Schering Bayer Proviron 25mg. This has always been the problem with dihydrotestosterone itself - once it enters muscle tissue, the enzyme 3-hydroxysteroid dehydrogenase converts it to 3-alpha-dihydrotestosterone. In Canada, a similar law to that of the UK runs true where it is a Schedule IV drug, whereby possession and use of Proviron is not allowed.

Proviron is an anabolic steroid that creates strong synergy when stacked with other anabolics. Non-aromatizing Proviron inhibits aromatase of other steroids by Bill Roberts - Proviron (mesterolone) is an interesting anabolic steroid, though it is not of much value to bodybuilding. It seems that the most...
