[SchemaNinja Review – What is SchemaNinja?](#)

Does your website appear on the search results with enhanced features like rich snippet, working hours, upcoming event timing, and a 5-star review from Google?

For more than two-third of us, the answer is no!

It is simply because they haven't checked out the latest SEO trend called schema marking.

But, you can break this paradigm with [SchemaNinja!](#)

A schema is an informative set of HTML codes in your pages which helps to structure the WWW and fetch quicker results.

You can do the research on schema.org and find a direct involvement of all major search engines in the project.

However, implementing schema on your own is a tedious task which couldn't prove its worth without a review. Usually, it takes quite some time for Google to rate a website with good traffic but you can get yours done with the [SchemaNinja](#) Plugin – and in just minutes.

SchemaNinja is an advanced rich snippet ((the few lines of text that appear under every search result with detailed information intended to help users with specific queries) plug-in that can generate schema ratings for any website, including the product/ service recommended by it.

This plug-in will fight to push the ranks of your website.

A schema can have a direct impact on the current Click-Through-Rate (CTR) values and search ranking.

We have done our homework and know how the schema can directly affect CTRs and search ability. So, it's better to get reviewed before your competition does, instead of waiting for the imminent to happen.
