

## RAUEMI 1 / RESOURCE 1: SUGGESTED CLEANING PROCEDURES TO REOPEN AND KEEP OPEN A SITE (adapted from [Crewcare Commercial Cleaning](#) website)

### Level One **Standard Clean** – (site has been vacant / unused throughout the Pandemic)

- Cleaning and disinfecting all touch points at a site including door handles, switches, taps, doors, and floors
- Complete standard clean of premises
- All touchpoints sprayed with sanitiser or 50:50 bleach solution
- Floors and soft furnishings vacuumed
- **No closure required while work is carried out and work can be done by anyone wearing appropriate PPE**

### Level Two **Precautionary Clean** – (site open / used with no confirmed COVID-19 case(s) throughout the Pandemic)

- Cleaning and disinfecting all Level One areas and everything up to two (2) metres high including walls, glass, and under furniture
- Includes entrances, foyers, reception, office areas, meeting rooms, stairs, corridors, kitchens and lunchrooms
- Toilet areas included with extra precaution taken if the area is possibly high-risk or infected with bacteria or virus
- **Involves closing off areas frequented by people and, while it may be done by anyone wearing appropriate PPE, it is advisable to also have professional supervision onsite**

### Level Three **Deep Clean** – (site has been visited / used by confirmed COVID-19 case(s) during the Pandemic)

- Cleaning and disinfecting using a high-level procedure that involves fogging with suitable chemicals
- Heat treatment with the temperature maintained according to site and room condition
- Vaporisation or dry fogging process with rooms airtight and **workers in full PPE gear**
- Surface cleaning based on CDC guidelines
- Extracting all fog and toxic gas from the room
- Equipment and personnel decontamination with professional equipment
- **Involves assistance from Chemcare for infection control and needs to be carried out by a professional cleaning company**
