RV/INTELLIGENCE ALERT - September 12, 2019

(Disclaimer: The following is an overview of the current situation of the world based on intelligence received from several sources which may or may not be accurate or truthful.)

President Trump is expected to make announcements within the next 7 days.

John Bolton was fired as he was suggesting war against North Korea and Venezuela.

Meanwhile, a stock market crash may occur in the near future.

Growth stocks are exceeding value stocks in performance and the Federal Reserve rate cuts aren't having the desired effect.

The US Dollar is still expected to devalue significantly (possibly a 50% drop) in the near future.

Once the US Dollar begins devaluing, China's economy will begin to collapse as they are holding trillions in US treasuries.

President Trump will return to the Gold Standard via executive powers to save the US Dollar.

Once the Gold Standard returns, the Federal Reserve will be abolished.

Also, Beijing is expected to see major reforms or face revolt from the people of China and it's provincial governments.

According to sources, several currencies are lined up to revalue.

Iraq is expected to revalue their currency first, followed by other countries.
