

# Thin Brick Veneers

*Sublime Facade*

One of the most unique colour ever available in ceramic and clay industry. Anthracite Black Thin Brick Veneers provide a classic aesthetic appeal to your feature walls and front facade. Whether it's your house porch or parking lot of your office, it would compel the passers to stop by and gaze the charisma of this ebony cladding. Anthra Black Veneers are carved artistically by skilled human hands taking measure of the excellence of colour and texture.

*Noir Black*

## *Gault Buff*

Have you ever witnessed the exquisiteness of a sunny day with its reflection on a facade of Buff Brick Slips. Or why not try glowing it under the luminous of an overhead lamp. Buff Brick Slips showcase an entire class of authentic Brick-interior that enhances the credibility of an exposed masonry. Buff Brick Slips are the absolute choice for the commercial site customers

# *Terra Vermelho*

No more wallpapers. Sublime Facade brings the original Brick Slips for those who take pride in the terracotta art applied to the cladding at their exterior as well as interior feature walls. An unlimited range of texture where every single piece has its unique non-redundant character that ensures the integrity of your outclass application.

# *Avellana Brown*

The character of these Mahogany Brown Veneers are unparalleled when they are being applied outdoors. With the unique personality it intensifies the presence of every individual wall on which it is being clad. The surface texture and variety of colour in this very specific Veneer is what makes it distinctive in many aspects. The ever living natural appearance of this Veneer is the best thing you could ever dress your wall with.

# *Charcoal Grey*

Verily, the charcoal greys are the ones that imitate the natural slate stone. Their resemblance pertains to the rocky tracts that would emerge as a serious contender for a strenuously epic Castle-like appearance. This colour has been acquired by employing highly technical phenomenon that has guaranteed the colour life to be at max.

# Thin Brick Corners

No need of cutting and bonding the pieces for the outward corners and edges of your featured wall or pillar. And even when the application has to be done at the windows or doors with extrovert hinges, the ready to use Corners have been manufactured to comply with the specific colour need. This piece would make your veneer job a certain authentic piece of work by avoiding any gaps or angular bonds.
