Specifically, Oral Turinabol is a cross between Methandrostenolone and Clostebol. This provides a steroid with powerful anabolic action while at the same time minimizing androgenic characteristics. Oral Turinabol also carries somewhat of an interesting history behind it. Oral Turinabol was first released by Jenapharm out of East Germany in 1962.

Historically, Turinabol was administered in two different forms, being 1 mg + 5mg tablets. The 1 mg type was used for individuals who were more sensitive to anabolic steroid therapies (like women and children). It was prescribed for a wide array of illnesses, but mainly for the promotion of lean muscle mass. It proved especially effective for ...
