

## Relation of Styling with Hair Transplant Over Baldness Factor

Large numbers of people are facing the problem of hair fall due to millions of reason like pollution, sea water, lack of protein and other important nutrients. Some people are also having hair fall due to access use of hair styling products like straighteners, rollers and dryers. The heat produced by these hair styling tools damages the hairs and causes hair loss.

Hair fall is not a major or serious issue as we are blessed with hair transplantation technique that shows hundred percent results. Investigate well on internet and find best [Hair Clinic in Ahmadabad.](#)

## Why Hair Transplant is better than other techniques.

Hair transplant is the process that is used to transplant hair follicles from a donor area of a scalp to an area, where hair loss is experienced. This surgery includes the extraction of follicular units, or strips of hair follicles, and then implanting them into the affected area.

Hair Transplant fact is based on different physical and psychological over

Baldness factors that are described below.

### **1. Natural Look**

Hair transplant gives you a natural look. Most of the time, patient's relatives and friends are not able to recognize that the changed look of the patient is because of a surgery. Everything seems so natural. Undoubtedly, a natural look makes you look younger.

### **2. Hairstyles:**

With your healthy hair, you are free to wear any hairstyle you want without any hesitation. These hairstyles give you a sense of a younger look.

### **3. Describe Facial Features:**

Like other parts, your hair is also a prominent part of the face that enhances your look, treating your hair confidently would let you look younger.

### **4. Energetic Appearance:**

When you are sad, your face shows your sadness. A sulky face is devoid of energy and looks older. After the transplant, your mental status would be changed and you would start to have an energetic appearance.

### **5. A Sense of a Powerful Self-image:**

Any deformity in the body causes low self-esteem. A person with low self-esteem condemns his own self – image. This situation is really painful for a person. After the surgery, you are supposed to raise your self – esteem and think about yourself positively.
