

PRODUCT FACT SHEET

MamyPoko Extra Dry Protect

The world's first mosquito-repelling diaper* MamyPoko Extra Dry Protect implements patented technology from Japan that captures lemongrass extract in microcapsules on the surface of the diaper tape. Upon rubbing or scratching the diaper tape, the microcapsules will be activated and lemongrass scent will be released, helping to repel mosquitoes for up to six (6) hours.

The diaper is alcohol-free, DEET-free and the lemongrass microcapsules do not come into contact with the baby's skin. The diaper tapes have also been proven to be safe for babies.

The MamyPoko Extra Dry Protect diaper also boasts powerful absorbency that absorbs and locks in urine for up to 12 hours. Its Speed Airwave technology with 360° airflow allows for extra dryness, keeping baby's bottoms dry and comfortable for long hours of quality sleep.

To activate the mosquito repelling feature of the diaper, rub the tapes of the diaper after the diaper has been put on. To release a stronger scent, scratch the diaper tapes.

Diaper Size	Weight Range	Price
M	6kg - 11kg	Introductory price of RM39.99 per pack is now available at selected outlets
L	9kg - 14kg	
XL	12kg - 17kg	

Disclaimer: *Based on main global disposable tape diaper brands as researched by Unicharm in February 2020, the microcapsules structure containing fragrance are applied to the tape of the diaper.
