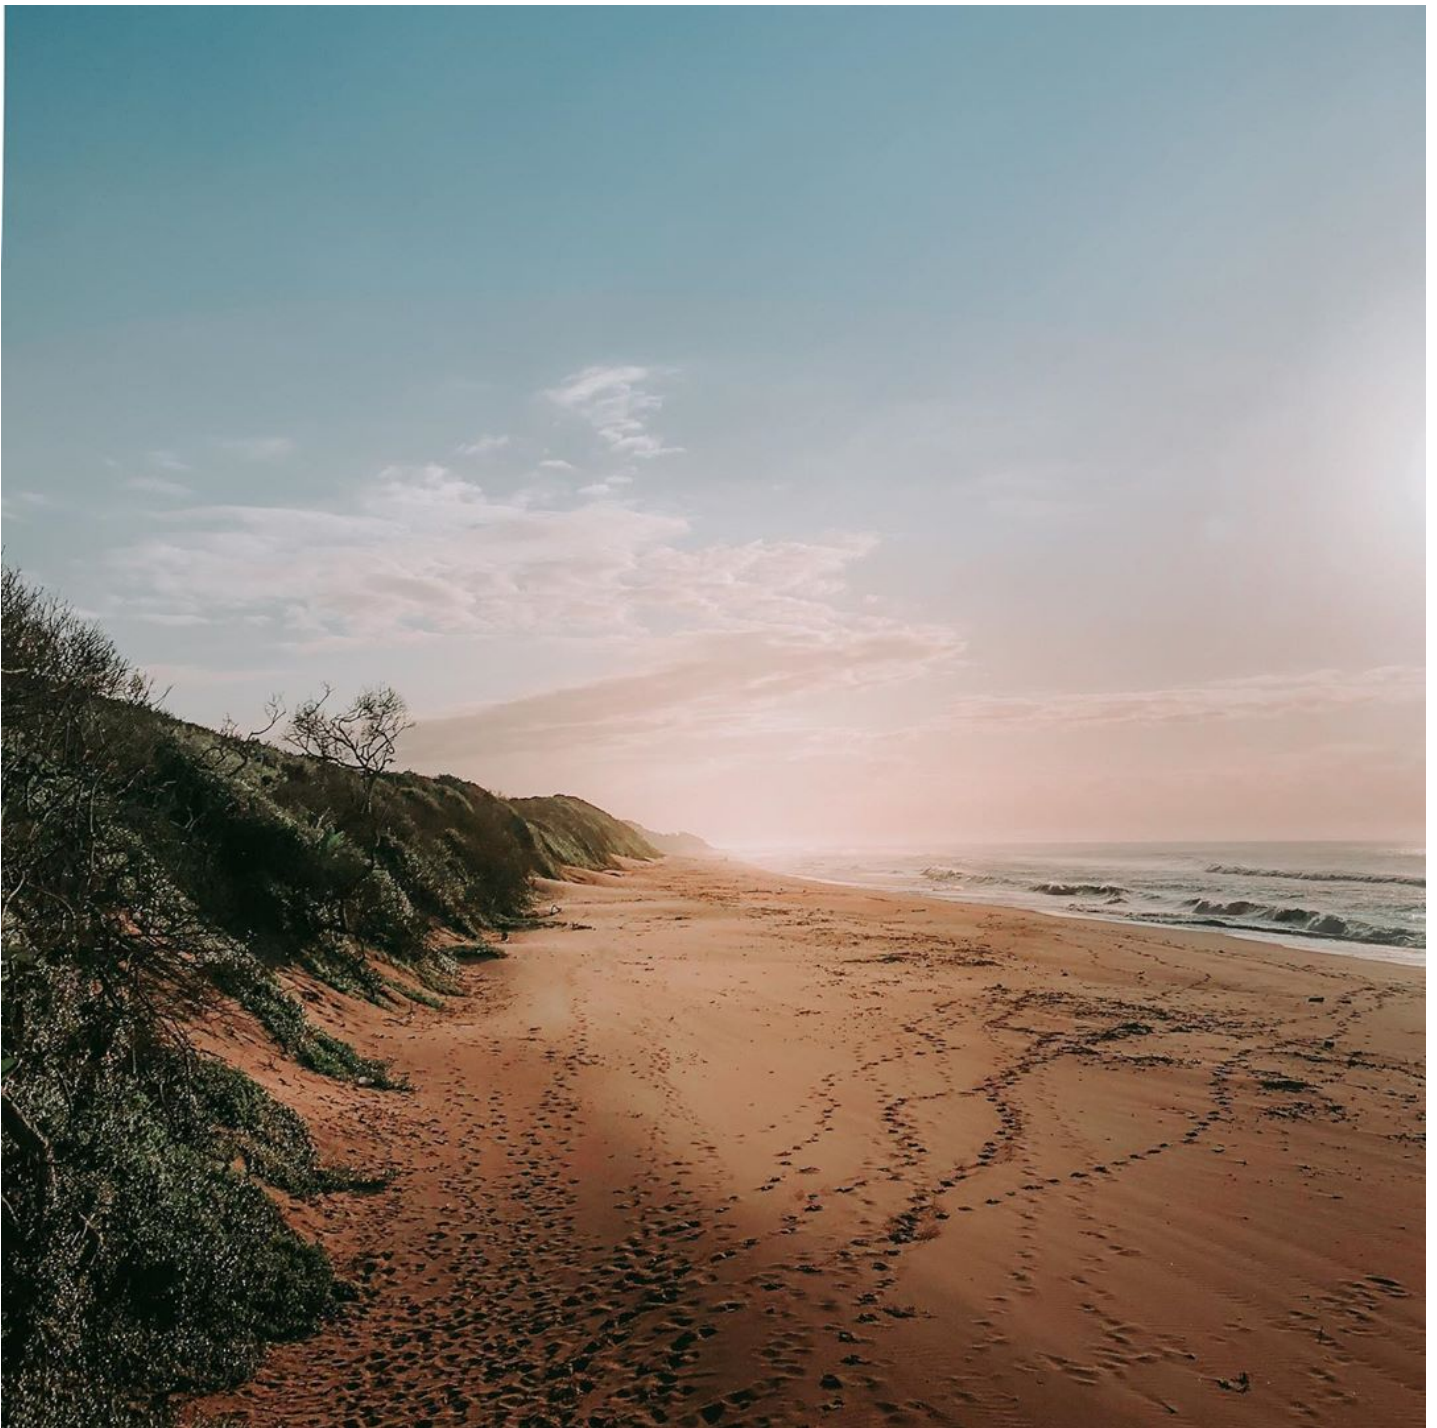

☼*Fitness não é somente ir á academia, mas sim revigorar sua felicidade e melhorar o seu bem-estar ☼*

P.S. I'm accepting 2 new clients at the moment. If you need help dropping that quarantine 15 and need the proper guidance, hit my line! ☐ 1349

Hepatotoxicity: The side effects of Superdrol with this steroid can include those of an androgenic nature. However, due to a low androgenic nature the threshold for such effects should be fairly high with most men. Possible androgenic side effects of Superdrol include acne, hair loss in those predisposed to male pattern baldness and body hair growth. These effects are highly dependent on genetic predispositions, but even if sensitive you will not be able to reduce the androgenicity of this hormone. The Methylrostanolone hormone is not metabolized by the 5- alpha reductase enzyme making 5- alpha reductase inhibitors like Finasteride useless with this steroid.
